Reflections on the Revolution of Our Time Harold Laski, 2017-07-05 Harold J Laski saw World War Two as a period of revolutionary change as profound as any in the modern history of the human race In his view the period s inner nature was as significant in its essentials as those which saw the fall of the Roman Empire the birth in the Reformation of capitalist society or as in 1789 the final chapter in the dramatic rise of the middle class to power All of these were not revolutions made by thinkers though some of them may have foreseen its coming but of ordinary people

who shaped the large outlines of the direction of these changes Laski held that revolutions of our time have been rooted in all that goes to give its present character to our society We can recognize its advent and prepare for it in that event we might build a civilization richer and more secure than any of which we so far have knowledge Or we may chose to resist its onset in which case it will appear to some future generation that our age has sought rather to sweep back the tides of the ocean than to oppose the decrees of men The curse of our social order is its persistent inequalities Either we must find ourselves able to co operate in their removal or we shall move rapidly to conflict about them Laski argues that the middle class must co operate with workers in essential revisions as the aristocracy was wise enough to do a century ago over the Reform Bill or violent revolution will be unleashed by means that transforms the ends of either party to the conflict in view This is the choice that lies before us Just how accurate or wide of the mark Laski was is brilliantly articulated in the critical introduction by Sidney A Pearson Jr

Relativity In Our Time Mendel Sachs, 2018-10-08 Relativity In our Time is a book concerning the relevance of Einstein s theory to human relations in contemporary times It is physics and it is philosophy It is a discussion about one of the greatest of all pillars of 20th century thought and science Based on a seminar course for a mixture of science and humanities students the approach and narrative style leads the reader towards the frontier of thinking in this farreaching subject Sachs deals with the whole spread of relativity starting from the early history of Galileo and Faraday he arrives at the foundation of the special theory There is a logical transition to the general theory while the last part of the book covers the mind testing realms of unified field theory Mach s principle and cosmology The book begins with atomistic deterministic classical physics and goes on towards a view of continuous fields of matter and a clearer view of spacetime The reader is led into Einstein s extension of this theory towards a unified force field consequently the authors address the issue of the validity of linear mathematics compared with the realism of a non linear universe Such arguments today are leading towards a new paradigm in science a study and description of nonlinear natural systems especially far from equilibrium systems their energetics and dynamics This book should be of value to postgraduates undergraduates secondary students and professionals in physics and philosophy and anyone with an interest in science subjects

The Social Crisis of Our Time Wilhelm Röpke, [The Book For Our Time!](#) Willy Jeanne Louis De Smedt, 2023-11-22 Is it still possible to write something new and valuable about the Revelation? The subject of Revelation has always been an intriguing one for both believers and non-believers who for centuries have devoted themselves to studying and examining it. Consequently many scholars have shared their view about it but almost all of them appear to be in contrast with one another. Indeed, never in time existed a continuous interpretation as every reader approaches the text from a distinct perspective. Nonetheless, it has always been evident that

the key to Revelations lies within the pages of the Holy Scriptures With this notion in mind The Book For Our Time a translation of the original manuscript published in 1872 was written in order to research and understand along with readers to find the true end and fulfilment of Revelation and in so doing bring a sense of purpose to those who read it Willy Louis Jeanne De Smedt 8 2 1931 25 8 2017 Born in Belgium he moved with his parents to the Democratic Republic of the Congo where he attended a Catholic School Always serious about religion he wished to become a priest but eventually decided not to pursue his dream After moving to South Africa where he qualified as a millwright at Iscor Willy started working as a math teacher at the Military Technical College During a service in the New Apostolic Church Willy heard and learned about the Day of The First Resurrection That s when the project of The Book For Our time started to take form from his desire to inform people about the salvation plan of God He died in 2017 due to Leukemia
