Aristotle on the Human Good Richard Kraut, 2021-02-09 Aristotle's Nicomachean Ethics which equates the ultimate end of human life with happiness eudaimonia is thought by many readers to argue that this highest goal consists in the largest possible aggregate of intrinsic goods Richard Kraut proposes instead that Aristotle identifies happiness with only one type of good excellent activity of the rational soul In defense of this reading Kraut discusses Aristotle's attempt to organize all human goods into a single structure so that each subordinate end is desirable for the sake of some higher goal This book also emphasizes the philosopher's hierarchy of natural kinds in which every type of creature achieves its good by imitating divine life As Kraut argues Aristotle's belief that thinking is the sole activity of the gods leads him to an intellectualist conception of the ethical virtues Aristotle values these traits because by subordinating emotion to reason they enhance our ability to lead a life devoted to philosophy or politics

The Highest Good in Aristotle and Kant Joachim Aufderheide, Ralf M. Bader, 2015 The notion of the highest good used to occupy a primary role in ethical theorising but has largely disappeared from the contemporary landscape The notion was central to both Aristotle's and Kant's ethical theories however a surprising observation given that their approaches to ethics are commonly conceived as being diametrically opposed The essays in this collection provide a comprehensive treatment of the highest good in Aristotle and Kant and show that even though there are important differences in terms of content there are also important similarities in terms of the structural features of Aristotle's and Kant's value theories By carefully analysing Aristotle's and Kant's theories of the highest good a team of experts in the field shed light on their respective ethical theories and highlight the richness complexity and fruitfulness of the notion of the highest good
