Candidate Matters Karleen Jones West, 2020-03-25 In developing democracies political parties built around charismatic personalities coupled with populist campaigns often ascend to power This tactic has long been effective in Latin America and has resulted in parties that rely heavily on personalistic appeals and vote buying The predominant view is that ethnic parties are an exception to this rule they behave differently from traditional populist parties by attracting voters based on the expectation that they will create policies to provide for the groups that they represent In *Candidate Matters A Study of Ethnic Parties Campaigns and Elections in Latin America* Karleen Jones West shows that under certain conditions niche parties such as ethnic parties are not that different from their mainstream counterparts Through a detailed examination of the Pachakutik party in Ecuador she shows that the characteristics of individual candidates campaigning in their districts shapes party behavior Ethnic parties that are initially programmatic can become personalistic and clientelistic because vote buying is an effective strategy in rural indigenous areas and because candidates with strong reputations and access to resources can create winning campaigns that buy votes and capitalize on candidates personal appeal Why do niche parties in developing democracies struggle to maintain programmatic and meaningful platforms West argues that when candidates legislative campaigns are personalistic and clientelistic in their districts niche parties are unable to maintain unified programmatic support By combining in depth fieldwork on legislative campaigns in Ecuador with the statistical analyses of electoral results and public opinion she demonstrates the importance of candidates and their districts for how niche parties compete win and become influential in developing democracies Pan Alternativo Giovanni Petrella Battista, 2002-08-01 In a harmonious combination of history sociology conservatism culinary arts medicine and nutrition the author offers us the famous and sought after bread on a silver platter with all of the possibilities and recipes we have been waiting for The philosophy behind the bread is presented with interesting images making this book a means of reflection and an invitation to not only learn about bread but to prepare and savor it as you would a work of art This allows us to reevaluate the presence of this food that is so prevalent around the world this food that possesses much more than its essential ingredients

Report ,1995 , **Entorno económico y organizacional para ingenieros** Gustavo Morales Alonso, Yilsy Núñez Guerrero, El ocaso del dinero politizado Juan Ramón Rallo El dinero es o deber a ser un puente para conectar el presente con el futuro sin sobresaltos Cuando los agentes económicos mantienen dinero en cartera en lugar de invertirlo en otro tipo de activos con mayor rentabilidad pero también con mayor riesgo es porque aspiran a transferir esa parte de su patrimonio hacia el futuro a un valor estable Atesorar dinero es rechazar la volatilidad es tratar de mantener tus opciones abiertas ante un futuro incierto y cambiante y que precisamente se vuelve menos incierto y cambiante porque hemos almacenado una determinada suma de dinero que nos permite reconfigurar nuestros planes de acción con rapidez y sin coste En un mundo sin incertidumbre y sin cambios con quietud y perfecta previsibilidad los agentes no necesitarían de dinero bastaría con una unidad de cuenta abstracta en la que socialmente pudieran expresar el valor de las distintas mercancías intercambiadas y posteriormente liquidar la diferencia entre esos valores mediante algún activo financiero libre de riesgo recordemos que nos vemos en un entorno de perfecta previsibilidad cuyo vencimiento estuviera exactamente sincronizado con el consumo futuro de cada uno de esos agentes económicos Si necesitamos dinero es esencialmente para hacer frente a las procelosas aguas de un mercado alborotado y en permanente mutación Pero para que el dinero pueda cumplir con las funciones que los agentes económicos le demandan al dinero es necesario que se trate de un dinero de alta calidad un bien económico capaz de preservar estable su propio valor en medio de ese entorno calidoscópico Hasta los albores del siglo XX la humanidad recurrió a los metales preciosos como expresión de esa inmutabilidad tanto material como económica una onza de oro no solo es un bien totalmente homogéneo frente a cualquier otra onza de oro no solo es completamente divisible sin que las fracciones de la onza vean modificada su naturaleza no solo es altamente dúctil y maleable como para crear piezas estandarizadas que minimicen los costes de