Bryant,2009-07-21 Over his eighty plus years Paul T Bryant has worked as a farm and ranch hand soldier forest fire lookout park ranger naturalist editor teacher and academic administrator He has lived and worked in a variety of states from

Washington to North Carolina and from Texas to Massachusetts filling in those spans with time in Oklahoma Colorado Idaho Iowa Illinois and Virginia He brings this range of experience to this series of short stories and sketches of various old men their lives their problems and how they have met those problems These are fiction but they draw on actual experience Old age is a challenging time for old men and old women alike As more and more of us reach this challenging time we can profit from learning how others have met those challenges or failed to do so By the same token perhaps those who have not yet reached old age will find here some increased understanding for those who have Other books by Bryant H L Davis 1978 Confessions of an Habitual Administrator 2005 Book Review An eclectic collection of short fiction and poetry explores the challenges faced by men as they age The author now in his 80s begins with a prologue reminding readers that old age is neither a crime nor a sin but merely another stage of life with challenges and potential triumphs Reflecting on the fact that more and more people are living to advanced ages Bryant offers his work as a report on the road conditions from one who has traveled it to those coming up behind him Although his book has an explicitly didactic purpose this does not mean that the authors stories and poems are in any way moralizing nor do they offer easy solutions to the problems of old age such as aimlessness solitude pain or the possibility of an afterlife However its true that Bryants intention are not purely literary Although told with unusual stylistic concision and vigor only rarely marred by clichéd expressions such as references to wind sighing through the pine needles on a mountain slope or a spirited game of touch football these fictions do not aspire to aesthetic independence but rather aim at maximum clarity in representing common experiences In the process they reveal the authors deeply humane insight into a wide variety of human types ranging from retired businessmen to minor poets and academics to American Indians before the arrival of European settlers Although incidental to his main aims Bryants use of the variety of American geography and history also showcases his deep knowledge of these subjects thus providing another opportunity for readers to learn from this book What one storys narrator says about an old farmhand could equally be applied to the author of this collection We should treasure people like Stuart Wellborn people who know and love the land and who can tell its story Crisp quietly learned storytelling offers subtle insights into the experience of aging Kirkus Discoveries

The Takeover Monica R. Gisolfi, 2017-04-15 Economists have described the upcountry Georgia poultry industry as the quintessential agribusiness Following a trajectory from Reconstruction through the Great Depression to the present day Monica R Gisolfi shows how the poultry farming model of semivertical integration perfected a number of practices that had first underpinned the cotton growing crop lien system ultimately transforming the poultry industry in ways that drove tens of thousands of farmers off the land and rendered those who remained dependent on large agribusiness firms Gisolfi argues that the inequalities inherent in the structure of modern poultry farming have led to steep human and environmental costs Agribusiness firms many of them descended from the cotton era South s furnishing merchants brought farmers into a system of feed conversion contracts that placed all production decisions in the hands of the poultry corporations but at least half of

the capital risks on the farmers Along the way the federal government aided and abetted sometimes unwittingly the consolidation of power by poultry firms through direct and indirect subsidies and favorable policies Drawing on USDA files oral history congressional records and poultry publications Gisolfi puts a local face on one of the twentieth century s silent agribusiness revolutions *The Farm Crisis, 1919-1923* James H. Shideler,2023-11-15 Study of the abiding farm question in twentieth century United States history has directed the author s attention to the period 1919 1923 as a turning point in the great economic political and social trends of agriculture As a result of an accumulation of ills and of sharp dislocations caused by World War I particularly in its world economic position agriculture was placed in a position of inequality and thrown into a long lasting depression This crisis damaged the agricultural industry and the farm population altered the position of agriculture in relation to the rest of the economy shifted ideas concerning rural well being and established definite lines of farm policy The purpose of this study is to examine the changes that took place and the attempts of agriculture to improve its status through self help and political action The historical approach to the farm crisis with its general view should help the reader to recognize continuing problems and to plan for their correction or acceptance This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1957 Economic Bases for the Agricultural Adjustment Act United States.
