Hannah,Marion J. Ball,Margaret J.A. Edwards,2013-04-17 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons It does not attempt to compete with the primers already on the market Eminent international experts will edit author or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field Each book will be practical easy to use and well referenced Our aim is for the series to encompass all of the health professions by focusing on specific professions such as nursing in individual volumes However integrated computing systems are only one tool for improving communication among members of the health care team Therefore it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship Our joint values put people first If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients then our efforts will have succeeded The History of Medical Informatics in the United States Morris F. Collen,Marion J. Ball,2015-10-08 This is a meticulously detailed chronological record of significant events in the history of medical informatics and their impact on direct patient care and clinical research offering a representative sampling of published contributions to the field The History of Medical Informatics in the United States has been restructured within this new edition reflecting the transformation medical informatics has undergone in the years since 1990 The systems that were once exclusively institutionally driven hospital multihospital and outpatient information systems are today joined by systems that are driven by clinical subspecialties nursing pathology clinical laboratory pharmacy imaging and more At the core is the person not the clinician not the institution whose health all these systems are designed to serve A group of world renowned

authors have joined forces with Dr Marion Ball to bring Dr Collen's incredible work to press. These recognized leaders in medical informatics, many of whom are recipients of the Morris F Collen Award in Medical Informatics and were friends of or mentored by Dr Collen, carefully reviewed, edited, and updated his draft chapters. This has resulted in the most thorough history of the subject imaginable and also provides readers with a roadmap for the subject well into later in the century.

The Nursing Informatics Implementation Guide Eleanor Callahan Hunt, Sara Breckenridge Sproat, Rebecca Rutherford Kitzmiller, 2013-03-09 Health institutions are investing in and fielding information technology solutions at an unprecedented pace. With the recommendations from the Institute of Medicine around information technology solutions for patient safety mandates from industry groups such as Leapfrog about using information systems to improve health care and the move toward evidence-based practice, health institutions cannot afford to retain manual practices. The installation of multi-million-dollar computerized health systems represents the very lifeblood of contemporary clinical operations and a crucial link to the financial viability of institutions. Yet the implementation of health information systems is exceptionally complex, expensive, and often just plain messy. The need for improvement in the art and science of systems implementation is clear up to 70-80% of information technology installations fail. The reasons are multifaceted, ranging from the complexity of the diverse workflows being computerized, the intricate nature of health organizations, the knowledge and skills of users, to other reasons such as strategies for obtaining key executive support, weaving through the politics peculiar to the institution, and technical facets including the usability of systems. Thus the art and science of successfully implementing systems remains deeply layered in elusiveness. Still, given the pervasiveness of system implementations and the importance of the outcomes, this is a critical topic, especially for nurses and informatics nurse specialists.

Leadership and Nursing John Daly, Sandra Speedy, Debra Jackson, 2014-11-01 Leadership is fundamental to the nature of nursing to ensure the development of safe practice, interdisciplinary relationships, education, research, and ultimately the delivery of quality healthcare. Leadership and Nursing: Contemporary Perspectives 2e presents a global perspective of leadership issues within the Australian context. It builds on the premise that nursing leadership is for all nurses, not just those who are authorized to hold a position within an organization. In addition, this book explores how leadership is not possible until one has an understanding of self and what motivates others. The text is aimed at senior undergraduate and postgraduate nursing students making the transition to practice, as well as professional nurses seeking to strengthen their clinical practice and governance. Nine entirely new chapters exploring the most up-to-date leadership issues and themes, including Leadership and its influence on patient outcomes, Leadership: Developing and sustaining self, Indigenous leadership in nursing, speaking life into each other's spirits, Leadership and empowerment in nursing, Leadership in the era of Interprofessional education in healthcare, Leading development of health policy, Leadership and the role of Professional Organisations, Leading nursing in the Academy, Avoiding derailment, Leadership strategies for identity, reputation, and legacy management.
