Michel Foucault Critical Assessments V7:

Michel Foucault Barry Smart,1994 **Michel Foucault** Barry Smart,2002 This classic series provides students with concise and readable introductions to the work life and influence of the great sociological thinkers Binswanger and Existential Analysis Michel Foucault,2025-09-16 In the early 1950s the young Michel Foucault took a keen interest in the method of existential analysis Daseinsanalyse developed by the Swiss psychiatrist Ludwig Binswanger He gave a lecture course on this topic at the University of Lille in the spring of 1953 and wrote a detailed introduction to the 1954 French translation of Binswanger s Dream and Existence 1930 in which he promised a forthcoming book that would situate existential analysis within the development of contemporary reflection on man This book presents Foucault s unpublished manuscript on Binswanger and existential analysis for the first time in English offering crucial insight into his intellectual development Foucault carries out a systematic examination of Daseinsanalyse contrasting it with psychiatry psychoanalysis and phenomenology and championing its ambition to understand mental illness In his critique of existential analysis Foucault began his turn toward emphasizing the primacy of experience which would lead to the radically new perspective and genealogical methods of The History of Madness and The History of Sexuality Revealing a little known influence on Foucault s historicist approach Binswanger and Existential Analysis reminds us of his unparalleled ability to destabilize our conceptions of self **Michel Foucault II.: Critical Assessments** ,1995 *Michel Foucault II* Barry Smart,1995-08-08 This second set of Critical Assessments on Michel Foucault deals with his work in relation to the themes of rationality power and subjectivity Like the first set these four volumes will serve as a benchmark guide to his thought **Guide to Reprints** ,2009 **Michel Foucault II.: Critical Assessments** ,1995 **Michel Foucault II.: Critical Assessments** ,1995

Guide to Reprints 2007 K. G. Saur Editorial Staff,2006-01-10 The Future of Teaching ,2023-02-06 Teaching born of the period of the ancient sages developed as the moral art of living that introduced humanity to teaching as a moral pursuit to the formation of value to a moral and religious mode of being and to a set of moral principles that have survived into the modern day The idea that the future of teaching represents a technological disruption of moral traditions of teaching and what teaching might become has become a serious concern for the current generation of philosophers in both China and the West Reconceptualizing the Digital Humanities in Asia Kaby Wing-Sze Kung,2020-09-09 This book examines new forms of representation that have changed our perception and interpretation of the humanities in an Asian and digital context In analyzing written and visual texts such as the use of digital technology and animation in different works of art originating from Asia the authors demonstrate how literature history and culture are being redefined in spatialized relations amid the trend of digitization Research studies on Asian animation are in short supply and so this volume provides new and much needed insights into how art literature history and culture can be presented in innovative ways in the Asian digital world The first section of this volume focuses on the new conceptualization of the digital humanities in art and film studies looking at

the integration of digital technologies in museum narration and cinematic production The second section of the volume addresses the importance of framing these discussions within the context of gender issues in the digital world discussing how women are represented in different forms of social media The third and final section of the book explores the digital world s impacts on people s lives through different forms of digital media from the electromagnetic unconscious to digital storytelling and digital online games This book presents a novel contribution to the burgeoning field of the digital humanities by informing new forms of representation and interpretations and demonstrating how digitization can influence and change cultural practices in Asia and globally It will be of interest to students and scholars interested in digitization from the full spectrum of humanities disciplines including art literature film music visual culture media and animation gaming and Internet culture This is a well written book and I enjoyed reading it The first impression of the book is that it is very innovative a down to the earth academic volume that discusses digital culture Professor Anthony Fung Professor Director School of Journalism and Communication The Chinese University of Hong Kong This book has contributed to the existing field of humanities by informing new forms of representation and interpretations and how digitization may change cultural practices There is comprehensive information on how the humanities in the digital age can be applied to a wide range of subjects including art literature film pop music music videos television animation games and internet culture Dr Samuel Chu Associate Professor The Faculty of Education The University of Hong Kong
