Paolo Portoghesi Projects Drawings 194:

The Baroque in Architectural Culture, 1880-1980 Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture **Unprecedented Realism** K. Michael Hays, Rodolfo Machado, Jorge Silvetti, 1995 For almost two decades the work of Rodolfo Machado and Jorge Silvetti has remained at the forefront of theoretical production Their rigorously detailed and exquisitely drawn projects characterize an attitude of aesthetic realism towards materials construction function and the cultural role of architecture Yet the conditions they address and the effects they produce are unprecedented Their projects synthesize seemingly incompatible images uses and typologies Unprecedented Realism is not an illustration of theory Rather what emerges is a constructive theory of architecture that understands the process of design itself as a distinct mode of knowledge as theoretical research that is still irreducibly architectural Unprecedented Realism presents both buildings and urban infrastructures Steps of Providence RI Entrance for Cranbrook Bloomfield Hills Mich Carnegie Mellon University Center Pittsburgh Pershing Square Los Angeles and Times Square New York City Along with the analytic text of K Michael Hays the volume includes critical essays by Alan Colquhoun George Baird Fars el Dahdah and Rodolphe el Khoury please see the Table of Contents [Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl](#) Avery Library, 1995 [Avery Index to Architectural Periodicals, 1995](#) Avery Library, 1997-02 **To Scale** Joan Kee, Emanuele Lugli, 2016-03-07 This innovative new volume offers an in depth exploration of scale one of the most crucial elements in the creation and reception of art
