Russia And The West Environmental Discourses In The European Arctic:

Russia and the West Geir Hønneland, 2003-09-02 Hønneland assesses current environmental discourses and applies this analysis to look at the relations between Russia and the West with regards to environment problems. It includes three in depth case studies on environmental problems: living marine resources, nuclear safety and air pollution. *International Politics in the Arctic* Geir Hønneland, 2017-10-30 As the ice around the Arctic landmass recedes, the territory is becoming a flashpoint in world affairs. New trade routes cutting thousands of miles off journeys are available and the Arctic is thought to be home to enormous gas and oil reserves. The territorial lines are new and hazy. This book looks at how Russia deals with the outside world vis-à-vis the Arctic. Given Russia's recent bold foreign policy interventions, these are crucial issues and the realpolitik practiced by the Russian state is essential for understanding the Arctic's future. Here Geir Hønneland brings together decades of cutting edge research investigating the political contexts and international tensions surrounding Russia's actions. Hønneland looks specifically at region building and environmental politics of fishing and climate change, on nuclear safety and nature preservation and also analyses the diplomatic relations surrounding clashes with Norway and Canada as well as at the governance of the Barents Sea. *The Politics of the Arctic* is a crucial addition to our understanding of contemporary International Relations concerning the Polar North. *Climate Change Discourse in Russia* Marianna Poberezhskaya, Teresa Ashe, 2018-08-06 This book explores the development of climate change discourses in Russia. It contributes to the study of climate change as a cultural idea by developing the extensive Anglophone literature on environmental science, politics and policy pertaining to climate change in the West to consider how Russian discourses of climate change have developed. Drawing on contributors specialising in numerous periods, regions, disciplines and topics of study, the central thread of this book is the shared attempt to understand how environmental issues, particularly climate change, have been understood, investigated and conceptualised in Soviet and post-Soviet Russia. The chapters aim to complement work on the history of the discursive political construction of climate change in the West by examining a highly contrasting but intimately related cultural context. Russia remains one of the world's largest greenhouse gas emitters with one of the most carbon intensive economies. As the world begins to suffer the extreme consequences of anthropogenic climate change, finding adequate solutions to global environmental problems necessitates the participation of all countries. Russia is a central actor in this global process and it therefore becomes increasingly important to understand climate change discourse in this region. Insights gained in this area may also be illuminating for examining environmental discourses in other resource rich regions of the world with alternative economic and political experiences to that of the West, e.g. China, Middle East. This book will be of great interest to students and scholars of Russian environmental policy and politics, climate change discourses, environmental communication and environment and sustainability in general. *Russia as a Great Power* Jakob Hedenskog, Vilhelm Konnander, Bertil Nygren, Ingmar Oldberg, Christer Pursiainen, 2013-07-04 After a period of relative

weakness and isolation during most of the 1990s Russia is again appearing as a major security player in world politics This book provides a comprehensive assessment of Russia's current security situation addressing such questions as What kind of player is Russia in the field of security What is the essence of its security policy What are the sources capabilities and priorities of its security policy What are the prospects for the future One important conclusion to emerge is that while Russian foreign policy under Putin has become more pragmatic and responsive to both problems and opportunities the growing lack of checks and balances in domestic politics makes political integration with the West difficult and gives the president great freedom in applying Russia's growing power abroad

International Relations in the Arctic Leif Christian Jensen, 2015-10-12 As the ice around the Arctic landmass recedes progressively further each year the territory has become a flashpoint in world affairs New and lucrative trade routes from East to West are now becoming accessible for shipping lanes and military deployment and the Arctic is known to be home to large gas and oil reserves Yet the territorial boundaries of the region remain ill defined In response to these geographical changes the Scandinavian countries especially Denmark and Norway have begun staking large proprietary claims in the face of pressure from the major powers Russia Canada the US and China for the trade routes to be designated as International Waters Here Norwegian scholar Leif Christian Jensen shows how Norway has undergone a positional shift after declaring its assertive position on the Arctic in 2005 Its disputes with Russia have created a new foreign policy dilemma and a new set of red lines in Norwegian policy Is Norway as it would like to be seen an environmentally friendly peaceful enlightened nation Or does this geopolitical shift in world affairs necessitate a new and more aggressive Scandinavia
