Panther Glade:

Panther Glade Helen Cavanagh,1993 Bill gains self confidence when he spends the summer in Florida with Aunt Cait an archaeologist studying the ancient Calusa Indians *Crackers in the Glade* Rob Storter,2007-10-01 A visually stunning account of bygone days in the Everglades transports readers to the remote half wild frontier of southwest Florida in the early part of the twentieth century Reprint **Forgotten Grasslands of the South** Reed F. Noss,2012-12-03 Forgotten Grasslands of the South is a literary and scientific case study of some of the biologically richest and most endangered ecosystems in North America Eminent ecologist Reed Noss tells the story of how southern grasslands arose and persisted over time and addresses questions that are fundamental for conserving these vital yet poorly understood ecosystems The author examines the natural history of southern grasslands their origin and history geologic vegetation and human biological hotspots and endangered ecosystems physical determinants of grassland distribution including ecology soils landform and hydrology fire herbivores and ecological interactions The final chapter presents a general conservation strategy for southern grasslands including prioritization protection restoration and management Also included are examples of ongoing restoration projects along with a prognosis for the future In addition to offering fascinating new information about these little studied ecosystems Noss demonstrates how natural history is central to the practice of conservation Natural history has been on a declining trajectory for decades as theory and experimentation have dominated the field of ecology Ecologists are coming to realize that these divergent approaches are in fact complementary and that pursuing them together can bring greater knowledge and understanding of how the natural world works and how we can best conserve it Forgotten Grasslands of the South explores the overarching importance of ecological processes in maintaining healthy ecosystems and is the first book of its kind to apply natural history in a modern comprehensive sense to the conservation of biodiversity across a broad region It sets a new standard for scientific literature and is essential reading not only for those who study and work to conserve the grasslands of the South but also for everyone who is fascinated by the natural world **Making Home Work** Jane E. Simonsen,2006-12-08 During the westward expansion of America white middle class ideals of home and domestic work were used to measure differences between white and Native American women Yet the vision of America as home was more than a metaphor for women s stake in the process of conquest it took deliberate work to create and uphold Treating white and indigenous women s struggles as part of the same history Jane E Simonsen argues that as both cultural workers and domestic laborers insisted upon the value of their work to civilization they exposed the inequalities integral to both the nation and the household Simonsen illuminates discussions about the value of women s work through analysis of texts and images created by writers women s rights activists reformers anthropologists photographers field matrons and Native American women She argues that women such as Caroline Soule Alice Fletcher E Jane Gay Anna Dawson Wilde and Angel DeCora called upon the rhetoric of sentimental domesticity ethnographic science public display and indigenous knowledge as they

sought to make the gendered and racial order of the nation visible through homes and the work performed in them Focusing on the range of materials through which domesticity was produced in the West Simonsen integrates new voices into the study of domesticity's imperial manifestations
