How China Escaped Shock Therapy Isabella M. Weber,2021-05-26

China has become deeply integrated into the world economy Yet gradual marketization has facilitated the country s rise without leading to its wholesale assimilation to global neoliberalism This book uncovers the fierce contest about economic

reforms that shaped China's path. In the first post-Mao decade, China's reformers were sharply divided. They agreed that China had to reform its economic system and move toward more marketization but struggled over how to go about it. Should China destroy the core of the socialist system through shock therapy or should it use the institutions of the planned economy as market creators? With hindsight, the historical record proves the high stakes behind the question. China embarked on an economic expansion commonly described as unprecedented in scope and pace, whereas Russia's economy collapsed under shock therapy. Based on extensive research including interviews with key Chinese and international participants and World Bank officials, as well as insights gleaned from unpublished documents, the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization. Beyond shedding light on the crossroads of the 1980s, it reveals the intellectual foundations of state-market relations in reform-era China through a *longue durée* lens. Overall, the book delivers an original perspective on China's economic model and its continuing contestations from within and from without.

China's Reform in the Next Ten Years Yilin Press, 2016-05-24 A collection of essays by leading Chinese political economists about the economic challenges facing China today and the reforms to everything from financial institutions to urban housing policy that will be necessary to prepare for the next ten years.

China's Transition from Socialism? Dorothy J. Solinger, 2016-06-16 The essays in this volume address the industrial, commercial, urban, and regional reforms of China's planned economy during the 1980s. The emphasis is on the dominating institutional and bureaucratic presence of the state, even as it sought to loosen the pre-1979 vertically structured, centralised command system and to introduce some market principles to stimulate economic activity. The essays fall into four categories: theoretical and policy discussions and debates at the central leadership level; reform of the urban economy and of inter-regional relations; industrial and commercial reforms; and the rise and position of the new entrepreneurial class. Many of the essays draw on interviews with Chinese economic officials in the Central China city of Wuhan, and therefore this is the only study that uses local data on actual operations of reforms from a Chinese city. The other sources are the Chinese press and Chinese official and scholarly journals. In each of the categories, there are pieces from different points in the chronological process of reform. This study begins with the first theoretical discussions among China's economists and top political leaders in the late 1970s and concludes with experiments with bankruptcy and stock markets in the late 1980s. The countervailing heavy presence of the state at both the policy and the practical levels throughout the reform decade is its unifying theme.

Price Reform in China, 1979-86 Jiann-Jong Guo, 1992-06-18 This text investigates the characteristics, achievements, and difficulties in reforming the producer and procurement pricing system in China. It attempts to show how the price system moved from a high degree of control in a rigid command economy to partial control in a more decentralized economy.

China and Globalization Doug Guthrie, 2012 An accessible introductory text on contemporary China, this book covers the social, economic, and political factors responsible for China's revolutionary changes and interweaves this structural analysis with a consideration of social
