Reverence For The Soul

Francis Newman

Reverence For The Soul:

Reverence for the Soul Richard Schain, 2001-05-15 This is a philosophical work dressed out in journal form It requires readers receptive to a point of view transcending the current intellectually dominant scientific monism The writer develops his conviction that Homo sapiens needs and wants to develop his metaphysical self the soul in traditional terminology The contemporary scientific world view is predicated on an opposite viewpoint which is that there is no such thing as a soul there is only a network of neurons within the brain resulting in physical activities affecting a physical world and creating a physical self Amidst the description of the writer's conflicts with this prevailing world view are interspersed discussions about brain mind relationships about the question of the soul about dualism versus monism and the nature of the real world about purposes in writing and about personal values arising from all these matters Reverence for one's own soul is the ultimate value arrived at by the writer This is not a religious work it may in fact be regarded as anti religious even blasphemous by those disposed to such judgements Nevertheless the writer believes in the value of an intellectual conscience and is not inclined to offend it through deference to superannuated or self serving societal entities offering opiates for metaphysical needs It is well known by now that all genuine philosophy represents the personality and experiences of a philosopher however much it may be covered over with a scholarly style The philosopher wishing to pose in the white coat of the scientific investigator is a ridiculous figure who should be confined to circus entertainment Meaningful value oriented philosophy and what other kind is there is subjective in nature albeit requiring knowledge experience and intellect in its formulation An unpublished monograph of the writer available to those interested is entitled The Subjective Will to Metaphysical Existence This title makes explicit what is presented in more personalized and literary form in Reverence for the Soul

Transforming The Soul: Volume 1 Rudolf Steiner, 2013-11-06 The spiritual scientific investigator has to transform the soul itself into an instrument then when his soul is awakened and he can see into a spiritual world he experiences on a higher level a similar great moment as blind people do when having been operated upon they look at a world they have not seen before In a key series of lectures on personal development Rudolf Steiner explains that the central mission of spiritual science is to enable people to ascend in full consciousness to a knowledge of spiritual realities But given that the means to achieve spiritual perception are now widely available the danger exists that some individuals will gain access to the spiritual world whilst harbouring impure motives This can lead to a distorted understanding and vision of that world Steiner's emphasis therefore is on the preparatory steps the metamorphosis and purification of the human soul required for achieving true spiritual enlightenment Life itself teaches and prepares us for progress and anthroposophy explains and brings this to consciousness In some of his most lucid lectures Steiner describes the missions of anger truth and reverence the significance of human character the meaning of asceticism and illness and the phenomenon of egoism He also clarifies the differences between Buddhism and Christianity describes the goal of spiritual science and makes some esoteric

set out to construct new theological ideas Andrea Nightingale argues that Plato shared in this culture and appropriates specific Greek religious discourses and practices to present his metaphysical philosophy In particular he uses the Greek conception of divine epiphany a god appearing to humans to claim that the Forms manifest their divinity epiphanically to the philosopher with the result that the human soul becomes divine by contemplating these Forms and the cosmos Nightingale also offers a detailed discussion of the Eleusinian Mysteries and the Orphic Mysteries and shows how these mystery religions influenced Plato's thinking This book offers a robust challenge to the idea that Plato is a secular thinker How to Know Higher Worlds Rudolf Steiner, 2013-03-07 There slumber in every human being faculties by means of which she can acquire for herself a knowledge of higher worlds Mystics Gnostics Theosophists all speak of a world of soul and spirit which for them is just as real as the world we see with our physical eyes and touch with our physical hands At every moment the listener may say to herself that of which they speak I too can learn if I develop within myself certain powers which today still slumber within me There remains only one question how to set to work to develop such faculties **Postformal Education** Jennifer M. Gidley, 2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow's challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre-service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past Gidley's challenge is to co-evolve a radically new education All who seek to play a part must read this book Brian J Caldwell PhD Educational Transformations former Dean of Education at the University of Melbourne and Deputy Chair Australian Curriculum Assessment and Reporting Authority ACARA The Greatest Books of

rya Vi uddhas gara believes firmly that human birth must be utilized as a springboard for spiritual development rather than
for physical or material development This can be attained only when one holds the belief that the body and the soul are two
utterly distinct entities and that the soul needs to be attended to as the first priority in all human endeavors If this belief
percolates down mankind we shall witness a world that is rid of strife deprivation and antagonism No one will then play with
the ways of nature on this planet earth Right thoughts are a prerequisite for world development Your thoughts must focus on
development and well being of the world besides of the self The world today is beset by several wrong beliefs and tendencies
that have become natural to most of us but are causing great harm to self and others The Thoughts confronts many such
issues head on with inviolable logic and scriptural attestation This fact alone makes the book essential reading for all
thoughtful persons globally The book includes an Index of the scriptural terms
