Public Spending and the Poor

What We Know, What We Need to Know

Dominique van de Walle

Public spending is a potentially powerful instrument for fighting poverty. Generally, what is needed is universalism in certain spending categories (basic services) and finer targeting in others (for providing safety nets, for example).

Public Spending And The Poor Theory And Evidence:

Public Spending and the Poor Dominique Van de Walle, Kimberly Nead, 1995 The book offers a critical assessment of the state of current knowledge on the distributional impacts of public spending for developing and transition countries It focuses on the distribution of benefits from spending categories that have traditionally been seen as pro poor including education and health expenditures food subsidies cash transfers and public employment schemes **Democracy, Public Expenditures, and the Poor** Philip Keefer, Stuti Khemani, 2003 Countries vary systematically with respect to the incentives of politicians to provide broad public goods and to reduce poverty Even in developing countries that are democracies politicians often have incentives to divert resources to political rents and to private transfers that benefit a few citizens at the expense of many These distortions can be traced to imperfections in political markets that are greater in some countries than in others Keefer and Khemani review the theory and evidence on the impact of incomplete information of voters the lack of credibility of political promises and social polarization on political incentives They argue that the effects of these imperfections are large but that their implications are insufficiently integrated into the design of policy reforms aimed at improving the provision of public goods and reducing poverty This paper a joint product of the Investment Climate and Public Services Teams Development Research Group was originally prepared as a background study for World Development Report 2004 Making Services Work for Poor People Evaluating Public Spending Sanjay Pradhan, 1996-01-01 World Bank Discussion Paper No 318 Analyzes the condition needed for achieving sustainable private sector growth in the Visegrad countries the Czech Republic Hungary Poland and the Slovak Republic The analysis focuses on the legal and regulatory framework and institutional capacity the privatization of state enterprises and private sector development **Public Expenditures, Growth, and Poverty** Fan, Shenggen, 2008-05-11 Public Expenditures Growth and Poverty assesses the efficacy of poverty reduction programs in Latin America Africa and Asia by synthesizing studies conducted by the International Food Policy Research Institute over the past ten years Overall the studies find that investments in agricultural research infrastructure and human capital are beneficial in the long term while food aid and poverty reduction programs have little utility beyond immediately abating hunger and generating short run income effects The book develops a conceptual framework for analyzing public expenditures and their short and long run impact on poverty through various channels It surveys spending trends and analyzes the effect of growing public investment on urban and rural poverty through case studies of India China Thailand and Uganda And it highlights the advantages of directing spending toward public works programs that engage impoverished peoples rather than using the limited aid money on food subsidies and other passive donations Featuring discussions about the roles of various social safety net programs and a chapter devoted solely to the vexing poverty in sub Saharan Africa Public Expenditures Growth and Poverty will aid policy makers and encourage further more analytic study of worldwide poverty reduction programs **How Useful Are Benefit Incidence Analyses of Public Education and**

Health Spending Sawitree S. Asawanuchit, Mr. Hamid Reza Davoodi, Mr. Erwin Tiongson, 2003-11-01 This paper provides a primer on benefit incidence analysis BIA for macroeconomists and a new data set on the benefit incidence of education and health spending covering 56 countries over 1960-2000 representing a significant improvement in quality and coverage over existing compilations The paper demonstrates the usefulness of BIA in two dimensions First the paper finds among other things that overall education and health spending are poorly targeted benefits from primary education and primary health care go disproportionately to the middle class particularly in sub-Saharan Africa HIPC countries and transition economies but targeting has improved in the 1990s Second simple measures of association show that countries with a more propoor incidence of education and health spending tend to have better education and health outcomes good governance high per capita income and wider accessibility to information The paper explores policy implications of these findings *Assessing the Welfare Impacts of Public Spending* Dominique Van de Walle, 1996

Poverty and Policy in Latin America and the Caribbean Quentin Wodon, Robert L. Ayres, 2000 Although the progress toward poverty reduction remains sluggish other dimensions of social welfare in the Latin American and Caribbean LAC region show signs of improvement Adult literacy and school enrollment rates life expectancy at birth and the amount of access to safe water are increasing Nutrition indicators are also improving However other factors demonstrate that many problems persist especially the inequality between rich and poor This report analyzes the evolution of poverty and inequality in the LAC region from 1986 to 1996 with projections to 1998 It reviews the policies which have been advocated or implemented to reduce poverty The report combines the results of new empirical work using household surveys from 12 countries short theoretical developments and a review of the literature on issues related to poverty inequality and social policy in LAC Some of the theoretical developments introduce new research techniques Chapters three to six follow the framework proposed in the forthcoming World Development Report 2000 2001 The framework identifies three essential elements for poverty reduction Those elements include opportunities for the poor and investments in the human capital of the poor security through social safety nets and empowerment

Pro-Poor Macroeconomics G. Cornia, 2006-09-29 This book tackles the disagreements that affect those looking to establish the macroeconomic policies needed to halve poverty over the next ten years It presents a pro-poor macroeconomic policy allowing countries to recapture policy space help promote growth reduce inequality and diminish poverty in a sustainable way

Challenges of Social Cohesion in Times of Crisis M. Zupi, E. Estruch Puertas, 2010

