The Encyclopedia of Best Films Jay Robert Nash, 2019-10-23. This all-inclusive A-Z encyclopedia by one of the world's foremost experts on cinema provides comprehensive annotations of the best films produced from 1914 on. The work offers more than 5,000 three to five star entries: three stars (good), four stars (excellent), five stars (masterpiece), and yes, author Jay Robert Nash has viewed every single one of them, as well as many more that did not make the cut. In addition to a précis, each film's entry also includes a listing of the cast, as well as the key principles involved in production, from the director to the hair stylist. Especially unique to this book is a rating system that helps parents determine whether or not a film is appropriate for their children. Unlike the industry rating system, which can be influenced by studio lobbying, Nash objectively evaluates each film and confers upon it one of four recommendations for viewing: recommended, acceptable, cautionary, and unacceptable. Backmatter includes a list of top films by genre (i.e., animated, drama, sports, mystery, adventure, etc.) as well as an annotated name index listing all persons mentioned, along with their dates of birth and death. Rounding out this essential volume for the film buff are over 500 still photos from the author's private collection.
