Thus, this work pays a visit to the classical Kuhnian landscapes but rather proposing interpretations it takes them as the starting point to go further. One hundred years after Kuhn's birth, the editors and authors rekindle the passion and interest that have always surrounded the work of the great Boston philosopher and historian.

Postcolonial Literatures in English Anke Bartels, Lars Eckstein, Nicole Waller, Dirk Wiemann, 2019-04-27. The term postcolonial literatures in English designates English language literatures from Africa, Asia, the Americas, and Oceania, as well as the literatures of diasporic communities who have moved from those regions to the global north. This volume introduces the central themes of postcolonial literary studies and delineates how these themes are reflected and elaborated in exemplary literary works by postcolonial authors from around the world. It also offers succinct definitions of key terms like Orientalism, hybridity, Indigeneity, or writing back.

80 Old Testament Characters of World History: Chronological, Historical and Archaeological Evidence Gerard Gertoux, 2016-02-27. Despite the fact that the name of many characters mentioned in the Old Testament like David, King of Israel, have been recently confirmed by archaeology, as well as their epoch and the events in which they were involved, most archaeologists continue to deny the historicity of the Bible; they view it as pious fiction or a mythical account. They argue that the major events in the Bible, such as the victory of Abraham against Chedorlaomer, an unknown king of Elam, around 2000 BCE; the victory of Moses against an unknown Pharaoh around 1500 BCE; or the victory of Esther, an unknown Persian Queen, against an unknown vizier of Xerxes, never existed because they left absolutely no evidence. They also explain that, according to what we know today, these events could not have occurred. These logical arguments are impressive, but a precise chronological analysis based on absolute dates, coupled with a rigorous historical investigation, shows that all those major events really took place at the dates and places indicated.

*The Palgrave Handbook of Development Economics* Machiko Nissanke, José Antonio Ocampo, 2019-08-12. This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions. Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology, knowledge, and information, its current practice in many parts of the world has led to processes that are socially, economically, and

politically and ecologically unsustainable It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a foundation for sustainable development

Transnationalism and Translation in Modern Chinese, English, French and Japanese Literatures Ryan Johnson, 2020-12-15

The theory of literary worlds has become increasingly important in comparative and world literatures But how are the often contradictory elements of Eastern and Western literatures to cohere in the new worlds such contact creates Drawing on the latest work in philosophical logic and analytic Asian philosophy this monograph proposes a new model of literary worlds that is best suited to comparative literature dealing with Western and East Asian traditions Unlike much discussion of world literature anchored in North American traditions featured here is the transnational work of artists philosophers and poets writing in English French Japanese and Mandarin in the twentieth century Rather than imposing sharp borders this book suggests that vague boundaries link Eastern and Western literary works and traditions and that degrees of distance can better help us to see the multiple dimensions that both distinguish and join together literary worlds East and West As such it enables us to grasp not only how East Asian and Western writers

translate one another's works into their own languages and traditions but also how modern writers East and West modify their own traditions in order to make them fit in the new constellation of literary worlds brought about by the complex flow of literary information across twentieth century Eurasia
