Ikechukwu Anthony KANU

Religious Language And Complementarity:

Religious Language and Complementarity John Losee, 1992 In *Religious Language and Complementarity* the author develops an analogy between the structure of the Copenhagen Interpretation of quantum mechanics and theological systems with particular emphasis on the theology of correlation of Paul Tillich The author points out the limits of this analogy and evaluates the effectiveness of the analogy as a defense against the charge that the prima facie inconsistency of traditional Christian theological systems is a genuine inconsistency Contents Theology and Falsification Revisited The Language of Immutable Attributes and the Language of Dialogue Christian Theology and the Two Languages A Brief Historical Survey The Orwellian Challenge Assumptions and Options Omnipotence and Dialogue Theology in the Language of Immutable Attributes Theology in the Language of Dialogue Bultmann's Existentialist Alternative The Copenhagen Interpretation of Quantum Mechanics Tillich's Theology of Correlation Theology of Correlation and the Copenhagen Interpretation A Cogent Analogy As If Interpretations and Cognitive Significance Recapitulation **Complementarity, Causality and Explanation** John Losee, 2017-07-28 Philosophers have discussed the relationship of cause and effect from ancient times through our own Prior to the work of Niels Bohr these discussions presupposed that successful causal attribution implies explanation The success of quantum theory challenged this presupposition Bohr introduced a principle of complementarity that provides a new way of looking at causality and explanation In this succinct review of the history of these discussions John Losee presents the philosophical background of debates over the cause effect relation He reviews the positions of Aristotle Rene Descartes Isaac Newton David Hume Immanuel Kant and John Stuart Mill He shows how nineteenth century theories in physics and chemistry were informed by a dominant theory of causality and how specific developments in physics provided the background for the emergence of quantum theory Problems created for the causality implies explanation thesis by the emergence of quantum theory are reviewed in detail Losee evaluates Bohr's proposals to apply a principle of complementarity within physics biology and psychology He also discusses the feasibility of using complementarity as a principle of interpretation within Christian theology This volume which includes an in depth index is an essential addition to the libraries of advanced undergraduate and graduate students philosophers and those interested in causality and explanation A Complementary Approach to the Interpretation and Translation of Biblical Metaphors Peter Kamande Thuo, 2021-01-31 In this in depth study Peter Kamande Thuo explores the complexity of accurately understanding interpreting and translating Scripture especially biblical metaphors Engaging the need for a stronger theoretical framework for conceptualizing and communicating metaphors across languages Dr Thuo proposes a complementary approach that utilizes relevance theory to bridge gaps presented by conceptual metaphor theory and cognitive linguistics Yet this book is far more than an abstract theoretical treatise Dr Thuo offers the example of the circumcised heart of Romans 2 as a case study providing practical guidance for his readers as he demonstrates the process of translating such a phrase into Kikuyu So

doing he reminds us that the challenge of understanding interpreting and applying biblical metaphors across culture and language is not limited to the work of professional translation Rather it is at the heart of all scholarship discipleship and pastoral teaching and the task of every person engaged in reading the word of God

The Role of Complementary and Alternative Medicine Daniel Callahan, 2002 At the center of the debate over complementary and alternative medicine from acupuncture and chiropractic treatments to homeopathy and nutritional supplements is how to scientifically measure the effectiveness of a particular treatment Fourteen scholars from the fields of medicine philosophy sociology and cultural and folklore studies examine that debate and the clash between growing public support and the often hostile stance of clinicians and medical researchers Proponents and critics have different methodologies and standards of evidence raising the question of how much pluralism is acceptable in a

medical context particularly in light of differing worldviews and the struggle to define medicine in the modern world The contributors address both the methodological problems of assessment and the conflicting cultural perspectives at work in a patient's choice of treatment Sympathetic to CAM the contributors nonetheless offer careful critiques of its claims and suggest a variety of ways it can be taken seriously yet subject to careful scrutiny *The Spirit of Creation* Amos

Yong,2011-05-17 Is a pentecostal charismatic worldview defensible in light of contemporary science In *The Spirit of Creation* Amos Yong demonstrates that pentecostal thought does indeed have merit in scientific contexts What's more he argues that pentecostal charismatic views regarding the dynamic presence and activity of the Spirit of God and the pluralistic cosmology of many spirits have something important to add to the broad discussion now taking place at the crossroads of science and religion Interacting with many scientific fields of study including psychology sociology evolutionary science cosmology and more Yong's *Spirit of Creation* demonstrates the significance of pentecostal ideas to the ongoing dialogue between theology and science

