Hislam,1918 **In the Company of Dragons** Amber Michelle,2010-04 Pop was a pixie he lived in a magical land long long ago Unlike most creatures which were either born or hatched pixies were quite literally formed from magic itself Pixies were able to teleport moving from one place to another simply by willing it Pop unlike most pixies makes a popping sound when he teleports And it is this sound that both influences his parents to give him his name and also will be the catalyst for a decision that the young pixie will make that will result in

Bengtson,2008-12-03 Compiled in honor and celebration of veteran anthropologist Harold C Fleming this book contains 23 articles by anthropologists in the general sense from the four main disciplines of prehistory archaeology biogenetics paleoanthropology and genetic historical linguistics Because of Professor Fleming s major focus on language he founded the Association for the Study of Language in Prehistory and the journal Mother Tongue the content of the book is heavily tilted toward the study of human language its origins historical development and taxonomy Because of Fleming s extensive field experience in Africa some of the articles deal with African topics This volume is intended to exemplify the principle in the words of Fleming himself that each of the four disciplines is enriched when it combines with any one of the other four The authors are representative of the cutting edge of

their respective fields and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them

Imagery and Symbolism in Counselling William Stewart, 1996 There is a growing awareness in the counselling and pastoral care professions that the appropriate use of imagery and symbolism in counselling can be a useful tool in helping clients to resolve inner conflicts which they would otherwise find hard to confront This comprehensive book explores the therapeutic use of imagination and how the use of myths legends and spontaneous images can clothe feelings with images and thereby make them easier to work with and control The book is intended as a working model which takes the reader through the various stages of imagery and symbolism and is illustrated by many case studies that highlight various principles and topics and create a bridge between theory and practice A companion volume Dictionary of Images and Symbols in Counselling provides an A Z of images and symbols

The Psychology of Questions Arthur C. Graesser, John B. Black, 2017-12-15 Originally published in 1985 the chapters in this volume collectively approach the phenomenon of questioning from many perspectives There are studies on question comprehension question answering question asking and the influence of adjunct questions on text comprehension and memory The chapters cover different theories models methods and practical applications Some contributors focus exclusively on adult subjects whereas others examine cognitive development in children The earlier chapters in the book have a pure science emphasis whereas the later chapters have an applied emphasis Of course the distinction between science and application had in the editors words become very fuzzy in the years prior to publication
