The Arab Economies in a Changing World Marcus Noland, Howard Pack, 2011 **Regional Economic Outlook, April 2011, Sub-Saharan Africa** International Monetary Fund. African Dept., 2011-05-03 Sub Saharan Africa s economic recovery is well under way although among country groups there is variation in the speed of the recovery In most of the region s low income countries and among the seven oil exporters growth is almost back to precrisis levels However in the region s middle income countries including South Africa the recovery has been more gradual This Regional Economic Outlook describes the impact of recent economic developments sharp increases in food and fuel prices will need fiscal interventions targeting the poor while higher oil prices will be a boon to some countries and adversely affect others Policy adjustments are needed to move away from the supportive stance of the last few years but should be balanced against the need to alleviate the impact of rising food prices on poor households Atlas of Global Development , **The Muslim Brotherhood** Carrie Rosefsky Wickham, 2015-05-26 How the Muslim Brotherhood rose to power in Egypt and what it means for the Islamic world Following the Arab Spring the Muslim Brotherhood achieved a level of influence previously unimaginable Yet the implications of the Brotherhood s rise and dramatic fall for the future of democratic governance peace and stability in the region are disputed and remain open to debate Drawing on more than one hundred in depth interviews as well as Arabic language sources never before accessed by Western researchers Carrie Rosefsky Wickham traces the evolution of the Muslim Brotherhood in Egypt from its founding in 1928 to the fall of Hosni Mubarak and the watershed elections of 2011 2012 Highlighting elements of movement continuity and change Wickham demonstrates that shifts in Islamist worldviews goals and strategies are not the result of a single strand of cause and effect and provides a systematic fine grained account of Islamist group evolution in Egypt and the wider Arab world In a new afterword Wickham discusses what has happened in Egypt since Muhammad Morsi was ousted and the Muslim Brotherhood fell from power **Human Rights in Libya** Giacomina De Bona, 2013 Since the end of the Cold War a democratic wave has swept through large parts of the world propagating liberal values and giving impetus to the case for human rights in an international society To date however the promotion of human rights has presented a mixed account with some countries lagging behind others in terms of their observance In an effort to account for these differences this book analyzes the relationship between norms and the social construction of international society and examines how human rights are promoted in that context Focussing on Libya as a case study Giacomina De Bona criticises the neo realist approach by demonstrating the impact of international society

on the advancement of human rights Libya has related to the international environment in different ways over time ranging from isolation to reconciliation and regime change making it a particularly interesting example This book is of particular relevance in light of the recent Arab Spring and raises the question as to whether the coercive imposition of the Western liberal model contributes to establishing respect for human rights in what continue to be the peripheral zones of international society

of knowledge about the surrounding western part of the Arab world or the Maghreb which had long attracted a tiny fraction of the outside interest shown in the eastern Arab world of Egypt the Levant and the Gulf This book examines the politics of the three states of the central Maghreb Algeria Tunisia and Morocco since their achievement of independence from European colonial rule in the 1950s and 1960s It explains the political dynamics of the region by looking at the roles played by the military political parties and Islamist movements and addresses factors such as Berber identity and economics as well as how the states of the region interact with each other and with the wider world

African Counterterrorism Cooperation Andre Le Sage, 2007-10 Copublished with the National Defense University Press *The Syrian Information and Propaganda War* Ben Cole, 2022-02-22 This book focuses on the propaganda war between the Syrian government and the opposition movement which excludes the Islamic State and the Kurdish led SDF Drawing on international relations psychology and media studies the book encourages readers to question the dominant discourse on the war The core of the book outlines the propaganda battles over the main paradigms and narratives that framed the war exploring the shortcomings of those paradigms and narratives identifying who won the propaganda war and why and assessing what impact it had on the military side of the war In particular it focuses on the role of cognitive bias amongst primary and secondary sources in determining the outcome of the propaganda war and whether the influence of this propaganda is best

explained by effects or limited effects theory Through explaining the dynamics of the propaganda war the book encourages readers to critically question the dominant discourse on the war assists them in understanding primary and secondary reporting on the war and shows that the impact of the propaganda war is best understood in terms of limited effects theory The book s main findings are that i the opposition won the international propaganda war but failed to win the propaganda war inside Syria ii propaganda had relatively little effect on shaping attitudes either inside Syria or internationally instead its main effect was to reinforce attitudes that had already been shaped by other factors and iii the reality of the war lies between the conflicting paradigms and narratives being promoted by each side

standards and use them as a tool to accelerate reform has captured the imagination of many that deal with policy studies An international comparative perspective is key for understanding why reforms travel from one corner of the world to another Not surprisingly the study of policy borrowing and lending constitutes one of the core research topics of comparative policy studies a new area of research that links comparative education with policy studies The World Yearbook of Education 2012 brings together a diverse range of perspectives on education policy through contributions from internationally renowned authors It reflects on the way policy borrowing and lending is reconfiguring the world of education and offers a new collection of insights into the changes occurring across the world It particularly focuses on The political and economic reasons for policy borrowing The agencies international networks and regimes that instigate policy change The process of borrowing and lending The impact of these systems agendas and institutions on indigenous settings This book will prove invaluable to researchers of globalization and to policy experts especially those interested in comparative and international educational studies It is also essential reading for undergraduate and postgraduate students and anyone involved in the sociology economy or history of education Gita Steiner Khamsi is Professor of Comparative and International Education at Teachers College Columbia University New York US Florian Waldow is Research Director at the University of Münster Germany
