The Development of the Concept of SMELL in American English Daniela Pettersson-Traba, 2022-10-24 The last decades have witnessed a renewed interest in near synonymy In particular recent distributional corpus based approaches used for semantic analysis have successfully uncovered subtle distinctions in meaning between near synonyms However most studies have dealt with the semantic structure of sets of near synonyms from a synchronic perspective while their diachronic evolution generally has been neglected Against this backdrop the aim of this book is to examine five adjectival near synonyms in the history of American English from the understudied semantic domain of SMELL fragrant perfumed scented sweet scented and sweet smelling Their distribution is analyzed across a wide range of contexts including semantic morphosyntactic and stylistic ones since distributional patterns of this type serve as a proxy for semantic dissimilarity The data is submitted to various univariate and multivariate statistical techniques making it possible to uncover fine grained dissimilarities among the near synonyms as well as possible changes in their prototypical structures The book sheds valuable light on the diachronic development of lexical near synonyms a dimension that has up to now been relatively disregarded

Lexicography and Terminology Olga Karpova, Olga M. Karpova, Faina Kartashkova, 2009-03-26 The present book contains a collection of works devoted to current trends in theoretical and practical lexicography terminology and terminography All papers are divided into two main sections Part I Lexicography deals with analysis of historical and typological problems in lexicography with special reference to English Italian Russian and Southern African dictionaries for general and special purposes The main focus is given to the description of principles in lexicographic presentation of non equivalent lexics rhyming slang idioms clichés and gender nominations of people in bilingual and monolingual dictionaries Part II Terminology and Terminography is devoted to description of the current tendencies observed in terminology and terminography studies with special reference to modern European languages such as English Russian Norwegian etc Terms of different special domains are viewed from the angle of the latest achievements of modern science cognitive linguistics in particular It reveals specific features of terminological word combinations terms in colloquial use peculiarities of terms belonging to newly formed Languages for Special purposes typical features of recently appeared LSPs and presentations of new dictionaries projects of different subject areas This part reveals international nature of current tendencies in terminology studies and shows the national ways of their functioning and presentation in special dictionaries *The Handbook of Applied Linguistics* Alan Davies, Catherine Elder, 2008-04-15 The Handbook of Applied Linguistics is a collection of newly commissioned articles that provide a comprehensive and up to date picture of the field of Applied Linguistics Provides a comprehensive and current picture of the field of Applied Linguistics Contains 32 newly commissioned articles that examine both the applications of linguistics to language data and the use of real world language to ameliorate social problems Valuable resource for students and researchers in applied linguistics language teaching and second language acquisition Presents applied linguistics as an independent discipline that unifies practical experience and theoretical understanding of language development and language in use **Connectives in the History of English** Ursula Lenker, Anneli Meurman-Solin, 2007 Clausal connection is one of the key building blocks of language and thus a field where a wide range of syntactic semantic pragmatic and cognitive phenomena meet The availability of large databases as well as considerable advances in corpus linguistic methods have strengthened the interest in the history of features linking clauses or larger chunks of text The papers in this volume combine a thorough corpus based analysis of the history of individual connectives their co occurrence patterns and patterns of variation and change from both intra and inter systemic perspectives with a variety of methodological tools ranging from sophisticated methods of grammatical analysis to pragmatics text linguistics and discourse analysis Drawing on quantitatively and qualitatively improved data the studies reconstruct the history of a wide range of connectives in English from various new theoretical perspectives **The Use and Abuse of EFL Dictionaries** Hilary Nesi, 2012-02-14 The book

begins with a review of research into dictionary use A number of experimental design problems are discussed in particular the unreliability of questionnaire responses and the need for detailed accounts of individual dictionary consultations whilst sampling in numbers sufficient to represent specified populations The experiments reported in subsequent chapters investigate issues raised in the review The first two studies find that dictionary use during a reading comprehension test affected completion speed but not test scores The apparent failure of dictionary use to improve comprehension is attributed to the test itself the dictionaries and the users choice of look up words The ability of users to interpret dictionary entries is investigated in three further studies which use computers to gather data on large numbers of individual consultations The findings indicate that there is little difference between three major EFL dictionaries in terms of speed of consultation and overall productive success They also indicate that Malaysian ESL subjects who have higher vocabulary scores are slower in their reading and less successful in their interpretation of entries than Portuguese EFL subjects Finally the findings suggest that overall productive success is unaffected by the presence or absence of examples The experimental findings lead to the conclusion that dictionary consultation is a process in which users match pre existing beliefs about word meaning and behaviour against segments in the dictionary entry Such segments are often selected because they are familiar sounding and conceptually accessible but may contain only incomplete or non essential information Where pre existing beliefs and dictionary information conflict dictionary information is sometimes overridden Thus word knowledge acquired from a single consultation is often insufficient to ensure productive success Although it is probably inevitable that word knowledge will be acquired slowly through multiple encounters modifications to the dictionary entry and the training of users might help to avoid serious misinterpretation of dictionary information

linguistics on lexicography goes back around 50 years though longer in the case of learners dictionaries The present volume aims to reflect on the research that has been and is being done in lexicography and to point the way forward It also tackles the critique of dictionaries in the electronic medium the future of historical lexicography in the electronic mode with special reference to the online Oxford English Dictionary and on e lexicography in general *No translation is perfect* Marco Sievers, 2007-07-12 Essay from the year 2006 in the subject Interpreting Translating grade 2 Liverpool John Moores University course Translation Studies language English abstract The basic assumption of laymen concerning translation is that every word or meaning can universally be translated from one language to another Their idea of translation is that of a straightforward mechanical process which simply replaces source language SL items with target language TL items Some conceptions in translation studies seem to encourage this view and debates suggest that it is only a matter of the right scope focus or technique to create perfect translations The paper at hand will refute this notion It will prove and exemplify the facts that not everything is translatable and that a transfer of meaning necessarily involves changes entailing loss or gain of linguistic cultural and stylistic features cf Harvey 2001 38 Pym Turk 2001 274 Translation cannot create an identical TL copy of the SL text but only permits a relative equivalence to it A maximal approximation however can never be achieved due to the complexity of language its dependence on constantly changing cultural norms and because the human factor Especially the aspect acceptance by the audience will show that perfection is just an abstract evaluative term which largely depends on individual taste *Principles and Practice of South African Lexicography* R. H. Gouws, D. J. Prinsloo, 2010-10-01 Principles and Practice of South African Lexicography is directed at experts in the field of practical and theoretical lexicography in South Africa applying the general theory of lexicography to the South African lexicographic environment The authors of this book are leaders in the field of South African lexicography and active participants in the international lexicographic arena publishing regularly in national and international journals and giving papers at international conferences and workshops
