Religious Explanation And Scientific Ideology Toronto Studies In Religion Vol 17:

Religious Explanation and Scientific Ideology Jesse Hobbs, 1993 Can one rationally cite the existence of God or other religious entities in explaining matters of fact Religious ideologies and scientific explanations are familiar to many of us but could there be enough epistemic power in religion to justify interesting explanations and enough ideology in science to cause common belief to the contrary In arguing that there is the author points out some legitimate differences in the cognitive value structures typical of religion as opposed to science differences effectively broadening the requirements on explanations imposed by rationality alone beyond what is scientifically recognized This book endeavours to bring religious and scientific people back to the bargaining table showing where there is room for the members of each culture to grant valid points of the opposition without compromising their own basic values or integrity

Religion and Globalization Peter F Beyer, 1994-01-17 In his exploration of the interaction between religion and worldwide social and cultural change the author examines the major theories of global change and discusses the ways in which such change impinges on contemporary religious practice meaning and influence Beyer explores some of the key issues in understanding the shape of religion today including religion as culture and as social system pure and applied religion privatized and publicly influential religion and liberal versus conservative religions He goes on to apply these issues to five contemporary illustrative cases the American Christian Right Liberation Theology movements in Latin America the Islamic Revolution in Iran Zionists in Israel and religious environmentalism

University of Victoria **Reading the New Testament in the Manifold Contexts of a Globalized World** Eve-Marie Becker, Jens Herzer, Angela Standhartinger, Florian Wilk, 2022-12-12 This volume gathers the perspectives of teachers in higher education from all over the world on the topic of New Testament scholarship The goal is to understand and describe the contexts and conditions under which New Testament research is carried out throughout the world This endeavor should serve as a catalyst for new initiatives and the development of questions that determine the future directions of New Testament scholarship At the same time it is intended to raise awareness of the global dimensions of New Testament scholarship especially in relation to its impact on socio political debates The occasion for these reflections are not least the present questions that have been posed with the corona pandemic and have received a focus on the system relevance of churches which is openly questioned by the media The church and theology must face this challenge Towards that end it is important to gather impulses and suggestions for the discipline from a variety of contexts in which different dimensions of context related New Testament research come to the fore **Bibliographie Internationale Des Recensions de la Litt**

Érature Savante , 1995 **Trauma, Religion and Spirituality in Germany during the First World War** Jason Crouthamel, 2021-10-21 This book explores the impact of violence on the religious beliefs of front soldiers and civilians in Germany during the First World War The central argument is that religion was the main prism through which men and women in the Great War articulated and processed trauma Inspired by trauma studies the history of emotions and the social and cultural history of religion this book moves away from the history of clerical authorities and institutions at war and instead focuses on the history of religion and war from below Jason Crouthamel provides a fascinating exploration into the language and belief systems used by ordinary people to explain the inexplicable From Judeo Christian traditions to popular beliefs and superstitions German soldiers and civilians depended on a malleable psychological toolbox that included a hybrid of ideas stitched together using prewar concepts mixed with images or experiences derived from the surreal environment of modern combat Perhaps most interestingly studying the front experience exposes not only lived religion but also how

religious beliefs are invented Front soldiers in particular constructed new subjective spiritual and religious concepts based on encounters with industrialized weapons the sacred experience of comradeship and immersion in mass death which profoundly altered their sense of self and the supernatural More than just a coping mechanism religious language and beliefs enabled victims and perpetrators of violence to narrate concepts of psychological renewal and rebirth In the wake of defeat and revolution religious concepts shaped by the war experience also became a cornerstone of visions for radical political movements including the National Socialists to transform a shattered and embittered German nation Making use of letters between soldiers and civilians diaries memoirs and front newspapers Trauma Religion and Spirituality in Germany during the First World War offers a unique glimpse into the belief systems of men and women at a turning point in European history

Judge, 2007-10-01 This is a collection of pivotal essays by E A Judge who initiated many important discussions in the establishment of social scientific criticism of the Bible What is it that made the work of Judge in 1960 and in subsequent years so important Judge was the first in scholarship after the mid twentieth century to clarify early Christian ideals about society by defining what the social institutions of the broader cultural context were and how they influenced the social institutions of the early Christian communities Judge points out that earlier scholars had entered into this field of inquiry but that in general they failed due to the lack of careful definitions of the Greco Roman social institutions at the time based on a thorough use of the primary sources Thus Judge was the new founder a turning point in scholarship of what came to be called social scientific criticism of the New Testament Social scientific criticism is the term in scholarship that refers to the use of social realities e g institutions class factors of community organization in the critical study of literary sources available this is an advance over merely literary and traditional historical questions *The Routledge Companion to Philanthropy* Tobias Jung, Susan D. Phillips, Jenny Harrow, 2016-05-17 Philanthropy the use of private resources for public purposes is undergoing a transformation both in practice and as an emerging field of study Expectations of what philanthropy can achieve have risen significantly in recent years reflecting a substantial but uneven increase in global wealth and the rolling back of state services in anticipation that philanthropy will fill the void In addition to this experiments with entrepreneurial and venture philanthropy are producing novel intersections of the public non profit and private spheres accompanied by new kinds of partnerships and hybrid organisational forms The Routledge Companion to Philanthropy examines these changes and other challenges that philanthropists and philanthropic organisations face With contributions from an international team of leading contemporary thinkers on philanthropy this Companion provides an introduction to and critical exploration of philanthropy discussing current theories research and the diverse professional practices within the field from a variety of

disciplinary perspectives The Routledge Companion to Philanthropy is a rich and valuable resource for students researchers practitioners and policymakers working in or interested in philanthropy God's Province Clark Banack,2016-06-01

Compared to the United States it is assumed that religion has not been a significant factor in Canada's political development In God's Province Clark Banack challenges this assumption showing that in Alberta religious motivation has played a vital role in shaping its political trajectory For Henry Wise Wood president of the United Farmers of Alberta from 1916 until 1931 William Bible Bill Aberhart founder of the Alberta Social Credit Party and premier from 1935 until 1943 Aberhart's protégé Ernest Manning Alberta's longest serving premier 1943-1968 and Manning's son Preston founder of the Alberta based federal Reform Party of Canada religion was central to their thinking about human agency the purpose of politics the role of the state the nature of the economy and the proper duties of citizens Drawing on substantial archival research and in depth interviews God's Province highlights the strong link that exists between the religiously inspired political thought and action of these formative leaders the US evangelical Protestant tradition from which they drew and the emergence of an individualistic populist and anti statist sentiment in Alberta that is largely unfamiliar to the rest of Canada Covering nearly a century of Alberta's history Banack offers an illuminating reconsideration of the political thought of these leaders the goals of the movements they led and the roots of Alberta's distinctiveness within Canada A fusion of religious history intellectual history and political thought God's Province exposes the ways in which individual politicians have shaped one province's political culture *Researching New Religious Movements* Elisabeth Arweck,2006 This cutting edge analysis of American and European new religious movements explores the controversies between religious groups and the majority interests which oppose them It asks how modern societies can best respond to new religious movements
