Commemorating Muslims in the First World War Centenary Meghan Tinsley, 2021-11-22 Commemorating Muslims in the First World War Centenary engages with the explosion of public commemorations in Britain and France in the wake of the First World War centenary alongside the hyper visibility of British and French Muslims in political and popular discourse Bringing these two phenomena together it draws on national commemorations of the First World War centenary in Britain and France alongside eleven local field sites that foregrounded Muslims to make sense of how national memory changes when it seeks to include a previously excluded group Through an identification of three distinct narratives which correspond to three ways of situating Muslims in relation to the nation mourning mobilisation and melancholia it intervenes in debates surrounding memory nationhood and belonging to make sense of the centenary as an extended exercise in nation building at a moment when the borders of British and French national identity were openly and violently contested With particular attention to sites of melancholia the author shows how certain sites disrupt national memory and refrain from producing any cohesive narrative to repair that which has been fractured An exploration of the ways in which commemoration pushes nations to grapple with their past and present without prescribing any tidy solution this book will appeal to scholars of sociology and anthropology with interests in memory studies nationalism and postcolonial studies [Is Paris Still the Capital of the Nineteenth Century?](#) Hollis Clayson, 2017-07-05 [Is Paris Still the Capital of the Nineteenth Century](#) The question that guides this volume stems from Walter Benjamin s studies of nineteenth century Parisian culture as the apex of capitalist aesthetics Thirteen scholars test Benjamin s ideas about the centrality of Paris formulated in the 1930s from a variety of methodological perspectives Many investigate the underpinnings of the French capital s reputation and mythic force which was based largely upon the city s capacity to put itself on display Some of the authors reassess the famed centrality of Paris from the vantage point of our globalized twenty first century by acknowledging its entanglements with South Africa Turkey Japan and the United States The volume equally studies a broader range of media than Benjamin did himself from modernist painting and printmaking photography and illustration to urban planning The essays conclude that Paris did in many ways function as the epicenter of modernity s international reach especially in the years from 1850 to 1900 but did so only as a consequence of the idiosyncratic force of its mythic image Above all the essays affirm that the study of

late nineteenth century Paris still requires nimble and innovative approaches commensurate with its legend and global aura