Famine in Africa von Braun, Joachim, Teklu, Tesfaye, Webb, Patrick, 1999-01-01 Though famine has affected many parts of the world in the twentieth century the conditions that produce famine extreme poverty armed conflict economic and political turmoil and climate shocks are now most prevalent in Africa Researchers differ on how to address this problem effectively but their arguments are often not informed by empirical analysis from a famine context Broadening current theories and models of development for conquering famine Famine in Africa grounds its findings in long-term empirical research especially on the

impact of famine on households and markets The authors present the results of field work and other research from numerous parts of Africa with a particular focus on Botswana Ethiopia Niger Rwanda Sudan and Zimbabwe With these data the authors explain the factors that cause famines and assess efforts to mitigate and prevent them Famine in Africa is an important resource for international development specialists students and policymakers

East Asia Decentralizes ,2005-01-01 This report states that the future of East Asian countries depends on the capacity and performance of local and provincial governments Decentralization has unleashed local initiative and energy with new ways to deliver services to people with potential for continued improvement The report which focuses on six countries notes the differences in the approach to decentralizing government in Cambodia China Indonesia the Philippines Thailand and Vietnam

Social Quality:A Vision for Europe Laurent Van der Maesen,2001-01-31 This volume represents the outcome of two years of intensive debate about the future of Europe It aims to provide the European Union with a vision one that will unite all of its citizens and help to create the democratic legitimacy that the EU currently lacks It builds on the first book on social quality The Social Quality of Europe which introduced the concept and which has been enthusiastically received by both the scientific and policy communities The book develops three crucial elements of social quality the theoretical validity of the concept its practical application and its identity or genetic code It establishes an independent identity for social quality with a unique focus on the quality of the social which enables it to act as the rationale for economic social and cultural policies and therefore an escape route from the dominance of narrow economic thinking in policy making

Moldova--poverty Assessment ,1999-01-01 The poverty of individuals and households in Moldova have mirrored the causes of the overall slowdown in the economy Many enterprises found that the post Soviet economic structure resulted in a vast increase in the ratio of their input prices to the market price of their output Moldova is having an arduous transition from being a centrally planned economy to one that is guided by market signals This and the regional crisis in 1998 have exacerbated poverty and inequality levels in Moldova This report provides a detailed analysis of the situation regarding living standards in the country and provides a framework for policy for the Government s emerging social assistance program It examines the composition and distribution of poverty in Moldova how income and price shocks have affected the lives of the poor and the role of the Moldovan state in easing poverty It concentrates on analyzing the results for the Right Bank of Moldova so that any references to Moldova imply the Right Bank The report will interest members of the Moldovan government Bank staff and anyone studying Eastern Europe in general and Moldova in particular

Inequality in Asia and the Pacific Ravi Kanbur,Changyong Rhee,Juzhong Zhuang,2014-02-24 Asia s rapid economic growth has led to a significant reduction in extreme poverty but accompanied by rising inequality This book deals with three questions What have been the trends of inequality in Asia and the Pacific What are the key drivers of rising inequality in the region How should Asian countries respond to the rising inequality Technological change globalization and market oriented reform have been the key drivers of Asia s remarkable growth and

poverty reduction but they have also had significant distribution consequences These three drivers of growth cannot be hindered because they are the sources of productivity improvement and betterment of quality of life This book will be useful to those interested in policy options that could be deployed by Asian countries in confronting rising inequality

Fighting the Diseases of Poverty Philip Stevens, 2017-07-05 Public discussion of global healthcare issues is dominated by those who believe that top down government driven interventions are the solution to the myriad health problems suffered by people in less developed countries This thinking is responsible for a plethora of harmful policies ranging from a drive towards socialized healthcare systems to calls for the centralization and semi nationalization of pharmaceutical research and development to impractical but grandiose UN sponsored schemes for tackling HIV AIDS and malaria In spite of the abysmal track record of top down approaches non governmental organizations and UN agencies continue to promote them to the detriment of the private sector economic development and human health The resulting politicization of diseases such as HIV AIDS has led to a diversion of resources away from more easily treatable diseases that affect more people Meanwhile cost effective and simple interventions such as vaccination are being subordinated to other more politically correct diseases This centralizing mindset has also resulted in many governments in less developed countries attempting to plan and control universal healthcare systems which has encouraged rationing inequitable access and entrenched corruption It has also seriously undermined the effectiveness of overseas development aid Moreover the politicization of diseases such as HIV AIDS has led to a diversion of resources away from more easily treatable diseases that affect more people As a result cost effective and simple interventions are neglected by donors There has to date been little public discussion of the role of markets and their underlying institutions property rights and the rule of law in improving human health Economic growth and globalization has led to unprecedented improvements in human health The challenge is to enable the poorest countries to take part more fully in this process This work demonstrates how current

Equity in Educational Expenditures Jishnu Das, 2004 When there are externalities across households governments can improve economic outcomes by equitably subsidizing education But this chain of causality works only if 1 allocated resources reach the final recipients and 2 equity in public subsidies translates directly into equity in total educational expenditures including private spending at the household level Using a unique data set from Zambia Das shows that whether these conditions are met depends on the specific schemes used to allocate resources as well as the exact form of the subsidies First subsidies allocated through clear guidelines and legislated rules reached the final recipients but those allocated at the discretion of province and educational offices did not Second even those components of subsidies that were progressive in that the share of total subsidies for the poor was greater than the share for the non poor had no effect on inequality in total educational expenditures due to the crowding out of household spending This paper a product of Public Services Development Research Group is part of a larger effort in the group to understand the role of governments in improving the delivery of basic services
