Sonu,2003 Sea urchins are harvested worldwide the majority destined for the Japanese market Japan is by far the world s largest importer and consumer of sea urchin roe In 2002 Japan imported about 18 525 metric tons mt of live sea urchins and sea urchin roe

valued at about 247 million dollars an increase of more than ten fold in volume and 12 fold in value from 1975 Much of this increase was due to good demand decreased domestic harvest and consequent rise in price for sea urchin roe Fresh sea urchin roe was the dominant product imported into Japan representing as much as 49 percent in value in 2002 The United States has become the largest supplier of fresh roe to Japan providing over 45 percent in value and 39 percent in volume of the total Differences in peak fishing seasons in Japan spring through summer and the United States fall through spring have benefitted U S exporters in marketing sea urchin roe to Japan Japan was the world s largest harvester of sea urchins until 1984 Since 1987 Japanese harvests have declined steadily due mainly to declining stock abundance The harvest in 2002 of 13 000 mt was less than half of the record high landings which occurred in 1969 From 1987 to 2001 landings in the United States have exceeded Japanese landings In 2001 sea urchins were harvested in six states Alaska 1 166 mt Washington 344 mt Oregon 571 mt California 5 951 mt Maine 4 491 mt and Rhode Island 0 1 mt Most fresh sea urchin roe are sold through auction at the Tokyo Central Wholesale Market Although quality of roe is the most important factor in determining prices total supply domestic and imported roe is also significant In 2002 the highest price for imported roe occurred in January High prices for Japanese roe occurred in January and September reflecting the low availability of roe during these months Japan regulates imports of sea urchin products with import tariffs As the United States and Japan are signatories to the World Trade Organization WTO WTO tariffs apply to U S exports of sea urchin products 7 percent for fresh frozen or salted sea urchin roe and 10 percent for prepared or preserved products including those in airtight containers There is no tariff for live sea urchins Tariff rates are calculated as a percentage of total cost including insurance and freight Sea urchin roe shipped from Los Angeles is considered to be the best in Japan s import market The future market for sales of U S sea urchins to Japan depends to a large extent on Japanese sea urchin harvest Because domestic harvest is not likely to increase in the short term increased export of U S sea urchins and sea urchin roe has significant potential

Executive summary The Sea Urchin Embryo G. Giudice, 2012-12-06 This book should be regarded as the continuation to my previous book Developmental Biology of the Sea Urchin Embryo edited by the Academic Press in 1973 rather than as a new edition Due to the exceedingly high rate of development in this field something like 2000 papers have been published on this subject in these last 10 years I preferred in fact not to describe again in detail the enormous amount of the old literature as was attempted in my previous book but to briefly summarize the state of the art in each problem and to describe in some detail the experiments performed in the last 12 years In doing so more emphasis was given to the more recent ones and to those which can be considered as corner stones in each subject Care was however taken to mention the reviews or key papers in which the reader can find a source of the details of the older literature besides referring him to my previous book **The Sea Urchin** Paul de Bijl, 2002-06-01 This volume deals with various aspects of the biology and aquaculture of the sea urchin
