Regeneration Of Coalfield Areas Anglogerman Perspectives:

Regeneration of the Coalfield Areas C. Critcher, Klaus Schubert, David P. Waddington, 1995 The UK government's pit closure programme dramatically highlights the steady decline of heavy industry especially coal and steel during the post war period in many industrial regions of Europe Whilst the political controversy over pit closures may have died down in the UK the problem remains for planners and policy makers of regenerating areas which previously had high levels of employment and strong communities

Re-Constructing the Post-Soviet Industrial Region Adam Swain, 2007-04-11 This book examines the political economy of attempts to restructure the Donbass one of the Soviet Union's most important old economy rustbelt industrial regions It shows how local interest groups have successfully frustrated the central government's and the World Bank's proposed market oriented restructuring and how a manufacturing based regional economy is surviving partially with restructuring postponed

Out of the Ashes? David Waddington, 2001 The long term decline of the British coal industry has had serious and lasting implications for miners their families and communities Out of the Ashes Presents an authoritative review of the history and current state of this process Drawing on their own research in Nottinghamshire and South Yorkshire mining communities the authors chart the impact of pit closures of their threat on community life The viability and working practices of the restructured industry are examined alongside case studies of successful and failed worker take overs The management of decline and attempts to stimulate the local economies affected are compared with very different strategies pursued in Germany Belgium and Spain The book concludes with an examination of the likely future of what remains of the industry and the prospects of the communities it once supported Written in an accessible style Out of the Ashes Will engage all who have a professional or personal interest in the decline of the British coal mining industry as well as academic and students of regional studies sociology psychology and the social sciences in general

Developing Coalfields Communities David Waddington, 2003-12-03 In 1998 following a sobering report by the Coalfields Task Force New Labour unveiled a 350 million package of measures to remedy coalfield deprivation and social exclusion This book examines the impact of this investment in Warsop Vale a village which has starkly emphasised the negative consequences of coalfield decline

Changing Work and Community Identities in European Regions John Kirk, Sylvie Contrepois, Steve Jefferys, 2016-03-09 This book juxtaposes the experiences of regions that have lived or are living through industrial transition in coal mining and manufacturing centres throughout Europe opening the way to a deeper understanding of the intensity of change and of how work helps shape new identities

The British Miner in the Age of De-Industrialization Jörg Arnold, 2024 A book which challenges received understandings of the place of the miner in contemporary British history arguing that the British coal miners went through a cyclical movement from loser to winner and back again as Britain underwent a de industrial revolution in the final decades of the twentieth century

The Global Economy, National States and the Regulation of Labour Paul Edwards, Tony Elger, 2014-06-03 The implications of globalization for labour are more often

asserted than analyzed This collection and its companion volume Globalization and Patterns of Labour Resistance edited by Jeremy Waddington seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour It considers the ways in which national and supra national regimes of labour regulation are being actively reconstructed in the context of the internationalization of production The contributors analyze the implications of changes in different national labour regimes for relations between state capital and labour and for class and gender segmentation and discuss the scope and limits of recent initiatives in the implementation of international labour standards *Ibss: Economics: 1995* Compiled by the British Library of Political and Economic Science at the London School of Economics,1996 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences

Welfare Research Fiona William,Jennie Popay,Ann Oakley,2005-08-12 First published in 1998 This book attempts to contribute a new framework for social research in the welfare field As such it engages with new theories new approaches and new methods alongside a constructive critique of both the old and the new It attempts to illustrate approaches to conceptualization and operationalization within policy relevant research to reflect and explore both new thinking in social theory and in welfare policy as well as to maintain a connection with old concerns Our concern is with welfare research both theory and method broadly defined as the wider landscape of policy and provision captured in the past at least by the notion of the welfare state The new thinking with which the book is primarily concerned involves a shift away from seeing people as the passive beneficiaries of welfare provided through state interventions and professional expertise and from seeing them as fixed single social categories of poor old single parent or as one dimensional objective socio economic classifications

Global Challenges to CSR and Sustainable Development Stephen Vertigans,Samuel O. Idowu,2021-02-24 This book examines and analyzes the challenges programmes for Corporate Social Responsibility CSR and sustainable development are facing in global management practice It looks at the dichotomy of a general and popular demand for responsible and resilient management and the counterplayers that impact the positive effect of such efforts The book assembles latest research looking at the root causes for this opposition and new case studies that showcase the dilemma and possible solutions to overcome it Overall the book juxtaposes short terminism within CSR programmes and longer term sustainable development mis allocation of resources and failed promises associated with CSR and sketches pathways how CSR and sustainable development can be directed towards the most pressing issues **The Natural Wealth of Nations** David
