Public Opinion Developments And Controversies In The 20th Century:

Public Opinion Slavko Splichal, 1999 A survey of the historical roots theoretical foundations and normative claims of 20th century conceptualizations of public opinion It examines research strategies such as polling the spiral of silence model and the role of the media in the formation and expression of public opinion Opinion Polls and the Media C. Holtz-Bacha, J. Strömbäck, 2012-04-05 Opinion Polls and the Media provides the most comprehensive analysis to date on the relationship between the media opinion polls and public opinion Looking at the extent to which the media through their use of opinion polls both reflect and shape public opinion it brings together a team of leading scholars and analyzes theoretical and methodological approaches to the media and their use of opinion polls The contributors explore how the media use opinion polls in a range of countries across the world and analyze the effects and uses of opinion polls by the public as well as political actors *The Anthem Companion to Ferdinand Tönnies* Christopher Adair-Totef, 2016-06-19 The Companion is a collection of articles covering noted German sociologist Ferdinand Tönnies full range of thinking Topics include Tönnies and the development of sociology Tönnies on community on globalization on gender and the family and on crime and law They also include Tönnies views on politics on public opinion as well as on Tönnies as Hobbes scholar and his relation to Georg Simmel Each of the essays is written in a clear manner and will be understandable to the non specialist Each essay is comprehensive and will be useful to the specialist The Companion is a welcome and significant contribution to our understanding of this noted sociologist and political thinker **Reading Primary Sources** Miriam Dobson, Benjamin Ziemann, 2008-09-03 How does the historian approach primary sources How do interpretations differ How can they be used to write history Reading Primary Sources goes a long way to providing answers for these questions In the first part of this unique volume the chapters give an overview of both traditional and new methodological approaches to the use of sources analyzing the way that these have changed over time The second part gives an overview of twelve different types of written sources including letters opinion polls surveillance reports diaries novels newspapers and dreams taking into account the huge expansion in the range of written primary sources used by historians over the last thirty years This book is an up to date introduction into the historical context of these different genres the ways they should be read the possible insights and results these sources offer and the pitfalls of their interpretation All of the chapters push the reader beyond a conventional understanding of source texts as mere reflections of a given reality instead fostering an understanding of how each of the various genres has to be seen as a medium in its own right Taking examples of sources from around the globe and also including a student friendly further reading section this is the perfect companion for every student of history who wants to engage with sources **Rethinking Media Pluralism** Kari Karppinen, 2013 Contends that the notions of media pluralism and diversity have been reduced to empty catchphrases or conflated with consumer choice and market competition

Framing China Ariane Knüsel, 2016-04-15 Framing China sheds new light on Western relations with and perceptions of

China in the first half of the twentieth century In this ground breaking book Ariane Kn sel examines how China was portrayed in political debates and the media in Britain the USA and Switzerland between 1900 and 1950 By focusing on the political economic cultural and social context that led to the construction of the particular images of China in each country the author demonstrates that national interests anxieties and issues influenced the way China was framed and resulted in different portrayals of China in each country The author s meticulous analysis of a vast amount of newspaper and magazine articles commentaries editorials cartoons and newsreels that have previously not been studied before also focuses on the transnational circulation of images of China While previous publications have dealt with the occurrence of the Yellow Peril and Red Menace in particular countries Framing China reveals that these images were interpreted differently in every nation because they both reflected and contributed to the discursive construction of nationhood in each country and were influenced by domestic issues cultural values pre existing stereotypes pressure groups and geopolitical aspirations **Mass**

Criticism David Berry, John Theobald, 2006 This work examines early mass media critics and their controversial writings and links them with their contemporaries to demonstrate the relevance of their legacy for debates on media power and media ethics Datafication of Public Opinion and the Public Sphere Slavko Splichal, 2022-07-12 The book anchored in stimulating

debates about the Enlightenment ideas of publicness analyses historical changes in the core phenomena of publicness possibilities conditions and obstacles to developing a public sphere in which the public reflexively creates articulates and expresses public opinion It is focused on the historical transformation from public use of reason through the identification of public opinion in opinion polls to contemporary opinion mining in which the Enlightenment idea of public expression of opinion has been displaced by the technology of extracting opinions It heralds a new critical impetus in theory and research of publicness at a time when critical social thought is sharply criticising and even abandoning the notion of the public sphere much like the notion of public opinion decades ago due to its predominantly administrative use
