Raised In Captivity Why Does America Fail Its Children:

Raised in Captivity Lucia Hodgson,1997 Cultural critic Lucia Hodgson examines the contradictory and even harmful responses Americans give when faced with the issues that most dramatically affect children's lives Stripping away the hype surrounding such cases as the Menendez brothers Baby Jessica and Susan Smith's murder of her children Hodgson reveals America's self-deception about children's realities and shows that the more we focus on individual cases of deviation the more we overlook the systemic causes of the problem

The Biopolitics of Childhood in the Long American 19th Century Lucia Hodgson,Allison Giffen,2025-02-28 This edited collection contends that the figure of the child is foundational to the workings of biopolitical power yet remains undertheorized The study of nineteenth century biopolitics offers a theoretical framework that promises to increase our understanding of how modern democracies manage their subjects Recent scholarship has invigorated interrogations into forms of state governance that operate at the level of population a biological phenomenon defined as a group of individuals linked by racialized fictions of biological commonality This collection seeks to recognize and position critical childhood studies as essential to these interrogations The essays theorize the role of representations of children and childhood as tools of biopolitical governance in America in the long nineteenth century They variously explore how the interrelated and overlapping qualities integral to our understandings of the child and childhood are readily deployed by biopolitical power The collection is organized into three sections that illustrate how these qualities enable the sorting of human beings into populations targeted for reform exploitation and disposal The Introduction and Chapter Six of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Religious Schools v. Children's Rights James G. Dwyer,2018-08-06 Despair over the reported inadequacies of public education leads many people to consider religious schools as an alternative James G Dwyer demonstrates however that religious schooling is almost completely unregulated and that common pedagogical practices in fundamentalist Christian and Catholic schools may be damaging to children He

presents evidence of excessive restriction of children's basic liberties stifling of intellectual development the instilling of dogmatic and intolerant attitudes as well as the infliction of psychological and emotional harms including excessive guilt and repression and especially among girls diminished self esteem Courts legal and political theorists and the public typically argue that families and religious communities are entitled to raise their children as they see fit and that the state must remain neutral on religious matters Dwyer proposes an alternative framework for state policy regarding religious schooling and other child rearing practices urging that the focus always be on what is best from a secular perspective for the affected children He argues that the children who attend religious schools have a right to adequate state regulation and oversight of their education States are obligated to ensure that such schools do not engage in harmful practices and that they provide their students with the training necessary for pursuit of a broad range of careers and for full citizenship in a pluralistic democratic society

Viral Learning: Reflections on the Homeschooling Life Mary Griffith, 2007-08-01 Now that active homeschooling was coming to an end for our family I found myself pondering its long term effects How different am I from the person I would have been if I did not been a homeschooling parent How have my interests and values changed because of our kids learning at home How are my kids different from their peers Suddenly after all these years I realized there was another homeschooling book in my head But this book isn't another guide to how to homeschool nor is it meant to help homeschooling parents survive the empty nest syndrome This book is personal It's a reflection on how I along with a few of my friends came to homeschooling how it affected us and our view of the world and how those changes in us may spark changes around us

The Children's Table Anna Mae Duane, 2013-06-01 This collection brings together an eclectic range of prominent scholars in architecture education history law literary criticism and cultural studies to explore how the field of childhood studies questions some of the most basic tenets of humanities scholarship and to consider how these questions can bridge disciplines Each essay pairs childhood studies with another field of inquiry to ask explicitly how foregrounding the child reorients long established scholarly foundations in that field Childhood studies insistence that we need to rethink the symbolic work of the child necessarily realigns a host of other fields that often uncritically draw upon the false dichotomy separating the vulnerable dependent child from the allegedly independent and autonomous adult By complicating our assumptions about the child we are also providing a new way of thinking through some of the most basic tenets of the humanities Anna Mae Duane notes that much of the exciting work in the humanities seeks to recover the voices of those who have been infantilized including women people of color and the GLBT community This volume features thirteen essays by leading scholars who reveal how childhood studies offers a vital methodological and theoretical roadmap for engaging issues that are among the most important and provocative in the humanities the recovery of colonized voices the definition of agency the performance of identity and the construction of gender and race to name a few Each of the essays seeks to understand how rhetorical views of childhood shape views of power politics knowledge and sociality

