Things We Know: Fifteen Essays on Problems of Knowledge Frank B. Ebersole, 2001-12-11

Reading Ebersole requires and often succeeds in producing a radical reorientation of one's thinking from a book review. *Things We Know* is a collection of fifteen essays that focus on perennial philosophical problems about knowledge. The essays let you participate in Frank Ebersole's unique struggles to come to terms with such questions as: Can we know the world? the past? the future? of God's existence? whether our actions are free? the foundations of logic and language. This is not just another philosophy book about problems of knowledge. In *Things We Know*, Ebersole, by carefully using examples, exposes the problems to be the products of philosophical pictures. The examples also make the pictures less compelling. Thus, by reading this philosophy book, readers can join the author in working to free themselves from some perplexing philosophical concerns.

How the Second Edition differs from the First Edition

This edition differs from the First Edition University of Oregon Books 1967 in three ways:

- An essay is added: Everyman's Ontological Argument has been inserted as Essay 14 following two other essays about the ontological argument. Everyman's Ontological Argument was published in the Fall 1978 issue of *Philosophical Investigations*.
- The original Chapter 14, *Where the Action Is*, is now Chapter 15.
- An essay is replaced: The original Essay 3, *How Philosophers See Stars*, has been replaced by a modified version that was printed in *Philosophy Today* no. 2, 1969. The replacement includes some further improvements. The text is improved.

Throughout the book, the author has made corrections, stylistic improvements, and changed the wording as needed to make clearer his line of thought.

Summary

Each of the fifteen essays takes up a philosophical problem. In most of the essays, Ebersole first clarifies the problem and reviews common attempts to resolve the problem. Then he focuses on the central ideas and terms used to state the problem and creates examples of people using the terms under consideration. The examples are unique because of their focus on the context and point of what we say. If his investigations fail to find a use of the terms that supports the philosophical problem, he is led to conclude that the problem does not really derive from a philosophical insight but rather arises from a philosophical picture or model.

Preface

The essays in *Things We Know* address some of the perennial philosophical problems of knowledge. The essays are unified by being similar in method and philosophic aim. Ebersole exposes a picture behind each problem. In the essays, he works through some of the ways that pictures control our thinking and tries to make the pictures less compelling.

Matthew McCullough, 2025-06-10 The Best Way to Find Meaning in Life Is to Get Honest About Death Life expectancy worldwide is twice what it was a hundred years ago And because of modern medicine many of us don't often see death up close That makes it easy to live as if death is someone else's problem Ignoring the certainty of death doesn't protect us from feeling its effects throughout the lives we're living now but it does hold us back from experiencing the powerful everyday relevance of Jesus's promises to us So long as death remains remote and unreal Jesus's promises will too But honesty about death brings hope to life That's the ironic claim at the heart of this book Cultivating death awareness helps us bring the

promises of Jesus from the hazy clouds of some other world into the everyday realities of our world where they belong

Relational Remembering Sue Campbell, 2003-10-07 Tracing the impact of the memory wars on science and culture *Relational Remembering* offers a vigorous philosophical challenge to the contemporary skepticism about memory that is their legacy Campbell's work provides a close conceptual analysis of the strategies used to challenge women's memories particularly those meant to provoke a general social alarm about suggestibility Sue Campbell argues that we cannot come to an adequate understanding of the nature and value of memory through a distorted view of rememberers The harmful stereotypes of women's passivity and instability that have repopulated discussions of abuse have led many theorists to regard the social dimensions of remembering only negatively as a threat or contaminant to memory integrity Such models of memory cannot help us grasp the nature of harms linked to

oppression as these models imply that changed group understandings of the past are incompatible with the integrity of personal memory Campbell uses the false memory debates to defend a feminist reconceptualization of personal memory as relational social and subject to politics Memory is analyzed as a complex of cognitive abilities and social narrative activities where one's success or failure as a rememberer is both affected by one's social location and has profound ramifications for one's cultural status as a moral agent
