China, the United States, and 21st-Century Sea Power

Andrew S. Erickson, Lyle J Goldstein, Nan Li, 2010-12-01 China's reaction to the United States new maritime strategy will significantly impact its success according to three Naval War College professors Based on the premise that preventing wars is as important as winning wars this new U S strategy they explain embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with other nations The authors contend that despite recent turbulence in U S China military relations substantial shared interests could enable extensive U S China maritime security cooperation as they attempt to reach an understanding of competitive coexistence But for professionals to structure cooperation they warn Washington and Beijing must create sufficient political and institutional space

Summary of Andrew Lambert's Seapower States Milkyway Media,2024-05-20 Get the Summary of Andrew Lambert's Seapower States in 20 minutes Please note This is a summary not the original book Seapower States explores the historical development and strategic significance of maritime powers in the context of global politics and commerce The book traces the origins of seapower to ancient coastal communities that relied on the sea for trade leading to the creation of inclusive governments and naval forces to protect economic interests Maritime societies like Athens and Carthage prioritized exploration and commerce over territorial conquest contrasting with land empires **Architects of Continental Seapower** Jeremy Stocker,2020-10-01 This book describes and analyses two iconic figures in twentieth century naval history the German Admiral Alfred von Tirpitz and the Russian Admiral Sergei Gorshkov It examines the men what they thought and wrote about seapower the fleets they created and the strategic consequences of what they did More broadly it draws on the respective histories of the post 1897 Imperial German Navy and the post 1956 Soviet Navy to examine the continental bid for large scale seapower The work argues that both individuals built navies that did not and could not fulfil the objectives for which they were created Drawing on the legacies of both men the book also develops some wider ideas about the creation of large navies by continental states with cautionary lessons for today's emerging powers India and China Both admirals have received book length biographies but this is the first attempt at a comparative study and the first to draw broader strategic lessons from their respective attempts as continental navalists to challenge maritime states This book will be of much interest to students of naval history strategic studies and International Relations **Seapower** Geoffrey Till,1994 This volume explains the evolution of maritime strategy through the twentieth century and concludes with some speculations about its future in the next century The forms and practices of navies and maritime strategy are analysed through the development of eight historical and contemporary topics drawn from the First and Second World Wars the Cold War and post Cold War period **Ottoman Seapower and Levantine Diplomacy in the Age of Discovery** Palmira Johnson Brummett,1994-01-01 This work reframes sixteenth century history incorporating the Ottoman empire more thoroughly into European Asian and world history It analyzes the Ottoman Empire's expansion eastward in the contexts of claims to universal sovereignty Levantine power politics and the struggle for control of the oriental trade Challenging the notion that the sixteenth century Ottoman Empire was merely a reactive economic entity driven by the impulse to territorial conquest Brummett portrays it as inheritor of Euro Asian trading networks and participant in the contest for commercial hegemony from Genoa and Venice to the Indian Ocean Brummett shows that the development of seapower was crucial to this endeavor enabling the Ottomans to subordinate both Venice and the Mamluk kingdom to dependency relationships and providing the Ottoman ruling class access to commercial investment and wealth **United States Naval Institute Proceedings** United States Naval Institute,1897 **Sea Power of the State** Sergei Georgievich Gorshkov,1976 **Twenty-First Century Seapower** Peter Dutton,Robert Ross,Øystein Tunsjø,2013-05-02 This book offers an assessment of the naval policies of

emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general *Sea Power and the Asia-Pacific* Geoffrey Till, Patrick Bratton, 2012-02-07 This volume examines the rise and fall of sea powers in the Asia Pacific region *China as a Sea Power, 1127-1368* Lo Jung-pang, 2012-01-01 Lo Jung pang argues that during each of the three periods when imperial China embarked on maritime enterprises the Qin and Han dynasties the Sui and early Tang dynasties and Song Yuan and early Ming dynasties coastal states took the initiative at a time when China was divided maritime trade and exploration subsequently peaked when China was strong and unified and declined as Chinese power weakened At such times China's people became absorbed by internal affairs and state policy focused on threats from the north and the west These cycles of maritime activity each lasting roughly five hundred years corresponded with cycles of cohesion and division strength and weakness prosperity and impoverishment expansion and contraction In the early 21st century a strong and outward looking China is again building up its navy and seeking maritime dominance with important implications for trade diplomacy and naval affairs Events will not necessarily follow the same course as in the past but Lo Jung pang's analysis suggests useful questions for the study of events as they unfold and decades to come **War and State Making** Karen A. Rasler, William R. Thompson, 2021-03-30 Originally published in 1989 this is an empirical study of the impact of global war on the expansion and shaping of nation states Individual chapters examine the effects of such wars and the preparation for them on debt financing expansion military spending welfare spending GNP and domestic violence The authors conclude that by virtue of the changes they spurn global wars are inherently accelerators of social change *A Century of Air Power Leadership* Jacob Neufeld, 2007 **Seapower in Global Politics, 1494-1993** George Modelski, William R. Thompson, 1988-06-18 **How to Grow a Navy** Geoffrey Till, 2022-09-02 This book examines the large but neglected topic of the development of maritime power from both an historical and a contemporary point of view Navies have never been more important than they are now in a century becoming as widely expected increasingly and profoundly maritime The growing competition between China and Russia with the United States and its allies and partners around the world is essentially sea based The sea is also central to the world's globalised trading system and to its environmental health Most current crises are either sea based or have a critical maritime element to them What happens at