Myths, Models and Paradigms Ian G. Barbour, 2013-03-19 Scientist and philosophers have more in common than might first appear especially when the language used in the two disciplines receives a closer scrutiny Ian G Barbour treats three scientific view points that can clarify the specific nature of religious language The first theme is the diverse function of language Science and religion each has its own task and its own applicable logic and language Religious symbols and their expression in myths imply a perspective and interpretation of human history and experience directing attention to particular patterns in events The second theme is the role of models in both scientific and religious language What the billiard ball model of a gas and the biblical model of personal God both achieve is an interpretation of experience a restructuring of how one sees the world The third area in which science and religion have a common stake is the role of paradigms Paradigms are standard examples of scientific investigation which embody a set of assumptions and becomes a research tradition until replaced by other assumptions Religions has its paradigms like the covenant of Sinai which have issued in traditions Dr Barbour concludes that scientific and religious language both offer knowledge of reality based on experience In determining the appropriate data and criteria for this experience the philosopher of religion can profit greatly from the work of the scientist

Religious Citzenships and Islamophobia Virginie Andre,Douglas Pratt,2017-10-02 The attack on Charlie Hebdo in Paris in January 2015 once again brought to the fore the place of Islam in Western secular democracies and the questioning of Muslim citizenship The hyper mediatisation of jihadist terrorism and its subsequent conflation with Muslim communities in general has led to both an increase in widespread popular fear of Islam and its followers and the further marginalization and stigmatization of Muslim communities living in Western societies This book brings together a range of studies and reflections pertinent to the contemporary issues surrounding religious citizenship and Islamophobia Sentiments of insecurity and uncertainty which far right populist movements focus on are increasingly finding resonance among ordinary citizens Some traditional political parties are now flirting with demagogic discourse with respect to matters Islamic to the point where there is a hardening within Western democracies manifested in the adoption of illiberal policies the narrowing of the conception of secularity and the alienation of a younger generation of Muslims Yet there can still be found both glimmers of hope and slivers of sanity This book was originally published as a special issue of *Islam and Christian Muslim Relations*

The Recovery of Mission Vinoth Ramachandra,2002-10-03 In recent years the term religious pluralism has come to be used not only in a descriptive sociological sense but also as theologically prescriptive Within this new paradigm traditional Christian understandings of Christ conversion evangelism and mission have been radically reinterpreted The Recovery of Mission explores the pluralist paradigm through the work of three of its most influential Asian exponents Stanley Samartha Alousius Pieris and Raimundo Panikkar subjecting each to a theological and philosophical critique On the basis of biblical patristic and contemporary theological writings Vinoth Ramachandra argues for the uniqueness and decisiveness of what God has done for us in Jesus Christ Ramachandra seeks to show that many of the valid concerns of pluralist theologians can best be met by reappropriating the missionary thrust at the heart of the gospel The book ends with suggestions challenging to pluralists and conservatives alike as to how the gospel needs to be communicated in a multifaith world *A Populistic Community and Modernization in India* Ishwaran,2023-07-31 The Making of a Postsecular Society Massimo

Rosati,2016-03-03 Drawing on the thought of Durkheim this volume focuses on societal changes at the symbolic level to develop a new conceptualisation of the emergence of postsecular societies Neo Durkheimian categories are applied to the case of Turkey which in recent years has shifted from a strong Republican and Kemalist view of secularism to a more Anglo Saxon perspective Turkish society thus constitutes an interesting case that blurs modernist distinctions between the secular and the religious and which could be described as postsecular Presenting three symbolic case studies the enduring image of the founder of the Republic Atatürk the contested site of Ayasofia and the remembering and commemoration of the murdered journalist Hrant Dink The Making of a Postsecular Society analyses the cultural relationship that the modern Republic has always had with Europe considering the possible implications of the Turkish model of secularism for a specifically European self understanding of modernity Based on a rigorous construction of theoretical categories and on a close scrutiny of the

common challenges confronting Europe and its Turkish neighbour long considered other with regard to the accommodation of religious difference this book sheds light on the possibilities for Europe to find new ways of arranging the relationship between the secular and the religious As such it will appeal to scholars of social theory the sociology of religion secularisation and religious difference and social change
