Stefanov, Charles Redman, 2007-12-10 Despite the promising and exciting possibilities presented by new and fast developing remote sensing technologies applied to urban areas there is still a gap perceived between the generally

academic and research focused spectrum of results offered by the urban remote sensing community and the application of these data and products by the local governmental bodies of urban cities and regions While there is no end of interesting science questions that we can ask about cities sometimes these questions don't match well with what the operational problems and concerns of a given city are The authors present data from six urban regions from all over the world They explain what the important questions are and how one can use data and scientific skills to help answer them

Environmental Sensing James K. Lein, 2011-09-18 Remote sensing has witnessed a renaissance as new sensor systems data collection capabilities and image processing methodologies have expanded the technological capabilities of this science into new and important applications areas Perhaps nowhere has this trend been more evident than in the study of earth environments Within this broad application area remote sensing has proven to be an invaluable asset supporting timely data gathering at a range of synoptic scales facilitating the mapping of complex landscapes and promoting the analysis of environmental process Yet remote sensing's contribution to the study of human environmental interaction is scattered throughout a rich and diverse literature spanning the social and physical sciences which frustrates access to and the sharing of the knowledge gained through these recent advances and inhibits the operational use of these methods and techniques in day to day environmental practice a recognized gap that reduces the effectiveness of environmental management programs The objective of this book is to address this gap and provide the synthesis of method and application that is currently missing in the environmental science re introducing remote sensing as an important decision support technology

Remote Sensing Handbook - Three Volume Set Prasad Thenkabail, 2018-10-03 A volume in the three volume Remote Sensing Handbook series Remote Sensing of Water Resources Disasters and Urban Studies documents the scientific and methodological advances that have taken place during the last 50 years The other two volumes in the series are Remotely Sensed Data Characterization Classification and Accuracies and Land Reso

The Normalized Difference Vegetation Index Nathalie Pettorelli, 2013-10-10 There has been a recent surge of interest in remote sensing and its use in ecology and conservation but this is the first book to focus explicitly on the NDVI Normalised Difference Vegetation Index a simple numerical indicator and powerful tool that can be used to assess spatio temporal changes in green vegetation The NDVI opens the possibility of addressing questions on scales inaccessible to ground based methods alone it is mostly freely available with global coverage over several decades This novel text provides an authoritative overview of the principles and possible applications of the NDVI in ecology environmental and wildlife management and conservation NDVI data can provide valuable information about temporal and spatial changes in vegetation distribution productivity and dynamics allowing monitoring of habitat degradation and fragmentation or assessment of the ecological effects of climatic disasters such as drought or fire The NDVI has also provided ecologists with a promising way to couple vegetation with animal distribution abundance movement survival and reproductive parameters Over the last few decades numerous studies have highlighted the potential key role of satellite data and the NDVI in macroecology plant ecology animal population dynamics environmental monitoring habitat selection and habitat use studies and paleoecology The chapters are organised around two

sections the first detailing vegetation indices and the NDVI the principles behind the NDVI its correlation with climate the available NDVI datasets and the possible complications and errors associated with the use of this satellite based vegetation index The second section discusses the possible applications of the NDVI in ecology environmental and wildlife management and conservation

The SAGE Encyclopedia of Educational Technology J. Michael Spector, 2015-01-29 The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning While using innovative technology to educate individuals is certainly not a new topic how it is approached adapted and used toward the services of achieving real gains in student performance is extremely pertinent This two volume encyclopedia explores such issues focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices services and specific techniques As technology evolves and becomes even more low cost easy to use and more accessible the education sector will evolve alongside it For instance issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia Features A collection of 300 350 entries are organized in A to Z fashion in 2 volumes available in a choice of print or electronic formats Entries authored by key figures in the field conclude with cross references and further readings A detailed index the Reader's Guide themes and cross references combine for search and browse in the electronic version This reference encyclopedia is a reliable and precise source on educational technology and a must have reference for all academic libraries
