the NRC conduct these reviews This report presents the results of the second review of the Marine Corps Science and Technology program The first review was conducted in 2000 The 2003 assessment examines the overall Marine Corps S T program the littoral combat future naval capability the core thrusts of the program and basic research activities *The Role of Experimentation in Building Future Naval Forces* National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee for the Role of Experimentation in Building Future Naval Forces, 2005-01-08 The Department of Defense is in the process of transforming the nation's armed forces to meet the military challenges of the 21st century Currently the opportunity exists to carry out experiments at individual and joint service levels to facilitate this transformation Experimentation which involves a spectrum of activities including analyses war games modeling and simulation small focused experiments and large field events among other things provides the means to enhance naval and joint force development To assist the Navy in this effort the Chief of Naval Operations CNO asked the National Research Council NRC to conduct a study to examine the role of experimentation in building future naval forces to operate in the joint environment The NRC formed the Committee for the Role of Experimentation in Building Future Naval Forces to perform the study Sedimentary Basins and Petroleum Geology of the Middle East A.E.M. Nairn, A.S. Alsharhan, 1997-12-11 The wealth of petroleum has made the Middle East one of the most actively explored regions of the world The volume of geological geophysical and geochemical data collected by the petroleum industry in recent decades is enormous The Middle East may be a unique region in the world where the volume of subsurface data and information exceeds that based on surface outcrop This book reviews the tectonic and geological history of the Middle East and the regional hydrocarbon potential on a country by country basis in the context of current ideas developed through seismic and sequence stratigraphy and incorporating the ideas of global sea level change Subsurface data have been used as much as possible to amplify the descriptions The paleogeographic approach provides a means to view the area as a whole While the country by country approach inevitably leads to some repetition it enhances the value of the volume as a teaching tool and underlines some of the changing lithologies within formations carrying the same name Department of Defense Appropriations United States.
