Recent Developments in Variable Structure Systems, Economics and Biology R.R. Mohler,A. Ruberti,2012-12-06

The seminar for which the proceedings are published here evolved from a cooperative research program on bilinear systems and applications to immunology at the Oregon State University and at the University of Rome The topics include more general forms of variable structure systems which may be divided into categories of mathematical system theory economic applications and biological applications Throughout the seminar there was emphasis on the integration of theory and application In most cases theoretical derivations are motivated by their need to solve practical problems In reading the proceedings it becomes apparent that bilinear systems quadratic systems and more general variable structure or adaptive systems become natural models in many cases and excellent approximations in others It is seen that linear systems have very limited use particularly in economics and biology Variable structure systems are analyzed in terms of structure voltaerra kernels system modelling parameter identification controllability and Lie algebra to mention a few Certainly it is not possible to present a complete treatment of these numerous topics but at the Same time the unifying power of the systems approach and variable structure systems is shown

Recent Developments in Structural Engineering, Volume 2 Ratnesh

Kumar,Sachin V. Bakre,Manmohan Dass Goel,2024-11-23 The book presents the select proceedings of 13th Structural Engineering Convention It covers the latest research in multidisciplinary areas within structural engineering Various topics covered include structural dynamics structural mechanics finite element methods structural vibration control advanced cementitious and composite materials bridge engineering soil structure interaction blast impact fire material and many more The book will be a useful reference material for structural engineering researchers and practicing engineers

Recent Developments of Geopolymer Materials Mohd Mustafa Al Bakri Abdullah,Rafiza Binti Abd Razak,Wan Mastura Binti Wan Ibrahim,Mohd Arif Anuar Mohd Salleh,2024-09-15 Recent Developments of Geopolymer Materials Processing and Characterisations focuses on the development processing and characterization of sustainable and eco friendly materials highlighting recent research developments in this field The book covers the processing and characterization of geopolymers incorporating green materials from waste and recycled materials specifically for construction applications as well as advanced processing and characterization for a wide variety of applications The book provides in depth chapters on the development processing and characterization of sustainable and green materials with extensive uses such as construction It is divided into two sections Development of Geopolymer Materials for Construction Applications and Advanced Processing and Characterization for Wider Applications and will be a useful resource for academics engineers companies and stakeholders in geopolymers from green materials for a variety of wide applications including construction materials ceramics adsorbents drilling properties and simulation analysis Provides new knowledge and the latest technology and research relating to the processing and characterization of geopolymers incorporating green materials from waste and

recycled materials Covers the latest research on variety of wide applications including construction materials ceramics adsorbents drilling properties and simulation analysis Includes in depth coverage of the benefits of geopolymer technology

Recent Progress in Mesostructured Materials Dongyuan Zhao, Shilun Qiu, Yi Tang, Chengzhong Yu, 2007-03-22 Recent Progress in Mesostructured Materials is a selection of oral and poster communications presented during the 5th International Mesostructured Materials Symposium 5th IMMS2006 Authorized by International Mesostructured Material Association IMMA and hosted by the Fudan University China The scope of this involved field covers both traditional inorganic mesostructured molecular sieves and mesostructured materials like organic polymers metals organic inorganic nanocomposites and ordered mesoporous carbons the hot topics in chemistry crystallization structure liquid crystalline catalysis and materials science This symposium provided a forum for the presentation of the most novel development and knowledge in the science and technology of mesostructured materials Papers presented cover a wide range of topics that include synthesis structure determination characterisation modelling and application in catalysis adsorption biochemistry and advanced material sciences This highly visual book is a must for readers looking to stay up to date on mesostructure science A selection of more than 200 oral and poster papers covering research aspects developing trends of mesostructured materials An important reference for those working in the material science catalysis and biotechnology fields

Fiscal Policy, Public Debt and the Term Structure of Interest Rates Roland Demmel, 2012-12-06 The introduction of the thesis consists of four parts first we motivate our chosen macroeconomic setting by looking at some real world phenomena For a better understanding of these phenomena we argue that the mutual dynamic interactions between fiscal policy and financial markets need to be closely examined in a macroeconomic framework Second we review different strands of the economic literature in order to show that most of the literature has so far exclusively concentrated either on financial market dynamics or on fiscal policy issues We conclude that a more integrated model setting is called for in order to explain the dynamic interactions observed in reality Third we discuss at length the economic assumptions underlying our model This avoids multiple repetition later on Finally we outline the structure of the thesis and

the objectives we pursue in the different chapters

1 Motivation Fiscal policy and financial market reactions are increasingly receiving world wide attention The most recent examples are the Maastricht criteria about fiscal control the South East Asia financial crisis and the resulting IMF policy stance the high level of public debt in developed and developing countries and the effect on interest rates and economic growth In contrast to the still underdeveloped theoretical literature on these dynamic links finding empirical evidence that supports the existence of these links is not a very hard task
