Nature At War:

Nature at War Thomas Robertson, Richard P. Tucker, Nicholas B. Breyfogle, Peter Mansoor, 2020-04-02 World War II was the largest and most destructive conflict in human history. It was an existential struggle that pitted irreconcilable political systems and ideologies against one another across the globe in a decade of violence unlike any other. There is little doubt today that the United States had to engage in the fighting especially after the Japanese attack on Pearl Harbor on December 7 1941. The conflict was in the words of historians Allan Millett and Williamson Murray a war to be won. As the world's largest industrial power the United States put forth a supreme effort to produce the weapons munitions and military formations essential to achieving victory. When the war finally ended the finale signaled by atomic mushroom clouds over Hiroshima and Nagasaki upwards of 60 million people had perished in the inferno. Of course the human toll represented only part of the devastation global environments also suffered greatly. The growth and devastation of the Second World War significantly changed American landscapes as well. The war created or significantly expanded a number of industries put land to new uses spurred urbanization and left a legacy of pollution that would in time create a new term Superfund site.

Rethinking the Nature of War Isabelle Duyvesteyn, Jan Angstrom, 2005 Have globalization virulent ethnic differences and globally operating insurgents fundamentally changed the nature of war in the last decade. Interpretations of war as driven by politics and state rationale formulated most importantly by the 19th century practitioner Carl von Clausewitz have received strong criticism. Political explanations have been said to fall short in explaining conflicts in the Balkans Africa Asia and the attacks of 11 September 2001 in the United States. This book re-evaluates these criticisms not only by scrutinising Clausewitz's arguments and their applicability but also by a careful reading of the criticism itself. In doing so it presents empirical evidence on the basis of several case studies addressing various aspects of modern war such as the actors conduct and purposes of war.

Theory and Nature of War, 1993 **Theory and Nature of War: Syllabus**, 1993 *Theory and Nature of War: readings*, 1993 **The Nature of War in the Information Age** David J. Lonsdale, 2004-06 Much of today's Revolution in Military Affairs (RMA) literature subscribes to the idea that the information age will witness a transformation in the very nature of war. In this book David Lonsdale puts that notion to the test. **The Nature of War** Ron Tira, 2009-10-05 Examines the different aspects that characterise a war from the centre of gravity to be attacked to the elements constituting military decision as they are manifested in simple symmetrical wars asymmetrical wars versus a state opponent guerrilla warfare parallel warfare and next generation warfare. **Globalization and the Nature of War** Antulio J. Echevarria (II), 2003

War and Nature Edmund Russell, 2001-02-12 This 2001 book shows the intersection of chemical warfare and pest control in the twentieth century. *Nature at War* Hal Butler, 1976-01-01 *War and Nature* Jurgen Brauer, 2009-10-15 The inherent dangers of war zones constrain even the most ardent researchers with the consequence that little has been known for certain about the effects of war on stable environments. *War and Nature* sifts through the available data from past wars to

evaluate the actual impact that combat has on natural surroundings Examining conflicts of various kinds the long war in tropical Vietnam the relatively brief and highly technical wars in the Persian Gulf and various civil wars in Africa and South Central Asia fought with small arms Brauer asks whether differences in technology location and duration are critical in causing environmental and humanitarian harm A number of unexpected conclusions are drawn from this data including practical agendas for collecting scientific evidence in future wars and suggestions about what the world s environmental and conservation organizations can do One thing War and Nature does is to show us how globalization can be a force harnessed for good ends

War, Peace, and Human Nature Douglas P. Fry,2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon.com

The Rights of War and Peace, Including the Law of Nature and of Nations Hugo Grotius,2007-10-01 The Rights of War and Peace establishes a system of international law based on the concept of natural law Natural law as Grotius describes it is law that applies to all people regardless of country or nationality This law establishes concepts like justifiable war and natural justice Grotius discusses

situations under which countries should go to war and then further explains the proper way in which wars should be prosecuted There are he says certain rules in warfare that must be observed regardless of whether the parties involved have signed any specific agreement to do so Philosophy and law students as well as those with an interest in international politics will be amazed at how modern many of Grotius s ideas seem and intrigued by this foray into international law that still has repercussions in the world today HUGO GROTIUS 1583 1645 was born in the city of Delft in the Dutch Republic Astoundingly intelligent he entered the University of Leiden at age eleven and graduated at age fifteen He was a philosopher and Christian apologist now remembered for his work in establishing a philosophical basis for international law