Student Rights

Patricia H. Hinchey, 2001-06-04 A survey of the evolution of student rights from children as property to free speech prayer in the classroom compulsory flag salutes school searches drug testing and the right to equal education This fascinating survey provides a comprehensive introduction to student rights tracing the legal status of children as their father's property to their current status as citizens entitled to constitutional rights Written by Patricia Hinchey Student Rights A Reference Handbook chronicles the landmark legislation and court decisions that have enabled the gradual transformation of students rights This book explains issues surrounding mandatory education and education as a property right examines various inequities such as the segregation of minority students and discusses bilingualism notably the Ebonics or Black English controversy in Oakland California It describes the persistent tension regarding religion and education and explores current controversies such as the widespread use of strip searches in schools by nonuniformed officials **Moral Status and Human Life** James G.

Dwyer, 2010-10-21 Are children of equal lesser or perhaps even greater moral importance than adults This work of applied moral philosophy develops a comprehensive account of how adults as moral agents ascribe moral status to beings ourselves and others and on the basis of that account identifies multiple criteria for having moral status It argues that proper application of those criteria should lead us to treat children as of greater moral importance than adults This conclusion presents a basis for critiquing existing social practices many of which implicitly presuppose that children occupy an inferior status and for suggesting how government policy law and social life might be different if it reflected an assumption that children are actually of superior status Childhood Chris Jenks, 2005 Childhood is an extremely complex and highly

contested concept It refers to a life phase as well as to the age group defined as children but is also a cultural construction part of the social and economic structure of communities The key scholarship collected introduced and reprinted in these volumes reflects this complexity and introduces the reader to the wide variety of interpretations that have been and continue to be placed on it It might be suggested that the push or initiative in theorizing childhood has derived from advances within sociology and anthropology However the future provides potential for interdisciplinary study which this collection also reflects The contemporary study of childhood must comprise a conjoining of disciplines sociology anthropology psychology social geography history philosophy and socio legal theory all have something to add to the field and are represented within the collection **Juvenile Justice** Laura L. Finley, 2007-08-30 Throughout U S history attitudes toward young people have

vacillated between fear of and fear for These attitudes impact social programs for youth including the system of juvenile justice Attitudes are shaped by the socio political and cultural climate of the times and can be traced back to colonial times However changing mores and values often create confusion and conflict resulting in ineffective strategies for preventing and responding to juvenile delinquency Tracing the history of juvenile justice back to the pre colonial era through the present day Finley sheds light on just how we arrived where we are in terms of juvenile justice She connects the competing attitudes about young people to the social economic and political changes of a given era and offers recommendations for establishing

more effective and more humane policies toward juveniles in the justice system Early America is known for its harsh treatment of young people most notably the stubborn child laws which authorized use of the death penalty for children who defied their parents Yet even then many people held more nurturing attitudes toward youth Thus originated the mixed messages in the U S regarding juvenile delinquency and the hodgepodge of approaches that follow The establishment of the juvenile justice system founded on the concept of *parens patriae* or the state as parent would seem to have settled the debate over how juvenile offenders should be treated In reality however there remains much controversy over how best to handle juvenile offenders especially those who commit the most serious offenses While some still maintain juveniles are developmentally different and should be treated in ways consistent with these differences others are dismayed at what they feel to be a system that is too lenient and that leads to higher juvenile crime rates and more serious offenses With the advent of three strikes laws curfew laws boot camps and referring juveniles to adult courts and subsequently assigning them to adult prisons many question just how we got to this place in juvenile justice Here Finley offers the history behind the controversial goals and development of the juvenile justice system providing detailed descriptions of the major trends in juvenile justice Addressing the most current aspects of the controversy she also sheds light on issues of race social class and gender Offering recommendations for addressing the weaknesses and confusion in the system Finley offers a unique and compelling perspective on controversial subject
