Religions Values And Peak Experiences:

Religions, Values, and Peak-Experiences Abraham H. Maslow,1994-04-01 Proposing religious experience as a legitimate subject for scientific investigation Maslow studies the human need for spiritual expression **Religions, Values, and Peak-experiences** Abraham Harold Maslow,1974 Religions Values and Peak-Experiences Abraham H. Maslow,2021-11-09T16:42:00Z One of the foremost spokesmen for the Third Force movement in psychology Abraham H Maslow here articulates one of his prominent theses the religious experience is a rightful subject for scientific investigation and speculation and conversely the scientific community will see its work enhanced by acknowledging and studying the species wide need for spiritual expression which in so many forms is at the heart of peak experiences reached by healthy fully functioning people *Journeys of Faith* Mike Brock,2023-06-20 *Journeys of Faith* examines the contributions of the leading figures of the humanistic psychology movement with particular attention to their spiritual journeys Rising to prominence in America during the post World War II years humanistic psychology is experiencing a resurgence in the present day in response to the need for a psychological approach that addresses meaning and purpose in life The key players Abraham Maslow Carl Rogers Erich Fromm and Rollo May all rejected the orthodoxy of their religious inheritance in favor of a more humanistic approach and in the process discovered a renewed spirituality that they hoped would address the concerns of a world yearning for something to believe in While the humanistic psychologists confronted the world s problems through the lens of psychology other thinkers such as the evolutionary biologist Julian Huxley approached them through different though equally humanistic perspectives Others still such as Paul Tillich Martin Buber and Pierre Teilhard de Chardin confronted the times through a religious lens The influence of the centuries long Jewish tradition of scholarship and social justice and the frequent examples of friendship and professional cooperation between the secular and the religious worlds provide critical subthemes for the lasting appeal of humanistic psychology **Theories of Religion** Seth Daniel Kunin,Jonathan Miles-Watson,2006 This book provides a comprehensive selection of readings that relate to and explore the definition of religion The texts come from a wide range of approaches unified both by the questions they are addressing and their broadly social scientific perspective The disciplines covered include anthropology phenomenology psychology and sociology The editors have also included some key texts relating to the feminist approach to and critique of religion The first section of the book includes some of the foundational texts such as materials by Marx Freud and Durkheim The remaining sections look at more recent discussions of the issues from the different disciplinary perspectives Each reading is introduced by a biographical sketch of the author The book also includes introductory discussions to each section that both raise the key issues developed in a particular discipline and address the disciplinary approaches from a more critical stance *Theories of Religion A Reader* is an invaluable critical resource accessible to a broad audience as well as students of theology and religious studies Valuing Peak Experience in Everyday Lives Kay A M Weijers,Elaine R J Cox,2025-03-04 Valuing Peak

Experience in Everyday Lives takes Abraham Maslow's concept of peak experience and compares how people have encountered transcendent peak experiences and related phenomena such as flow and peak performance in their everyday lives. By examining existing research and sharing people's actual encounters in different contexts such as music education, sport, creative arts, and nature, the importance and value of peak experiences and self-transcendence in our lives can be better understood and fostered. The book explores the challenges, benefits, and opportunities presented by understanding peak experience in contemporary contexts. Drawing on research from positive and transpersonal psychology, each of the 12 chapters reports on a work or leisure context where peak experiences have been generated and studied. The chapters are introduced by drawing on relevant theory and research and then expanded via accounts, vignettes, and examples from people immersed in those activities or contexts to provide a blend of case stories and theoretical foundations. The book is valuable reading for professional practitioners such as psychologists, educators, coaches, psychotherapists, and those interested in personal development. Also, it will be relevant for students of transpersonal and positive psychology as well as humanism and human development interested in understanding transcendent peak experiences and related concepts such as flow.

Six Stages on the Spiritual Path Ruth Whitney, 2021-05-21 In *Six Stages on the Spiritual Path*, we learn about spirituality and its stages as well as how spirituality helps to reduce our suffering and create more love. Writings from ancient to contemporary mystics across the world provide us with practical and spiritual wisdom that will make our lives happier and more loving. In the first stage on the mystic way, children experience awe and wonder but they do not realize that this is a spiritual experience. While all indigenous people recognize awe as a mystical experience, only some adults and most artists do. When parents and religious leaders teach children about God, they cause their spiritual growth to flourish or to become stunted at an elementary school level. Awakening is an experience of the Divine that helps us realize that the Sacred Spirit is within us and loves us. Awakening produces love for our neighbors and ourselves. Then love nurtures more awakenings. Illumination and union are deeper mystical experiences that the Holy One is not only within all of us and all of creation but also that we are within the ONE. Illumination creates more love for all people and all the universe.

