Olick, Vered Vinitzky-Seroussi, Daniel Levy, 2011 There are few terms or concepts that have in the last twenty or so years rivaled collective memory for attention in the humanities and social sciences Indeed use of the term has extended far beyond scholarship to the realm of politics and journalism where it has appeared in speeches at the centers of power and on the front pages of the world's leading newspapers The current efflorescence of interest in memory however is no mere passing fad it is a hallmark characteristic of our age and a crucial site for understanding our present social political and cultural conditions Scholars and others in numerous fields have thus employed the concept of collective memory sociological in origin to guide their inquiries into diverse though allegedly connected phenomena Nevertheless there remains a great deal of confusion about the meaning origin and implication of the term and the field of inquiry it underwrites The Collective Memory Reader presents organizes and evaluates past work and contemporary contributions on the questions raised under the rubric of collective memory Combining seminal texts hard to find classics previously untranslated references and contemporary landmarks it will serve as an essential resource for teaching and research in the field In addition in both its selections as well as in its editorial materials it suggests a novel life story for the field one that appreciates recent innovations but only against the background of a long history In addition to its major editorial introduction which outlines a useful past for contemporary memory studies The Collective Memory Reader includes five sections Precursors and Classics History Memory and Identity Power Politics and Contestation Media and Modes of Transmission Memory Justice and the Contemporary Epoch comprising ninety one texts In addition to the essay introducing the entire volume a brief editorial essay introduces each of the sections while brief capsules frame each of the 91 texts *The Routledge Handbook of Philosophy of Memory* Sven Bernecker, Kourken Michaelian, 2017-07-14 Memory occupies a fundamental place in philosophy playing a central role not only in the history of philosophy but also in philosophy of mind epistemology and ethics Yet the philosophy of memory has only recently emerged as an area of study and research in its own right The Routledge Handbook of Philosophy of Memory is an outstanding reference source on the key topics problems and debates in this exciting area and is the first philosophical collection of its kind The forty eight chapters are written by an international team of contributors and divided into nine parts The nature of memory The metaphysics of

Cognitive Poetics Geert Brône, Jeroen Vandaele, 2009 For more than two decades now cognitive science has been making overtures to literature and literary studies Only recently however cognitive linguistics and poetics seem to be moving towards a more serious and reciprocal type of interdisciplinarity In coupling cognitive linguistics and poetics cognitive poetics aim to offer cognitive readings of literary texts and formulate specific hypotheses concerning the relationship between aesthetic meaning effects and patterns in the cognitive construal and processing of literary texts One of the basic assumptions of the endeavour is that some of the key topics in poetics such as the construction of text worlds characterization narrative perspective distancing discourse etc may be fruitfully approached by applying cognitive linguistic concepts and insights such as embodied cognition metaphor mental spaces iconicity construction grammar figure ground alignment etc in an attempt to support enrich or adjust traditional poetic analysis Conversely the tradition of poetics may support frame or call into question insights from cognitive linguistics In order to capture the goals gains and gaps of this rapidly growing interdisciplinary field of research this volume brings together some of the key players and critics of cognitive poetics The eleven chapters are grouped into four major sections each dealing with central concerns of the field i the cognitive mechanisms discursive means

and mental products related to narrativity Semino Herman Culpeper ii the different incarnations of the concept of figure in cognitive poetics Freeman Steen Tsur iii the procedures that are meant to express or create discursive attitudes like humour irony or distance in general Antonopoulou and Nikiforidou Dancygier and Vandelandotte Giora et al and iv a critical assessment of the current state of affairs in cognitive poetics and more specifically the incorporation of insights from cognitive linguistics as only one of the contributing fields in the interdisciplinary conglomerate of cognitive science Louwerse and Van Peer Sternberg The ensuing dialogue between cognitive and literary partners as well as between advocates and opponents is promoted through the use of short response articles included after ten chapters of the volume Geert Br ne Katholieke Universiteit Leuven Belgium Jeroen Vandaele University of Oslo Norway Revisiting Loss Wojciech Drag, 2014-07-03 Loss is the core experience which determines the identity of Kazuo Ishiguro's narrators and shapes their subsequent lives Whether a traumatic ordeal an act of social degradation a failed relationship or a loss of home the painful event serves as a sharp dividing line between the earlier meaningful past and the period afterwards which is infused with a sense of lack dissatisfaction and nostalgia Ishiguro's narrators have been unable to confine their loss to the past and remain preoccupied by its legacy which ranges from suppressed guilt to a keen sense of failure or disappointment Their immersion in the past finds expression in the narratives which they weave in order to articulate justify or merely understand their experiences Their reconstructions of the past are interpreted as exercises in misremembering and self deception which enable them to sustain their illusions and save them from despair Revisiting Loss is the first book length study of memory encompassing Ishiguro's entire novelistic output It adopts a highly interdisciplinary approach combining a selection of philosophical Jacques Derrida Paul Ricoeur and Jean Starobinski and psychological perspectives Sigmund Freud Frederic Bartlett Jacques Lacan and Daniel L Schacter The book offers a thoroughly researched critical survey drawing on all published critical monographs and collections of academic articles on Ishiguro's work **A Life in Cognition** Judit Gervain, Gergely Csibra, Kristóf Kovács, 2021-12-02 This edited book offers a broad selection of interdisciplinary studies within cognitive science The book illustrates and documents how cognitive science offers a unifying framework for the interaction of fields of study focusing on the human mind from linguistics and philosophy to psychology and the history of science A selection of renowned contributors provides authoritative historical theoretical and empirical perspectives on more than six decades of research with a special focus on the progress of cognitive science in Central Europe Readers encounter a bird's eye view of geographical and linguistic diversity brought about by the cognitive revolution as it is reflected in the writings of leading authors many of whom are former students and collaborators of Csaba Pl h a key figure of the cognitive turn in Central Europe to whom this book is dedicated The book appeals to students and researchers looking for the ways various approaches to the mind and the brain intersect **The Psychology of Sympathy** Lauren Wispé, 1991-05-31 The origins of this book probably go back to Gordon Allport's seminar in social psychology at Harvard during the late 1940s and to the

invitation from Gardner Lindzey some years later to contribute a section on Sympathy and Empathy to the International Encyclopedia of the Social Sciences 1968 Since those early beginnings the book has been in the process of becoming During that time I have benefited greatly from the knowledge and assistance of many colleagues especially the following who read and commented upon portions of the manuscript Raymond Gastil the late Joseph Katz David McClelland Jitendra Mohanty Paul Mussen Richard Solomon and Bernard Weiner To Kenneth Merrill for a close reading of the Hume material and to M Brewster Smith for a careful reading of and suggestions on Chapters 7 and 8 I am especially indebted Beverly Joyce withstood constant interruptions to provide much needed library assistance and Vivian Wheeler gave generously of her excellent editorial experience and knowledge A fellowship at the Battelle Research Center in Seattle and an appointment as a visiting scholar at Harvard were of incalculable help providing opportunity stimulation and freedom from teaching responsibilities To all of the above I am deeply indebted Just a few words about the organization of this book
