Aging in America Lawrence R. Samuel, 2017-01-31 Aging is a preoccupation shared by beauty bloggers serious journalists scientists doctors celebrities arguably all of adult America given the pervasiveness of the crusade against it in popular culture and the media We take our youth oriented culture as a given but as Lawrence R Samuel argues this was not always the case Old age was revered in early America in part because it was so rare Indeed it was not until the 1960s according to Samuel that the story of aging in America became the one we are most familiar with today aging is a disease that science will one day cure and in the meantime signs of aging should be prevented masked and treated as a source of shame By tracing the story of aging in the United States over the course of the last half century Samuel vividly demonstrates the ways in which getting

older tangibly contradicts the prevailing social values and attitudes of our youth obsessed culture As a result tens of millions of adults approaching their sixties and seventies in this decade do not know how to age as they were never prepared to do so Despite recent trends that suggest a more positive outlook getting old is still viewed in terms of physical and cognitive decline resulting in discrimination in the workplace and marginalization in social life Samuels concludes Aging in America by exhorting his fellow baby boomers to use their economic clout and sheer numbers to change the narrative of aging in America **Geriatric Medicine Today**, 1990 *Situation Awareness Analysis and Measurement* Mica R. Riordan, Stephanie Taylor Davis, 1996 **Live Long, Die Short** Roger Landry, 2014-01-14 Over a decade ago a landmark ten year study by the MacArthur Foundation shattered the stereotypes of aging as a process of slow genetically determined decline Researchers found that that 70 percent of physical aging and about 50 percent of mental aging is determined by lifestyle the choices we make every day That means that if we optimize our lifestyles we can live longer and die shorter compress the decline period into the very end of a fulfilling active old age Dr Roger Landry and his colleagues have spent years bringing the MacArthur Study s findings to life with a program called Masterpiece Living In Live Long Die Short Landry shares the incredible story of that program and lays out a path for anyone at any point in life who wants to achieve authentic health and empower themselves to age in a better way Writing in a friendly conversational tone Dr Landry encourages you to take a Lifestyle Inventory to assess where your health stands now and then leads you through his Ten Tips for successful aging each of which is backed by the latest research real life stories
