Susan O. White, 2013-11-11 When approached by Plenum to put together a volume of social science research on the topic of youth and justice I found the interdisciplinary challenge of such a project intriguing Having spent 2 years as Director of the Law and Social Science Program at the National Science Foundation I was well aware of the rich diversity of research that could fit within that topic I also knew that excellent research on youth and justice was coming from different communities of researchers who often were isolated from each other in their respective disciplines as psychologists sociologists criminologists or policy analysts I saw this project as an opportunity to break down some of this isolation by introducing these researchers and their work to each other and to the broader community of social scientists interested in law and justice There was another gap or set of gaps to be bridged as well The juvenile justice system and the criminal justice system differ in significant ways and the civil justice system which is a major venue for issues of youth and justice is yet another separate world Few researchers are likely to know the whole picture For example a focus on juvenile justice often ignores the extent to which civil justice proceedings shape the lives of young people through divorce custody adoption family preservation policies and other actions and vice versa Goals, Goal Structures, and Patterns of Adaptive Learning Carol

Psychosocial Disturbances in Young People Michael Rutter, 1995 The book considers what is special about adolescence and what is known about the risk factors for psychosocial problems in this age period Transitions Through Adolescence Julia A. Graber, Jeanne Brooks-Gunn, Anne C. Petersen, 2018-10-24 The adolescent period has attracted much

attention as an ideal period for investigating interactive models incorporating biological maturation with intra and interpersonal development The focus of this volume is on adolescent transitions in three domains the peer system the family system and school and work contexts Its goal is to highlight specific aspects of innovative research programs and initiatives and look forward to future directions in the field Because interest in adolescence has spanned the disciplines this volume reflects a multidisciplinary perspective presenting research and methods from life span development sociology anthropology and education to provide exemplars of the range of approaches used in understanding the processes and transitions of adolescent development These exemplars encompass the breadth not only of the investigation of adolescence from survey research on drug use to ethnographic studies of involvement in criminal activities but also of individual differences in the experience of adolescent transitions from the transition to college and work in White middle class youth to the work experiences of urban African American high school students The chapters collected here offer a rich sample of the diversity of research experience with an emphasis on in depth investigation of adolescent transitions The volume will serve as a resource to investigators across several disciplines as it identifies approaches and recent findings from alternate fields

Divided We Fall Bryce J. Christensen, 2017-09-20 In the weeks that followed the horror of September 11 politicians of both major parties resolutely asserted America's national unity Barely four years later the illusions of the rhetoric of unity have given way to the divisive oversimplifications of Red vs Blue electoral cartography Divided We Fall Family Discord and the Fracturing of America offers a more nuanced yet more disturbing picture of American disunity a disunity both social and political both public and personal Deeper than the disagreements that separate voter from voter this disunity increasingly separates man from woman husband from wife parent from child grandparent from grandchild and sibling from sibling Though the national turmoil in family life has unquestionably opened new divides in political life on the questions of abortion and gay marriage for instance this analysis explores the bewildering cross cutting tensions surrounding these fissures The search for ways to bridge such fissures takes on particular urgency because of the mounting costs of family disintegration social and legal cultural and psychological Because they recognize the often desperate plight of single mothers and their children policymakers have often worked together in bipartisan fashion to intensify government efforts to collect child support from non custodial fathers to place abused children in foster care and to provide shelter for the family fragments on the street But these pragmatic government responses to pressing social needs are no substitute for deeper probing into the cultural causes of these needs Indeed as the author probes those causes including the erosion of the home economy of restraints on sexual conduct and of the traditional family wage he warns that continued reliance on government to compensate for family failure will make matters worse in the long run While family failure puts ever more burdens on government this investigation shows how such failure withers the selfless civic impulses that sustain any healthy government
