Recent Advances In Stochastic Calculus:

Recent Advances in Stochastic Calculus John S. Baras,Vincent Mirelli,1990

Calculus John S. Baras,Vincent Mirelli,1990-08-20 This volume includes the material presented in the Distinguished Lecture Series on Stochastic Calculus at the Systems Research Center of the University of Maryland at College Park in 1987 The purpose of these lecture series and the volume is to acquaint a wide audience with certain recent advances in stochastic calculus and with their applications to significant problems Stochastic systems play a fundamental role in automation and information engineering The analysis of stochastic systems depends in a fundamental way on stochastic calculus The subject matter is rather sophisticated requiring a broad mathematical sophistication and maturity Yet improper understanding or utilization of stochastic calculus in applications especially in engineering can lead to incorrect numerical results and faulty designs The material included in this volume appears for the first time in book form Considerable effort was undertaken by the authors to present the material in a form accessible to as wide an audience as possible Some of the material appears here for the first time while we believe that the targeted tutorial and survey nature of some of the chapters should be extremely helpful to researchers studying recent developments in stochastic calculus The topics were selected to cover some of the most important areas for stochastic control stochastic filtering and stochastic modeling

Recent Advances in Stochastic Modeling and Data Analysis Christos H. Skiadas,2007 This volume presents the most recent applied and methodological issues in stochastic modeling and data analysis The contributions cover various fields such as stochastic processes and applications data analysis methods and techniques Bayesian methods biostatistics econometrics sampling linear and nonlinear models networks and queues survival analysis and time series The volume presents new results with potential for solving real life problems and provides novel methods for solving these problems by analyzing the relevant data The use of recent advances in different fields are emphasized especially new optimization and statistical methods data warehouse data mining and knowledge systems neural computing and bioinformatics

Recent Development In Stochastic Dynamics And Stochastic Analysis Jinqiao Duan,Shunlong Luo,Caishi Wang,2010-02-08 Stochastic dynamical systems and stochastic analysis are of great interests not only to mathematicians but also to scientists in other areas Stochastic dynamical systems tools for modeling and simulation are highly demanded in investigating complex phenomena in for example environmental and geophysical sciences materials science life sciences physical and chemical sciences finance and economics The volume reflects an essentially timely and interesting subject and offers reviews on the recent and new developments in stochastic dynamics and stochastic analysis and also some possible future research directions Presenting a dozen chapters of survey papers and research by leading experts in the subject the volume is written with a wide audience in mind ranging from graduate students junior researchers to professionals of other specializations who are interested in the subject

Recent Advances in Applied Probability Ricardo Baeza-Yates,Joseph Glaz,Henryk Gzyl,Jürg Hüsler,José Luis Palacios,2006-02-28

Applied probability is a broad research area that is of interest to scientists in diverse disciplines in science and technology including anthropology biology communication theory economics epidemiology finance geography linguistics medicine meteorology operations research psychology quality control sociology and statistics Recent Advances in Applied Probability is a collection of survey articles that bring together the work of leading researchers in applied probability to present current research advances in this important area This volume will be of interest to graduate students and researchers whose research is closely connected to probability modelling and their applications It is suitable for one semester graduate level research seminar in applied probability

Recent Advances in Financial Engineering Masaaki Kijima, 2009 This volume contains the proceedings of the 2008 Daiwa International Workshop on Financial Engineering held in Tokyo The annual workshop is sponsored by the Daiwa Securities Group and serves as a bridge between leading academics and practitioners in the field This year the papers presented at the workshop have been refereed and published in a single volume to commemorate the 60th birthday of Professor Yuri Kabanov and to thank him for his contributions to the progress of mathematical finance in general and the Daiwa International Workshop in particular The book caters to academics and practitioners as well as graduate and postgraduate students of financial engineering Quantitative researchers on financial markets will also find it a useful resource

Recent Advances and Trends in Nonparametric Statistics M.G. Akritas, D.N. Politis, 2003-10-31 The advent of high speed affordable computers in the last two decades has given a new boost to the nonparametric way of thinking Classical nonparametric procedures such as function smoothing suddenly lost their abstract flavour as they became practically implementable In addition many previously unthinkable possibilities became mainstream prime examples include the bootstrap and resampling methods wavelets and nonlinear smoothers graphical methods data mining bioinformatics as well as the more recent algorithmic approaches such as bagging and boosting This volume is a collection of short articles most of which having a review component describing the state of the art of Nonparametric Statistics at the beginning of a new millennium Key features algorithmic approaches wavelets and nonlinear smoothers graphical methods and data mining biostatistics and bioinformatics bagging and boosting support vector machines resampling methods

Loeb Measures in Practice: Recent Advances Nigel J. Cutland, 2004-10-11 This expanded version of the 1997 European Mathematical Society Lectures given by the author in Helsinki begins with a self contained introduction to nonstandard analysis NSA and the construction of Loeb Measures which are rich measures discovered in 1975 by Peter Loeb using techniques from NSA Subsequent chapters sketch a range of recent applications of Loeb measures due to the author and his collaborators in such diverse fields as stochastic fluid mechanics stochastic calculus of variations Malliavin calculus and the mathematical finance theory The exposition is designed for a general audience and no previous knowledge of either NSA or the various fields of applications is assumed