sea will help shape our future Against that background this book uses both history and contemporary events to analyse how maritime power and naval strength has been and is being developed In a reader friendly way it seeks to show what has worked and what has not and to uncover the recurring patterns in maritime and naval development which explain past present and future success and failure It reflects on the historical experience of all navies but in particular it poses the question of whether China is following the same pattern of naval development illustrated by Britain at the start of the 18th century which led to two centuries of naval dominance This book will be of much interest to students of maritime power naval studies and strategic studies as well as to naval professionals around the world

States Versus Markets Herman Mark Schwartz, 2018-11-28 Now in its fourth edition this highly regarded and critically acclaimed textbook offers an authoritative introduction to international political economy It is unique in offering an accessible broad introduction to the development of the global economy from its inception to today's complex relationship between states and markets in the midst of economic crises Herman Mark Schwartz deftly shows that globalization is not a novel phenomenon but a recurrent process whereby markets have since the 16th century periodically redistributed economic activity It links the production of goods and services in one region to the markets for those goods and shows how this can lead to conflicts among states that try to create enhance or subdue the markets Taking into account the continued rise of China and the recent shift towards populism in the West this book has been extensively rewritten and updated throughout This is a thought provoking text which will encourage upper level undergraduate and postgraduate students to think analytically about the inevitability of a global market influencing a state's policies and geo economic position and to locate their own thinking within the IPE tradition New to this Edition Thoroughly updated to cover all major developments in global political economy since the financial crisis Timelines in most chapters show key events in the evolution of the global economy Offers a particularly clear account now with chapter summaries updated examples and a glossary of key terms

The Equality of States in International Law Edwin DeWitt Dickinson, 1920 No detailed description available for The Equality of the States in International Law

The Historical Review of Sparta (2022) Giorgio Piras, Rita Sassu, 2022-09-01 The volume jointly promoted by the Department of Classics of Sapienza University and the Institute of Sparta intends to explore the multifaceted system of connections and interactions among ancient poleis by focusing on Sparta which acts as an exemplary case study to understand the complex relations among Greek cities in the classical Hellenic world The latter is indeed composed by an extended range of settlements based on specific jurisdictions sets of laws and ethical principles that are nevertheless connected by a common shared culture The publication includes the Proceedings of the International Conference International relations in Antiquity the case of Sparta held in Sparta in 2021 and further papers dealing with the ancient Laconian polis The book aims to critically analyse the Spartan international network through an open and constructive methodology deprived of pre arranged interpretative models Moreover it means to bring together scholars from different backgrounds and a variety of scientific disciplines such

as philology epigraphy history archaeology international relations to foster a fruitful cross sectorial dialogue aimed at enabling a comprehensive understanding of ancient Hellas *Continental Powers and Naval Development* Brian C. Chao, 2025-10-16 This book examines how continental great powers have attempted to develop and wield strong navies since 1801 Continental Powers and Naval Development argues that a continental great power's ability to build and effectively use a strong navy is greatly affected by two factors a naval force design capable of executing national strategy strategy coherence and the deployment of that navy to places or for purposes that minimize the dominant naval power's threat perception threat diffusion Each factor is deceptively difficult for a continental great power to achieve but through an analysis of four historical case studies this book shows how both factors are vital not just for successful naval development but for keeping the peace among great powers Finally it highlights how states commonly thought of as unnatural naval powers can nonetheless achieve their political objectives at sea This book will be of much interest to students of naval history maritime strategy and International Relations
