Sea Battle And The Master Argument:

The Sea Battle and the Master Argument Richard Gaskin, 2011-05-02 No detailed description available for The Sea Battle and the Master Argument *The Sea Battle and the Master Argument* Richard Gaskin, 1995 The series founded in 1970 publishes works which either combine studies in the history of philosophy with a systematic approach or bring together systematic studies with reconstructions from the history of philosophy Monographs are published in English as well as in German The founding editors are Erhard Scheibe editor until 1991 G nther Patzig until 1999 and Wolfgang Wieland until 2003 From 1990 to 2007 the series had been co edited by J rgen Mittelstra **On the Sea Battle Tomorrow that May**

Not Happen Tomasz Jarmużek, 2018 The book examines the Master Argument MA of Diodorus Cronus in the context of the Sea Battle Tomorrow of Aristotle The author investigates problems of sentences about the future time and determinism He shows that certain reconstructions of the MA do not assume a linear time structure Thus the MA is not an argument in favour of determinism **Ammonius and the Seabattle** Gerhard Seel, 2013-05-08 No detailed description available for Ammonius and the Seabattle

The Stoics on Determinism and Compatibilism Ricardo Salles, 2017-03-02 The Stoics on Determinism and Compatibilism is an important book which reconstructs the arguments deployed by the Stoics in favour of the view that everything is necessary and examines the development of the different arguments given by the Stoics that this is compatible with moral responsibility and desert The book carefully distinguishes two separate theses in Stoic theory that everything that happens and is the case has a cause and that causation is necessitating The book also provides a new reconstruction of Stoic compatibilism distinguishing four different compatibilist theories Salles has written a book which is non technical in it s approach and which assesses the Stoic positions on determinism compatibilism freedom and responsibility in the light of the modern debate on this issue Covering not just the ancient debates and thinkers such as Epictetus and Chrysippus but also examining the compatibilist views of the major modern theorist Harry Frankfurt finding indications of his main intuitions already present in the Stoic arguments and tackling the positions of Suzanne Bobzien

The Philosophy of the Commentators, 200-600 AD: Physics Richard Sorabji, 2005 Physics in Neoplatonist thought the subject which occupies the second volume of this sourcebook was innovative the world of space and time was causally ordered by a nonspatial nontemporal world and this view required original thinking **Ammonius: On Aristotle On Interpretation 9 with Boethius: On Aristotle On Interpretation 9** David L. Blank, Norman Kretzmann, 2014-04-10 This book is about determinism It contains the two most important commentaries on the determinists sea battle argument and on other deterministic arguments besides It includes the earliest full exposition of the Reaper argument for determinism and a discussion of whether there can be changeless knowledge of the passage of time It also contains the two fullest expositions of the idea that it is not truth but only definite truth that would imply determinism Ammonius and Boethius both wrote commentaries on Aristotle s On Interpretation and on its ninth chapter where Aristotle discusses the sea battle Their

comments are crucial for Ammonius commentary influenced the Islamic the Islamic Middle Ages while that of Boethius was of equal importance to medieval Latin speaking philosophers It was once argued that Boethius was influenced by Ammonius but these translations are published together in this volume to enable the reader to see clearly that this was not the case Ammonius draws on the fourth and fifth century Neoplatonists Iamblichus Syrianus and Proclus He arranges his argument around three major deterministic arguments and is our main source for one of them the Reaper argument which has hitherto received insufficient attention Boethius on the other hand draws on controversies from 300 years earlier between Stoics and Aristotelians as recorded by Alexander of Aphrodisias and Porphyry This volume is essential reading for all those with an interest in the history of determinism Ammonius commentary on the first eight chapters of Aristotle's *On Interpretation* has appeared in a previously published volume in this series translated by David Blank

Mediaeval and Renaissance Logic Dov M. Gabbay, John Woods, 2008-03-14 Starting at the very beginning with Aristotle's founding contributions logic has been graced by several periods in which the subject has flourished attaining standards of rigour and conceptual sophistication underpinning a large and deserved reputation as a leading expression of human intellectual effort It is widely recognized that the period from the mid 19th century until the three quarter mark of the century just past marked one of these golden ages a period of explosive creativity and transforming insights It has been said that ignorance of our history is a kind of amnesia concerning which it is wise to note that amnesia is an illness It would be a matter for regret if we lost contact with another of logic's golden ages one that greatly exceeds in reach that enjoyed by mathematical symbolic logic This is the period between the 11th and 16th centuries loosely conceived of as the Middle Ages The logic of this period does not have the expressive virtues afforded by the symbolic resources of uninterpreted calculi but mediaeval logic rivals in range originality and intellectual robustness a good deal of the modern record The range of logic in this period is striking extending from investigation of quantifiers and logic consequence to inquiries into logical truth from theories of reference to accounts of identity from work on the modalities to the stirrings of the logic of relations from theories of meaning to analyses of the paradoxes and more While the scope of mediaeval logic is impressive of greater importance is that nearly all of it can be read by the modern logician with at least some prospect of profit The last thing that mediaeval logic is is a museum piece Mediaeval and Renaissance Logic is an indispensable research tool for anyone interested in the development of logic including researchers graduate and senior undergraduate students in logic history of logic mathematics history of mathematics computer science and AI linguistics cognitive science argumentation theory philosophy and the history of ideas Provides detailed and comprehensive chapters covering the entire range of modal logic Contains the latest scholarly discoveries and interpretative insights that answer many questions in the field of logic

A Companion to Philosophical Logic Dale Jacquette, 2008-04-15 This collection of newly commissioned essays by international contributors offers a representative overview of the most important developments in contemporary philosophical logic Presents controversies in

philosophical implications and applications of formal symbolic logic Surveys major trends and offers original insights

Immovable Truth: Divine Knowledge and the Bible at the University of Vienna (1384-1419) Edit Anna Lukács, 2023-10-30 In the 14th century hypotheses about a lying God deceived Christ and the changeability of the past circulated At the new University of Vienna three German masters attempted in their lectures on the Old Testament to counter them Their commentaries are the longest the most influential and perhaps even the most inspiring commentaries on the Bible written at Vienna This book offers a glimpse into their most unusual ideas apocalyptic expectations heretics toads and devils assessments of Amalric of Bena Moshe Taku and Petrarch and last but not least the search for an immovable truth that fills their pages
