Psychosocial Palliative Care William S. Breitbart MD, Yesne Alici, 2014-03-25 One of the most challenging roles of the psycho oncologist is to help guide terminally ill patients through the physical psychological and spiritual aspects of the dying process Patients with cancer AIDS and other life threatening illnesses are at increased risk for the development of major psychiatric complications and have an enormous burden of both physical and psychological symptoms Concepts of adequate palliative care must be expanded beyond the current focus on pain and physical symptom control to include the psychiatric psychosocial existential and spiritual aspects of care The psycho oncologist as a consultant to or member of a palliative care team has a unique role and opportunity to fulfill this promise of competent and compassionate palliative care for those with life threatening illnesses Psychosocial Palliative Care guides the psycho oncologist through the most salient aspects of effective psychiatric care of patients with advanced illnesses This handbook reviews basic concepts and definitions of palliative care and the experience of dying the assessment and management of major psychiatric complications of life threatening illness including psychopharmacologic and psychotherapeutic approaches and covers issues such as bereavement spirituality cultural sensitivity communication and psychiatric contributions to common physical symptom control A global perspective on death and palliative care is taken throughout the text and an Appendix provides a comprehensive list of international palliative care resources and training programs

Palliative Nursing Elaine Stevens, Susan Jackson, Stuart Milligan, 2009-11-16 Palliative Nursing is an evidence based practical guide for nurses working in areas of practice where general palliative care is provided This may be in hospitals nursing homes dementia units the community and any other clinical areas which are not classified as specialist palliative care

This book first explores the history and ethos of palliative care and then looks at palliative nursing across various care settings. It then looks at palliative nursing care for people with specific illnesses including heart failure, dementia, chronic obstructive pulmonary disease, cancer, and neurological conditions. Palliative care for children and young people is discussed, and then the book finally looks at education and research in palliative nursing. Palliative Nursing will be essential reading for all nurses working with palliative care patients in a non-specialist role, i.e. in hospitals, primary care, and nursing homes, as well as nursing students. **SPECIAL FEATURES** Explores the palliative nursing issues related to specific diseases and groups. Written in the context of the new national tools, i.e. the end of life initiative, preferred place of care, Liverpool care pathway, and Gold standards framework. Each chapter includes practice points and cases to allow the practitioner to undertake guided reflection to improve practice. Written by nurses for nurses. Provides guidance for nurses working in all four countries of the UK.

Principles And Practice Of Managing Pain: A Guide For Nurses And Allied Health Professionals Parsons, Gareth, Preece, Wayne, 2010-10-01 Pain management is a popular topic for nursing students and one that is covered primarily during years 2 and 3 of UK pre-registration nursing courses. An understanding of the mechanics of pain, how pain affects individuals, and how pain can be treated is absolutely core to nursing study and practice, and nurses need to be able to identify, assess, and treat pain responsibly and as part of their broader care for patients. The emphasis of the book will not be on facts, physiology, or pharmacology, but instead the book will draw on these things to help students develop a solid philosophy of care that encompasses good pain management. *Cancer Nursing* Connie Yarbrow, Debra Wujcik, Barbara Holmes Gobel, 2011 A new and revised version of this best-selling reference. For over eighteen years, best-selling *Cancer Nursing: Principles and Practice* has provided oncology nurses with the latest information on new trends in the rapidly changing science of oncology. Now in its Seventh Edition, *Cancer Nursing* has been completely revised and updated to reflect key new developments. New topics covered include targeted therapy, hypersensitivity reactions, mucositis, and family and caregiver issues. With 27 new chapters featuring insights from key authors, the Seventh Edition is a must-have resource for every oncology nurse. Cicely Saunders and Total Pain Joe Wood, 2024-11-30 Introduced in 1964, Cicely Saunders' term 'total pain' has come to epitomise the holistic ethos of hospice and palliative care. It communicates how a dying person's pain can be a whole, overwhelming experience, not only physical but also psychological, social, and spiritual. 'Total pain' clearly summarises Saunders' whole-person, multidisciplinary outlook, but is it a phenomenon, an intervention framework, a care approach, or something else? This book disregards the idea that Saunders' phrase has one coherent meaning and instead explores the multiple interpretations now current in contemporary professional discourse. Using close reading of Saunders' extensive publications, as well as archival evidence and Saunders' own personal library, it situates the current usage of 'total pain' in wider histories of clinical holism, questions its similarity to later ideas of narrative medicine, and explores how it might express the ambiguities of bearing witness to pain and vulnerability when someone is dying.
