*New Perspectives in British Cultural History* Rosalind Crone, David Gange, Katy Jones, 2021-03-04 This book is composed of a selection of papers presented at a conference in Cambridge in December 2005 Cultural history is a relatively new sub discipline Over the past few decades it has become increasingly apparent that a new generation of historians has emerged These scholars have become concerned with research sources and questions traditionally beyond the scope of the discipline of history Indeed recent monographs in history have demonstrated a growing awareness of the cultural imagination in analyses of patterns of change and continuity in the past Such a movement has also encouraged the development of new networks between different disciplines in the Arts and Social Sciences The authors of these chapters come from a wide range of academic backgrounds While all are concerned with crucial issues of the past they represent a substantial variety of disciplines In addition to the historians are those trained and working in literary studies art history design music and science As early career scholars the research they present is cutting edge these contributions represent the very latest trends in cultural studies and demonstrate the attempts of new researchers to answer the most current and challenging questions that are being proposed in this field

**Making Magic** Randall Styers, 2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines the concept of magic has played a major role in defining religion and in mediating the relation of religion to science Across these disciplines magic has regularly been configured as a definitively non modern phenomenon juxtaposed to distinctly modern models of religion and science Yet this notion of magic has remained stubbornly amorphous In Making Magic Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity norms based on narrow forms of instrumental rationality industrious labor rigidly

defined sexual roles and the containment of wayward forms of desire Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety legitimate scientific rationality and orderly social relations are brought into relief Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science On a broader level says Styers magical thinking has served as an important foil for modernity itself Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world **The colonisation of time** Giordano Nanni,2020-10-20 The Colonisation of Time is a highly original and long overdue examination of the ways that western European and specifically British concepts and rituals of time were imposed on other cultures as a fundamental component of colonisation during the nineteenth century Based on a wealth of primary sources it explores the intimate relationship between the colonisation of time and space in two British settler colonies Victoria Australia and the Cape Colony South Africa and its instrumental role in the exportation of Christianity capitalism and modernity thus adding new depth to our understanding of imperial power and of the ways in which it was exercised and limited All those intrigued by the concept of time will find this book of interest for it illustrates how western European time s rise to a position of global dominance from the clock to the seven day week is one of the most pervasive enduring and taken for granted legacies of colonisation in today s world **Childhood in Edwardian Fiction** A. Gavin,A. Humphries,2008-12-17 The first book length look at childhood in Edwardian fiction this book challenges assumptions that the Edwardian period was simply a continuation of the Victorian or the start of the Modern Exploring both classics and popular fiction the authors provide a a compelling picture of the Edwardian fictional cult of childhood **Dreams and History** Daniel Pick,Lyndal Roper,2004-08-02 What is a dream Dreams are universal but their perceived significance and conceptual framework change over time This book provides new perspectives on the history of dreams and dream interpretation in western culture and thought Dreams and History contains important new scholarship on Freud s Interpretation of Dreams 1900 and subsequent psychoanalytical approaches from distinguished historians psychoanalysts historians of science and anthropologists This collection celebrates and evaluates Freud s landmark intellectual production whilst placing it in historical context A modern view of psychoanalysis it also discusses the controversial idea of the role of the external world on the shaping of unconscious mental contents In highly accessible language it proceeds through a series of richly illustrated case studies providing new source materials and debates about the causes meanings and consequences of dreams past and present from Victorian anthropological exploration of ancient Greek dream sources to peasant interpretation of dream life in communist Russia from concepts of the dream in sixteenth century England to visual images in nineteenth century symbolist painting in France Dreams and History will fascinate those interested not only in psychoanalysis and history but also arts culture humanities and literature

Allen Paisant provides a timely critical reappraisal of Aim C saire s works The book showcases C saire as a major Black thinker whose writings remain deeply relevant to today s crises and debates      *A History of Leisure* Peter

Borsay,2006-02-27 Leisure is a key aspect of modern living How did our ancestors experience recreation in the past and how does this relate to the present To answer these questions Peter Borsay examines the history of leisure in Britain over the past 500 years analysing elements of both continuity and change A History of Leisure Explores a range of pastimes from festive culture and music to tourism and sport Emphasises a conceptual and critical approach rather than a simple narrative history Covers a range of themes including economy state class identities place space and time Treats the constituent parts of the British Isles as a fluid and dynamic amalgam of local and national cultures and polities Authoritative and engaging this text challenges conventional views on the history of leisure and suggests new approaches to the subject Borsay draws upon the insights provided by a variety of disciplines alongside that of history anthropology the arts geography and sociology to offer an essential guide to this fascinating area of study      *The Reform of Time* Maureen Perkins,2001-03-20 Perkins

communication and cultural studies Curtin U of Technology challenges the idea that the decline of magic is the result of the rise of scientific knowledge and the spread of education She argues that 19th century marginalization of superstition is part of a social history of time management In th course of her discussion she relates differing concepts of time to colonial discourse surveys technological developments in the calculation of time and assesses the role of popular beliefs in astrology books of fate and prophetic dreaming Distributed by Stylus Annotation copyrighted by Book News Inc Portland OR

