Metaphor II ,1990-01-01 Metaphor though not now the scholarly mania it once was remains a topic of great interest in many disciplines albeit with interesting shifts in emphasis Warren Shibles *Metaphor An Annotated Bibliography and History* Bloomington Ind 1971 recorded the initial interest Then *Metaphor A Bibliography of Post 1970 Publications* published by John Benjamins continued the record through the mania years up to 1985 when writings proliferated as metaphor was seen to be a fundamental category in human thought and language Five years later there is a need for a report on the newest thinking and tendencies in the field This need is fulfilled by *Metaphor II* which offers a comprehensive view of information which would otherwise remain scattered throughout a numbing plethora of resources including many sometimes hard to find publications from Eastern Europe *Metaphor II* systematically collects references of books articles and papers published between 1985 and May 1990 and includes for completeness corrections and additions to the earlier bibliographies Abstracts are given for many of the titles while four indices disciplines semantic fields metaphor theory and names multiply the number of access points to the information **Routledge Library Editions: Philosophy of Time** Various Authors,2021-03-05

The Moving Image David Suda,1989-01-13 Through a discussion of habit myth metaphor and logic the first section of this work is a criticism of method and the presuppositions underlying meaning The author then presents a phenomenological meditation on clocks as metaphors of time arguing that trees hourglasses mechanical clocks and digital watches are particular metaphors of time and that they reveal beliefs about the meaning of time Contents include Knowing What One Has Heard Knowing The Time and Digital Time as Myth **The British National Bibliography** Arthur James Wells,1968

rather as a strait jacket so often events and contexts just fail to fit in No attempt has been made so far to replace the master narrative H Floris Cohen now comes up with precisely such a replacement Key to his path breaking analysis cum narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected revolutionary transformations each of some twenty five to thirty years duration This vision enables him to explain how modern science could come about in Europe rather than in Greece China or the Islamic world It also enables him to explain how half way into the 17th century a vast crisis of legitimacy could arise and in the end be overcome Algorithmic Modernity Morgan G. Craig, 2024-02-22 This volume provides the historical background to its companion volume Assessing the New Testament Evidence for the Historicity of the Resurrection of Jesus It traces the history of historical apologetics for Jesus resurrection from the first century through the twentieth century focusing on its apogee during the Deist controversy in Europe It explores which of the traditional arguments on behalf of the historicity of Jesus resurrection are obsolete and which still merit consideration today It includes a discussion of the problem of miracles both their possibility and identification which forms the backdrop for any contemporary case for the resurrection
