Sanctions and the Search for Security David Cortright, George A. Lopez, Linda Gerber, International Peace Academy, 2002 Cortright and Lopez both of the Kroc Institute for International Peace Studies U of Notre Dame follow up on their earlier work *The Sanctions Decade* by examining some of the UN changes in sanctions design since 1999 and suggesting that still further changes need to be carried out Noting that it has now become evident that the full scale strangulation of a national economy fails to produce political compliance Recent sanctions against the Taliban in Afghanistan and the Taylor government in Liberia are seen as a laudable refinement but a move from seeing sanctions as solely a punishment towards seeing them as also a form of persuasion is recommended Annotation copyrighted by Book News Inc Portland OR **Transnational Crime and Global Security** Philip L. Reichel, Ryan Randa, 2018-01-12 This two volume work offers a comprehensive examination of the distressing topics of transnational crime and the implications for global security National security is a key concern for individual nations regions and the global community yet globalism has led to the perfusion of transnational crime such that it now poses a serious threat to the national security of governments around the world Whether attention is concentrated on a particular type of transnational crime or on broader concerns of transnational crime generally the security issues related to preventing and combatting transnational crime remain of top priority concern for many governments *Transnational Crime and Global Security* has been carefully curated to provide students scholars professionals and consultants of criminal justice and security studies with comprehensive information about and in depth analysis of contemporary issues in transnational crime and global security The first volume covers such core topics as cybercrime human trafficking and money laundering and also contains infrequently covered but nevertheless important topics including environmental crime the weaponization of infectious diseases and outlaw motorcycle gangs The second volume is unique in its coverage of security issues related to such topics as the return of foreign terrorist fighters using big data to reinforce security and how to focus efforts that encourage security cooperation **Global Security, Safety and Sustainability: Tomorrow's Challenges of Cyber Security** Hamid Jahankhani, Alex Carlile, Babak Akhgar, Amie Taal, Ali G. America's Search for Security Sean Kay, 2014-07-22 This book details the ways in which America's ascendancy to global superpower status was the result of its dueling foreign policy philosophies and forces an historically expansive idealism balanced with an equally constant realist restraint In *America's Search for Security* Sean Kay surveys major historical trends in American foreign policy and provides a new context for thinking about America's rise to power from the founding period through the end of the Cold War It details the post Cold War rise of idealist foreign policy goals and the costs of abandoning realist roots analyzing in depth the wars in Iraq and Afghanistan as examples of what disappointing if not disastrous outcomes can befall America abroad when foreign policy objectives are muddled unclear and fail to remain grounded in what historically has made America an unquestionable world power This book also focuses on America's recent pivot to Asia and efforts to restore a realist balance abroad and at home in the second Obama administration concluding with a look at what the future of American power will look like in a rapidly evolving world in need of newer more modernized and adaptable forms of leadership Tracing the tension between idealism and realism Kay provides a detailed explanation of the rise of a post Cold War idealist consensus in Washington D C and shows how that culminated in a return to realism in both the 2013 debates over intervention in Syria and the 2014 crisis with Russia
