Receptors And Hormone Action:

Receptors and Hormone Action, 1978 *Receptors and Hormone Action* Lutz Birnbaumer, Bert O'Malley, 2013-10-22
Receptors and Hormone Action Volume III is part of a multivolume series that summarizes advances in the field of hormone action. The articles contained in these books are oriented toward a description of basic methodologies and model systems used in the exploration of the molecular bases of hormone action and are aimed at a broad spectrum of readers including those who have not yet worked in the field as well as those who have considerable expertise in one or another aspect of hormone action. This book opens with a chapter on the physiological properties of the thyroid hormone receptors in the intact animal. This is followed by separate chapters on adrenergic receptors, the study of hormone receptor interaction by measuring the biological responses induced by the actions of gonadotropins on Leydig cells, chemical and immunochemical properties of hCG and PMSG treated with glycosidases, and binding of follitropin (FSH) to rat testes. Subsequent chapters deal with the control of changes of gonadotropin responsiveness of the granulosa cell during follicular maturation, regulation of prolactin receptors by steroid hormones, and the role of membrane protein phosphorylation in the effects of neurotransmitters.

Receptors and Hormone Action Robert C. Angerer, 1977 **Receptors and Hormone Action** Bert O'Malley, Lutz Birnbaumer, 2013-10-22
Receptors and Hormone Action Volume II is part of a multivolume series that summarizes advances in the field of hormone action. The articles contained in these books are oriented toward a description of basic methodologies and model systems used in the exploration of the molecular bases of hormone action and are aimed at a broad spectrum of readers including those who have not yet worked in the field as well as those who have considerable expertise in one or another aspect of hormone action. The book opens with a chapter on the relationship between steroid hormone receptor binding and biologic response. This is followed by separate chapters on conformational forms of the estrogen receptor, the relationship of early responses of the cell to estrogen to DNA synthesis, the role of receptors in the anabolic action of androgens, and biology of progesterone receptors. Subsequent chapters deal with the molecular structure and analysis of progesterone receptors, the regulation of gene expression by glucocorticoid hormones, studies of the aldosterone receptor in the adrenalectomized rat kidney, and existence of gonadal steroid receptors in brain and pituitary tissue.

Receptors and Hormone Action Bert W. O'Malley, Lutz Birnbaumer, 1977 **Luteinizing Hormone Action and Receptors** Mario Ascoli, 2019-08-15
First published in 1985. The principle reason for publishing this book is to put together current knowledge about the actions of luteinizing hormone in a single volume. *Receptors and Hormone Action* Bert W. O'Malley, Lutz Birnbaumer, 1977 Hormone Action in Plant Development — A Critical Appraisal G. V. Hoar, J. R. Lenton, M. B. Jackson, 2013-10-22
Hormone Action in Plant Development: A Critical Appraisal documents the proceedings of the Tenth Long Ashton Symposium, September 1986. The symposium was convened to assess the evidence for and against the view that plant hormones are endogenous regulators of plant development. The meeting also aimed to focus

on and assess promising strategies for future research The symposium opened with the Douglas Wills Lecture given by Professor Carl Leopold In many respects progress in research on animal hormones seems greater than in the plant sciences and there may well be merit in following progress in animal hormone research as suggested by Professor Leopold The symposium was comprised of four sessions The introductory session considered the coordinating role of hormones in plant growth and development and focused on hormone action at the molecular level including their binding to receptors and their control of gene expression The next two sessions embraced contributions on the experimental manipulation of development by genetic notably by biochemical mutants chemical for example with gibberellin biosynthesis inhibitors and environmental including drought stress means All these approaches consolidated the central importance of hormones in plant growth In the final session three speakers suggested some promising avenues for future research into the physiology biochemistry and molecular biology of plant hormones

Hormone Receptors David Klachko, 2013-12-19 The Eleventh Midwest Conference on Endocrinology and Metabolism in September 1975 brought together a number of leading investigators in the areas of steroid peptide acetylcholine and catecholamine hormone receptor studies This book is based upon the reports of investigations into hormone receptor biochemistry and physiology presented at the Conference as well as on the ensuing discussions However many of the manuscripts were written after the Conference Because of this the reader will find that some literature references and results of investigations are more up to date than the Conference date would suggest Perusal of this and previous volumes will attest to the high quality of this annual conference due primarily to the efforts of the Planning Committee We also acknowledge the superb efforts of the staff of Conferences and Short Courses for their assistance in organizing the Conference and Mrs Linda Bennett for expert secretarial assistance in the typing of the book Last but certainly not least we express our appreciation to the various organizations that provided the necessary financial assistance Leonard R Forte John M Franz David M Klachko vii Contents The Receptor Concept Prejudice Prediction and Paradox Oscar M Hechter Discussion 41 DeGroot Hechter Campbell Freed Barnawell Morgan Siegel Nuclear Receptors for Thyroid Hormone 45 Leslie J DeGroot 69 Discussion

Molecular Mechanisms of Hormone Action Ulrich Gehring, Ernst J.M. Helmreich, Günter Schultz, 2012-12-06 Recent years have seen tremendous progress in the field of hormone action and consequent signal transduction The 40th Colloquium Mosbach was devoted to the discussion of results concerning the molecular process of hormone action especially the processes following hormone binding to the corresponding receptors Structural and functional aspects of steroid hormone receptors as well as ion channel coupled and enzyme linked receptors were treated in detail Particular interest focussed on the latest results concerning transcriptional control protein phosphorylation the role of G Proteins oncogene proteins involvement of phospholipases and the regulation of ion channels
