Helen Gardner,Horst De la Croix,Richard G. Tansey,Diane Kirkpatrick,1991 In this volume we have made every effort to preserve Helen Gardner s freshness of style and above all her sympathetic approach to individual works of art and the styles of which they are a part Preface **Casting the Parthenon Sculptures from the Eighteenth Century to the Digital Age** Emma M. Payne,2021-04-08 Through the 19th century as archaeology started to emerge as a systematic discipline plaster casting became a widely adopted technique newly applied by archaeologists to document and transmit discoveries from their expeditions The Parthenon sculptures were some of the first to be cast In the late 18th century and the first years of the 19th century the French artist Fauvel and Lord Elgin s men conducted campaigns on the Athenian Acropolis Both created casts of parts of the Parthenon sculptures that they did not remove and these were sent back to France and Britain where they were esteemed and displayed alongside other original sections Henceforth casting was established as an essential archaeological tool and grew exponentially over the course of the century Such casts are now not only fascinating historical objects but may also be considered time capsules capturing the details of important ancient works when they were first moulded in centuries past This book examines the role of 19th century casts as an archaeological resource and explores how their materiality and spread impacted the reception of the Parthenon sculptures and other Greek and Roman works

Investigation of their historical context is combined with analysis of new digital models of the Parthenon sculptures and their casts. Sensitive 3D imaging techniques allow investigation of the surface markings of the objects in exceptionally fine detail and enable quantitative comparative studies comparing the originals and the casts. The 19th century casts are found to be even more accurate but also complex than anticipated through careful study of their multiple layers we can retrieve surface information now lost from the originals through weathering and vandalism. The Sculptural in the (Post-)Digital Age Mara-Johanna Kölmel, Ursula Ströbele, 2023-06-19 Digital technologies have profoundly impacted the arts and expanded the field of sculpture since the 1950s. Art history, however, continues to pay little attention to sculptural works that are conceived and materialized using digital technologies. How can we rethink the artistic medium in relation to our technological present and its historical precursors? A number of theoretical approaches discuss the implications of the so-called Aesthetics of the Digital, referring above all to screen-based phenomena. For the first time, this publication brings together international and trans-historical research perspectives to explore how digital technologies reconfigure the understanding of sculpture and the sculptural, leading into the post-digital age. Up-to-date research on digital technologies, expansion of the concept of sculpture, linking historical sculptural debates with discourse on the new media and post-digital culture. **The Art-journal**, 1903 Vol. for