Experimentation in American Religion Robert Wuthnow, 2023-11-15 *Experimentation in American Religion: The New Mysticism and Their Implications for the Churches* explores the emergence of new religious movements in America, particularly those outside the traditional Judeo-Christian framework. Wuthnow examines these movements in the context of the societal shifts during the 20th century, focusing on why they gained popularity, especially among groups that traditional religions had struggled to engage, such as college students, young people, and the educated. These new religions often draw from Eastern spiritual practices, the occult, and humanistic ideals, challenging the dominance of conventional Western religious traditions. The book uses a sociological approach, relying on random sample surveys to analyze patterns in religious commitment, focusing on social factors such as education, age, and background. Although the study acknowledges the limitations of sociological data in

fully capturing the nuances of religious belief it aims to provide insight into the social context of these new religious movements and why certain individuals are attracted to them The author avoids adhering to any single sociological theory recognizing that different types of new religious movements such as yoga astrology and psychic phenomena require distinct explanations This work is part of a larger project to understand the changing religious landscape in America building on the research conducted by Wuthnow and others at the Survey Research Center This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1978 **An**

Introduction to Psychology of Religion Robert W. Crapps, 1986 Developed in almost thirty years of classroom experience this book is designed to introduce students and other readers to the psychological study of religion Robert W Crapps deals with the major questions and figures that have dominated the psychological study of religion over the past century dividing the discussion into four parts Two chapters in part one suggest the problems and possibilities for the psychological study of religion in light of the nature of religion and the scientific method Part two sketches the contributions to the study of religion of three intellectual currents in contemporary psychology psychoanalysis behaviorism and humanistic psychology part three explores the relationship between religion and human development while part four directs attention to religious lifestyles and that weave differentiated parts of human experience into a cohesive whole Publisher description *The Handbook of Humanistic Psychology* Kirk J. for a renaissance and this Handbook will play a critical role in that transformation As increasing numbers of students and professionals rebel against mechanizing trends they are looking for the fuller deeper and more personal psychological orientation that this Handbook promotes *Acute Religious Experiences* Richard Saville-Smith,2023-02-09 This book engages the problem of how in the 21st century we are to speak about experiences of the extraordinary anomalous extreme which occur on a transhistorical and transcultural basis Critical re readings of seminal texts show how 20th century theoreticians in the humanities sought to erase madness from their irrational subjects This propensity to sanitize madness in the study of religions was mirrored by the instinct of psychiatrists to degrade religious experiences by reducing mad consciousness to psychosis or dissociation Richard Saville Smith introduces explanatory pluralism as a way of recognizing these disciplinary biases and mad studies as a way of negotiating this understanding The disproportionate significance of madness in shaping the fabric of the human story can then be recovered from both erasure and dismissal to be given the recognition previously denied as acute religious experiences *Acute Religious Experiences* divides into three sections beginning with re readings of William James s pathological programme Rudolf Otto s numinous T K Oesterreich s possession Mircea Eliade s shamanism Walter Stace s mysticism Walter Pahnke s psychedelic experience and Abraham Maslow s peak experiences These ideas are shown to constitute the beginnings of a fractured discourse on the irrational In part two contemporary psychiatry s Diagnostic and Statistical Manual DSM and Foucault s History of Madness are re read to reposition madness as not necessarily pathological This opens the way for the identification of acute religious experiences as a new holistic and post colonial approach through which religious data can be organized and addressed on a comparative basis In part three The Gospel of Mark is re read as a case study to demonstrate the novel insights which flow from the identification of acute religious experiences Richard Saville Smith draws on his own experiences of madness and his PhD from the School of Divinity at The University of Edinburgh to elucidate his research Sacred Bliss Mark S. Ferrara,2016-10-20 One of the most important relationships that human beings have with plants is changing our consciousness consider the plants that give us coffee tea chocolate and nicotine *Sacred Bliss* challenges traditional attitudes about cannabis by tracing its essential role in the spiritual and curative traditions in Asia the Middle East Africa Europe and the Americas from prehistory to the present day In highlighting the continued use of cannabis around the globe *Sacred Bliss* offers compelling evidence of cannabis as an entheogen used for thousands of years to evoke peak experiences or moments of expanded perception or spiritual awareness Today the growing utilization of medical cannabis to alleviate the pain and symptoms of physical illness raises the possibility of using cannabis to treat the mind along with the body By engaging sacred and secular texts from around the world *Sacred Bliss* demonstrates that throughout religious history cannabis has offered access to increased imagination and creativity heightened perspective and insight and deeper levels of thought **The End of Meaning** William A. Philosophical and Theological Papers, 1965-1980 Bernard Lonergan, 2004-06-02 A companion to *Philosophical and Theological Papers* 1958-1964 Volume 6 in the *Collected Works of Bernard Lonergan* series this anthology contains Lonergan's lectures on philosophy and theology given during the later period of his life 1965-1980 These papers document his development in the discipline during the years leading up to the publication of *Method in Theology* and beyond to 1980 when he was more engaged in his writings and seminars on macroeconomics *Philosophical and Theological Papers* 1965-1980 is divided into five sections forming units on the basis of dates The three central sections are each a set of lectures respectively given at the Massachusetts Institute of Technology Gonzaga University in Spokane and Trinity College University of Toronto Although there is some repetition amongst the lecture sets and in relation to other more familiar works this repetition displays occasional new turns of phrase that the careful reader will note In at least one instance familiar material suddenly opens out onto expressions not to be found anywhere else in Lonergan's work Other very interesting developments regard the movement from speaking of the immutability of dogmas to their permanence of meaning and the permutations among real self transcendence performative self transcendence and moral self transcendence