transacción sino que además la oferta de oro no es susceptible de ser modificada políticamente puesto que fracasadas las ensayaciones alquimistas la cantidad de oro disponible en nuestro planeta está dada por la naturaleza Esas excelentes propiedades físicas para actuar como moneda combinadas con la despolitización en su oferta llevaron al oro a ser globalmente demandado como dinero es decir no solo como medio de intercambio o unidad de cuenta sino también como reserva de valor a largo plazo frente a cualquier veleidad inflacionista El siglo XX fue sin embargo la centuria del dinero politizado Las prisas por conseguir un crecimiento acelerado del Estado aprovechando las muy distintas coyunturas críticas tanto el Warfare State de la Primera y de la Segunda Guerra Mundial como el Welfare State posterior a la Segunda Guerra Mundial hicieron necesario recurrir a la inflación como forma de financiar los excesos presupuestarios en el muy corto plazo los gobiernos incapaces de imponer repentinamente el nivel de presión tributaria tan elevado que habría requerido la elephantiasis estatal optaron por ese impuesto insidioso y oculto que supone envilecer el valor de la moneda Y para poder financiar sus desembolsos a través de la inflación tuvieron que sacrificar el oro y reemplazarlo por las actuales monedas fiat El dinero que actualmente prepondera en todos los países del planeta no es más que un pasivo del Estado que este manipula a

discreción para alcanzar en cada momento los objetivos sociales que superimpongan los políticos financiar un aumento de gasto público estimular la economía fomentar la competitividad de las industrias exportadoras diluir el valor real de las deudas aumentar el valor de los activos reales rebajar los tipos de interés etc Del dinero despolitizado el oro hemos pasado al dinero hiperpolitizado la moneda fiat de la economía libre a la economía intervenida desde sus arterias monetarias Pero como deber a resultar evidente los ciudadanos no se mantienen impávidos frente a esa manipulación política del dinero que supuestamente deberían utilizar Si los políticos abusan tanto de la moneda fiat como para volverla un mal dinero es decir si deterioran inflacionistamente tanto su valor como para volverlo una mala reserva de valor entonces los agentes económicos buscarán otros dineros alternativos con los que proteger sus patrimonios Y cuáles son esos dineros alternativos Pues basta con observar cómo se organizan los ciudadanos en aquellas jurisdicciones en las que la moneda oficial del Estado ha muerto como dinero por ejemplo en la muy hiperinflacionista Venezuela Que el bolívar en sus distintas versiones y denominaciones haya dejado de ser empleado a todos los efectos como dinero no significa que los venezolanos hayan dejado de necesitar de algún otro tipo de dinero no solo para efectuar intercambios sino también para transferir sus menguantes ahorros al futuro de un modo en que no puedan ser parasitados por las autoridades estatales Esos dineros alternativos los han encontrado en moneda extranjera relativamente menos mala que la nacional el dólar el peso colombiano o los reales brasileños en activos reales tangibles como el oro en el Estado Bolívar que acoge el arco minero del Orinoco o incluso en activos reales virtuales como Bitcoin Por mucho que los distintos Estados aspiren a ello estos no son capaces de suprimir la competencia monetaria que otros activos tradicionales o emergentes plantean contra sus monedas fiat Es esa competencia monetaria la que pone coto a sus inclinaciones más irresponsables en la administración del dinero estatal precisamente porque no somos totalmente rehenes del dinero decretado como oficial por las autoridades políticas esas autoridades políticas no son omnipotentes a la hora de manipularnos a su antojo Disponen de cierto margen para hacerlo pero ese margen no es ilimitado Cuanto mayores y más visibles sean sus excesos mayor será la reacción ciudadana para protegerse frente a ellos De ahí que una adecuada comprensión de los fenómenos económicos contables y financieros resulte esencial para no dejarse engañar por aquellos que se lucran de nuestra credulidad económica contable y financiera Si el valor de un dinero depende de la confianza que exhibamos hacia su emisor deberíamos exigir que esa confianza se fundamente en la realidad y no en la fantasía pues en caso contrario seremos víctimas de nuestras propias ilusiones Decía John Maynard Keynes que solo una persona entre un millón sería capaz de detectar el insidioso robo inflacionista que se produce al devaluar la moneda en realidad con un buen manual de economía finanzas y contabilidad como lo es este cualquier estudiante puede terminar entendiéndolo y defendiéndose frente a él
