Ireland, *Care Work* Madonna Harrington Meyer, 2002-05-03 *Care Work* is a collection of original essays on the complexities of providing care. These essays emphasize how social policies intersect with gender, race, and class to alternately compel women to perform care work and to constrain their ability to do so. Leading international scholars from a range of disciplines provide a groundbreaking analysis of the work of caring in the context of the family, the market, and the welfare state.

Regulation of Health: Case Studies of Sweden and Switzerland Peter Zweifel, Carl Hampus Lyttkens, Lars Söderström, 2012-12-06 Health care arguably is the single most regulated industry in industrial countries and possibly in newly industrialized and developing countries as well. But what exactly is being regulated? What are the instruments used and what are the effects and side effects of such regulation? *Regulation of Health: Case Studies of Sweden and Switzerland* seeks to resolve problems in answering these key questions regarding the health care sector in two countries: Sweden and Switzerland. The volume contains a series of studies that compare the regulation of health and health care in these two apparently very similar countries in considerable detail. The contributing teams acquired a great deal of knowledge about health regulation in both countries; they also derived comparative predictions when regulation differs using actual observations to check whether these predictions are borne out. These comparisons are based on the conditions prevailing in the mid nineties.

Health, the Medical Profession, and Regulation Peter Zweifel, 2012-12-06 *Health, the Medical Profession, and Regulation* presents new evidence concerning health and the environment, inequality of health in many countries, and the compatibility of different quality of life measurements along with new solutions to problems of health policy. The book is grouped into three sections. Section I comprising six papers looks into the determinants of people's health. Section II consists of three papers and deals with the supply side of the market for health care services. Finally, Section III contains three contributions devoted to health regulation. The intended market for this volume includes but is not limited to health economists, policy makers, insurers, and governmental advisors who need to stay abreast of the latest developments in health services research worldwide.