**Shaping the Day** Paul Glennie,Nigel Thrift,2009-02-12 Timekeeping is an essential activity in the modern world and we take it for granted that our lives are shaped by the hours of the day Yet what seems so ordinary today is actually the extraordinary outcome of centuries of technical innovation and circulation of ideas about time Shaping the Day is a pathbreaking study of the practice of timekeeping in England and Wales between 1300 and 1800 Drawing on many unique historical sources ranging from personal diaries to housekeeping manuals Paul Glennie and Nigel Thrift illustrate how a particular kind of common sense about time came into being and how it developed during this period Many remarkable figures make their appearance ranging from the well known such as Edmund Halley Samuel Pepys and John Harrison who solved the problem of longitude to less familiar characters including sailors gamblers and burglars Overturning many common perceptions of the past for example that clock time and the industrial revolution were intimately related this unique historical study will engage all readers interested in how telling the time has come to dominate our way of life      Magical

Thinking Stuart McWilliams,2011-12-08 Examining how scholarly writing has contended or conspired with discourses of enchantment from the Middle Ages to the present      **The New Time and Space** John Potts,2015-09-15 In the networked

age we are living with changed parameters of time and space Mobile networked communication fosters a form of virtual time and space which is super imposed onto territorial space Time is increasingly composed of interruptions and distractions as

smartphone users are overwhelmed by messages      **On Time** On Barak,2013-07-19 In this pioneering history of transportation and communication in the modern Middle East On Barak argues that contrary to accepted wisdom technological modernity in Egypt did not drive a sense of time focused on standardization only Surprisingly the introduction of the steamer railway telegraph tramway and telephone in colonial Egypt actually triggered the development of unique timekeeping practices that resignified and subverted the typical modernist infatuation with expediency and promptness These countertempos predicated on uneasiness over dehumanizing European standards of efficiency sprang from and contributed to non linear modes of arranging time Barak shows how these countertempos formed and developed with each new technological innovation during the nineteenth and early twentieth centuries contributing to a particularly Egyptian sense of time that extends into the present day exerting influence over contemporary political language in the Arab world The universal notion of a modern mechanical standard time and the deviations supposedly characterizing non Western settings from time immemorial On Time provocatively argues were in fact mutually constitutive and mutually reinforcing

Dismantling the Master's Clock Rasheedah Phillips,2025-01-28 A radical new treatise on time quantum physics and racial justice from world renowned artist and advocate Rasheedah Phillips of Black Quantum Futurism Dismantling the Master's Clock is a groundbreaking debut work that synthesizes philosophy and the history of science with Black cultural traditions speculative fiction and Phillips's own art practice to argue for a more equitable access to time and the future While some processes like aging birth or car crashes seem to occur in only one direction of time by the apparent logic of the universe human consciousness should experience time both backwards and forwards Though past and present organize our lives like unarguable fact the physicists who study time are much less certain Linear time is an illusion explains Rasheedah Phillips a construct even science contests It is based more on Western history and systems of social order than on nature or the variety of human existence Both indigenous African conceptions of time and quantum physics recognize how the past present and future act upon and modify each other Afrodiasporic identity is itself a time traveling phenomenon in which the past is always present Phillips unfurls time's legacy of racial oppression from maritime navigation for colonial expansion and the timekeeping methods of plantation overseers to the establishment of Greenwich Mean Time and the Western Scramble for Africa time has been a homogenizing project of the last few centuries Phillips unsettles dominant assumptions of space and time highlighting how Black communities have long subverted these through alternative temporal frameworks

*Nostradamus* Stéphane Gerson,2012-10-30 We all know the name Nostradamus but who was he really Why did his predictions become so influential in Renaissance Europe and then keep resurfacing for nearly five centuries And what does Nostradamus's endurance in the West say about us and our own world In *Nostradamus* How an Obscure Renaissance Astrologer Became the Modern Prophet of Doom historian Stéphane Gerson takes readers on a journey back in time to explore the life and afterlife of Michel de Nostredame the astrologer whose Prophecies have been interpreted adopted by

successive media and eventually transformed into the Gospel of Doom for the modern age Whenever we seem to enter a new era whenever the premises of our worldview are questioned or imperiled Nostradamus offers certainty and solace In 1666 guests at posh English dinner parties discussed his quatrain about the Great Fire of London In 1942 the Jewish writer Ir ne N mirovsky latched her hopes for survival to Nostradamus prediction that the war would soon end And on September 12 2001 teenagers proclaimed on the streets of Brooklyn that this guy Nostradamus had seen the 9 11 attacks coming Through prodigious research in European and American archives Gerson shows that Nostradamus a creature of the modern West rather than a vestige from some antediluvian era tells us more about our past and our present than about our future In chronicling the life of this mystifying figure and the lasting fascination with his predictions Gerson s book becomes a historical biography of a belief the faith that we can know tomorrow and master our anxieties through the powers of an extraordinary but ever more elusive seer
