America's Great-Power Opportunity Ali Wyne, 2022-04-07 It has become axiomatic to contend that U S foreign policy must adapt to an era of renewed great power competition The United States went on a quarter century strategic detour after the Cold War the argument goes basking in triumphalism and getting bogged down in the Middle East Now China and Russia are increasingly challenging its influence and undercutting the order it has led since 1945 How should it respond to these two formidable authoritarian powers In this timely intervention Ali Wyne offers the first detailed critique of great power competition as a foreign policy framework warning that it could render the United States defensive and reactive He exhorts Washington to find a middle ground between complacency and consternation selectively contesting Beijing and Moscow but not allowing their decisions to determine its own course Analyzing a resurgent China a disruptive Russia and a deepening Sino Russian entente Wyne explains how the United States can seize the great power opportunity at hand to manage all three of those phenomena confidently while renewing itself at home and abroad Also available as an audiobook **The**

Revitalizing America's Economically-distressed Communities Hearing United States. Congress. House. Committee on Small Business, 1998 *Competitiveness and American Society* Steven L. Goldman, 1993 The claim that U S industry is in a crisis that it stands at a turning point in its competitiveness with foreign rivals seems on the face of it an objective description of the prevailing state of affairs But what does competitiveness mean when it is used to describe an entire industry an economy a nation What is the relationship between industrial competitiveness and the personal and social value placed on competition What are the social roots of competition that have made it an enduring American value How does the current competitiveness debate serve special interests seeking to preserve or extend their social power The essays presented in *Competitiveness and American Society* all written especially for this volume address these and related questions The

answers they offer reveal the political character of the competitiveness debate as well as the complexity and ambiguity of the value judgments with which competitiveness issues are entangled. The perspectives taken by the authors range from the austere economic through the political and managerial to the richly sociological. The opening essay rejects the possibility let alone the factuality of a national competitiveness crisis; the closing essay explicitly identifies the root causes of the crisis as national. Other essays look to relationships among culture, society and industry in the U.S. and Japan as factors shaping America's competitiveness crisis and the Western European response to that crisis. One essay explores mechanisms that would allow the public to play a constructive role in managerial decision making; another explores the complications that have followed from mandating the management of resources in accordance with social values. The common denominator of all of the essays is an engagement with the role that social value judgments play in determining the competitiveness of individual firms. For some, this role is broad and definitive; for others, it is narrowly circumscribed. Taken together, the essays in *Competitiveness and American Society* establish the need for wider participation in the debate over the competitiveness of U.S. industry than has been held so far. What is needed is a debate that addresses the quality of American life and the health of the industrial sector of the economy; a debate that opens for public deliberation the changes in personal and social values and institutions that will be required to shape that interdependence.

Peace Politics Paul Joseph, 1993. The end of the Cold War promises a new era of global peace in which domestic reform could be achieved. Yet armed conflict persists throughout the world. Economic inequality, declining public services, environmental degradation and other forms of domestic decay threaten the quality of life in the U.S. In *Peace Politics*, Paul Joseph develops a systematic comparison of the old and new world orders that links foreign and domestic affairs. By examining the issues that are central to any realignment of American politics, he offers a sweeping account of the possibilities and obstacles for progressive change over the 1990s. Acknowledging that all nations and people have a right to security, he argues for a global attack against a broad range of shared threats including human rights violations, nuclear devastation, poverty and despair, politically repressive governments and environmental threats. Joseph also addresses the links between the militarism in the U.S. and deforestation of the Amazon, the uncertain victory of the Gulf War, the effect of public opinion on security issues, the impact of peace movements, nuclear weapons policy and the need for a peace dividend. Linking war and peace issues with environmental renewal, stronger democracy, economic justice and citizen activism, *Peace Politics* is a rallying cry for rationality, genuine security and mutual survival.

Author note: Paul Joseph is Associate Professor of Sociology and Chair of the Anthropology, Sociology Department and Peace and Justice Studies Program at Tufts University.
