supervisors and line personnel The book stresses the proper handling and management of NORM contaminated wastes and provides a firm understanding of the chemical properties of radioactive agents their toxicological effects and the appropriate containerization and disposal methods for these materials

Radioactivity and Radioactive Substances James Chadwick,1923 *The Radioactive Substances* Walter Makower,1908 **Radio-Active Substances** Marie Curie,2020-01-02 The object of the present work is the publication of researches which I have been carrying on for more than four years on radio active bodies I began these researches by a study of the phosphorescence of uranium discovered by M Becquerel The results to which I was led by this work promised to afford so interesting a field that Pierre Curie put aside the work on which he was engaged and joined me our object being the extraction of new radio active substances and the further study of their properties

The study of the radioactive elements is in some respects far more important than the study of the ordinary stable elements for the phenomena observed lead at once to the necessity of an atomic structure of matter and supply convincing proof of the individual existence of atoms The processes of radioactive transformations are indeed of fundamental nature they throw light on the detailed structure of the atom the problem which lies at the basis of physics and chemistry About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
