Looking Ahead Lillian E. Troll, Joan Israel, Kenneth Israel, 1977 *Annual Review of Gerontology and Geriatrics, Volume 1, 1980*, 1980-01-15 The second volume in this long running series presents the usual critical and intensive review chapters divided into five sections but also addresses particular topics of special interest including drugs and their use and misuse among the aged the nonmedication orientation to treatment of various disorders the immune system and clinical procedures in the management of urinary incontinence As with all the volumes the contributors represent an international array of leading experts

Social and Psychological Problems of Women Annette U. Rickel, Meg Gerrard, Ira Iscoe, 1984 This book in its diversity of topics reflects the re emergence of concern with women s issues in the last decade and the vigor and pioneering quality of scholarship in the area Such extensive albeit uneven development says something about the state of our society as well for organized scholarship is a form of problem solving part of the process of working through issues that come to the attention of observers of and commentators on the social world Be we can go further By recognizing that the contemporary women s movement is not new but is in keeping with a stream of feminism at least 150 years old we can encourage the current rekindling of interest and consciousness to reflect contemporary events as well xiii foreword

Women in midlife, security and fulfillment, 1978 Ourselfs, Growing Older Paula Brown Doress-Worters, Diana Laskin

Siegal, 1987 For women over age thirty five *Lesbians Over 60 Speak for Themselves* Monika Kehoe, 1989 This pioneering

effort is the first attempt to reach a nationwide representation of lesbian elders in order to understand this deeply hidden segment of our population. The women in *Lesbians Over 60 Speak for Themselves* candidly describe their necessarily secret lives in a hostile society, how they feel about being different, how they cope with the homophobia that surrounds them, their most pressing problems, how aging has affected them, as well as the most intriguing topic, their sexual behavior as it was in their youth and as it is now. This powerful book provides fascinating demographics about this previously neglected group of women and thoroughly explores their intimate thoughts and feelings about aging and lesbianism. *Women and Aging* Jo

Alexander, 1986 First and best anthology to address ageism from a feminist perspective **Growing Old** Robert

Kastenbaum, 1979 Women in Midlife--security and Fulfillment: without special title, 1978 This compendium presents the findings of 29 scholars on public policy issues affecting midlife women **Gender, Social Inequalities, and Aging** Toni M.

Calasanti, Kathleen F. Slevin, 2001 The experience of men and women in later life varies enormously, not only along lines of gender but also due to ethnicity, class, sexual orientation, and race. In this text on gender issues among the aging, Calasanti and Slevin explore these differences, their genesis, their meaning to men and women, and their treatment in the policy arena. The authors also take to task traditional research on aging and how it ignores these issues. The authors cover topics of work and retirement, body image, sexuality, health, family relationships, and informal care, among many others. The current research and nuanced theoretical approach presented in this brief book makes it the ideal text to correct the stereotypic and monolithic views of the elderly for courses in gender or aging. *Women Growing Older* Barbara F. Turner, 1994 Until now little existed in the way of a theory of gender and aging. This volume fills the void. Rich with primary data, *Women Growing Older* presents new research on older women and relates it to the psychology of adult development and aging. After an introductory chapter that brings together conceptions of gender and aging, well-known contributors examine how women decide to balance work and career, marriage and motherhood, and the results of such life decisions. The authors then take an adult life span approach to Americans' gender and racial stereotypes of young, middle-aged, and elderly women. A penetrating historical analysis of cultural images and the nature of cognition, mind, and creativity follows. The contributors also present a life span approach to attachment theory and women's social relations. They also take a look at the relevance of psychodynamic theories for understanding gender among older women. Students, researchers, and professionals in the fields of aging, gender psychology, sociology, family studies, social work, and nursing will appreciate the excellent material and insights contained in *Women Growing Older*. *Women Growing Older* is a powerful and a highly technical book. The authors describe how the focus on sex differences rather than on similarities serves to perpetuate male dominance. Their research findings demonstrate that resulting sex differences are invariably used against women. Sex roles are internalized early in life by the process of social learning and socialization; these are then enacted into adulthood in different social settings. Their research looks at the content of gender stereotypes and they then explore the process that people use in deciding what other people are like.

Journal of Mental Health and Aging This edited book has several major strengths A portion of the book addresses the ways in which women balance work and family and the consequences of these decisions or choices in late life Such research is timely and especially challenging given the differential experience of successive cohorts that accompanies historical shifts in assessments of family life Given its importance this topic could fill an entire text itself This volume provides an important contribution to the literature It is a valuable resource for the college or master s level student of psychology women s studies and gerontology Journal of Women and Aging The chapters combine reviews and presentation of fresh empirical data A valuable compilation Upper division graduate through faculty Choice This is the first book of which I am aware to provide a theoretical integration of feminist perspectives on the psychology of aging in terms of women s experiences I believe the editors have done a superb job of selecting chapter authors and the authors in turn have written interesting enlightening and provocative analyses of gender issues in adult development and aging I am impressed with the wide range of theoretical frameworks that the authors incorporated in their analyses researchers and students alike should find plenty of ideas for useful approaches to their own projects I am also impressed with the range of methods and samples represented in the chapters By their approach to selecting the contents of the book the editors employed feminist principles of acknowledging a heterogeneity of experience across groups of women whether categorized by cohort racial ethnic background or stage of the life course and b the importance of using diverse methods to gather data Finally I liked the way the authors locate their topics and theoretical approaches in the historical context of the development of knowledge so that readers gain understanding of some of the reasons that current research and theory development are at their current statuses Thus both the method and the content of the book reflect the principles the editors and authors advocate Rosemary Blieszner Virginia Polytechnic Institute and State University This is an interesting and varied book It is useful in an area which has traditionally perceived gender as almost a peripheral factor in the psychological experience of older women definitely worth a look Health Psychology Update Turner s introduction and Labouvie Vief s chapter Women s Creativity and Images of Gender take a different form The former is an excellent summary of the book s purpose a brief description of differing theoretical perspectives represented in the book as well as its significant omissions and concise summaries of the subsequent chapters The book is useful for those who want a quick overview of specific psychological theories and their related literature The authors clearly describe the approach they are using discuss relevant constructs and refer to related literature A good supplementary reader in gender and or aging related courses Contemporary Gerontology
