*The Essential Family Guide to Caring for Older People* Deborah Stone, 2019-11-14 No one wants to think about getting older. It's true. At any age when things are moving along normally day to day and everyone seems fit and well there seems no reason to think about future problems that your friends and relatives might and probably will come across as they age. In fact it might even seem a little morbid to think such thoughts or possibly even tempting fate. Yet there will come a time when you must raise these issues and ideally this should be before any problems arise. *The Essential Family Guide to Caring for Older People* is the ultimate source of information and help for families with care responsibilities. Deborah Stone draws on her extensive experience working in elder care to offer practical advice on every aspect of the field in depth. Topics range from how to get help immediately, legal information, care funding options, a guide to useful technology and advice on the main physical and mental health issues that affect older people. Plus guidance is given on dealing with social services and ensuring you choose the right care for your situations. Crucially the book also offers help on how to cope as a carer with practical advice on juggling family work and your caring responsibilities while looking after yourself. *Caring for Older People in Nursing* Sue Barker, 2013-11-12 This book is part of the Transforming Nursing Practice series written specifically to support nursing students on the new degree programme. As medical advances become more sophisticated average life expectancies continue to grow. This presents significant challenges to the healthcare system and caring for older people is now the concern of every nurse. This book aims to help you understand how to care for older people in any care setting. It uniquely focuses on person-centred, humanised care in addition to physical care, helping you to examine attitudes towards older people in healthcare and combat negative stereotypes. The book takes a positive stance on ageing, celebrating the fact that in the Western world we live longer and healthier with a focus on the wellbeing of the individual. Key features: Easy to read introduction written specifically for nursing students with a chapter on making the most of your placements with older people. Theory is linked to practice through case studies and scenarios and shows the lived experiences of the older person. Linked to the latest NMC Standards and Essential Skills Clusters for degree level education. Plenty of activities help you to build critical thinking and graduate skills. **The Destiny Series Books One to Three** Patricia Dixon, 2019-10-23 The first three novels in the acclaimed series full of romance, betrayal and family drama on the French countryside. Kilmartin, 2021-04-20 *The Fictions that Shape Men's Lives* is structured around a number of key fictions of masculinity such as beliefs in biological determinism the inevitability of men's violence and the opposition of the sexes and proceeds to expose them to be wholly or partially unfounded Examining the social pressure to behave and experience the self in ways that culture prescribes for the bodies we are perceived as having this book provides an awareness of widely held but distorted assumptions of gender It also seeks to put men into the position to resist masculine social pressures when conforming to it conflicts with important life goals or values and or causes harm Making use of an informal storytelling style provides an accessibility to those interested in breaking down their preconceptions of gender and masculinity as well making links to key theories and concepts This is a lively and engaging book for undergraduates studying introduction to Gender Sexuality and Masculinity courses *Increase your Brainability—and Reduce your Risk of Dementia* Charles Alessi, Larry W.

Chambers, Muir Gray, 2021-05-27 Dreaded by many people as an inevitable part of normal aging Dementia has displaced Cancer as the most feared health problem Cancer continues to be a serious condition but it is often curable and almost always treatable In contrast the fear of dementia is complicated by the fear of ageing and by muddled thinking about its relationship with Alzheimer's disease Yet there is no reason to be disheartened Ever evolving scientific evidence means that we can be increasingly optimistic about the future and on going research shows that the problems we dread dementia disability and dependency can be controlled By taking steps to limit damage to the brain caused by stress sleep problems and inactivity throughout our lives it is more than possible to substantially reduce your risk of dementia Equally a loss of physical fitness which starts long before old age is preventable Based on research from the Optimal Ageing Programme and full of practical evidence based advice on managing the major risk factors underpinning dementia this book will inspire readers to fight back against the modern environment and negative societal attitudes Through simple but effective lifestyle changes that anyone can make everyone can take positive action to increase their brainability It is never too late to change your life reduce your risk and live better for longer [Computerworld](#), 1999-05-24 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network
