these differences cannot have been generated by the natural processes of biological evolution In *The Animal in the Secret World of Darwin* author Michel Bergeron discusses the effects on the sciences caused by the presence of questions on humanity only answerable with religious beliefs His investigation suggests that significant elements of perceived humanity have remained sufficiently narrowly defined to continue to agree with religious beliefs over the entire period starting with the scientific revolution centuries ago and reaching the present Instead he questions could we be the simple animal who can only live on the belief not to be a simple animal To alleviate these biases on the sciences of life Bergeron advocates a different synthesis between Darwinism and Lamarckism He further asks How can sciences pretend to a cosmology neutral in term of religious influence since all of its complex mathematical developments were made under the constraint that we can link the present directly to the Big Bang

The Secret Life of Kids James W. Peterson, 2000-10-29 It all began when James Peterson was a camp counselor and two children watching him meditate described the colors they saw around his form we saw colors coming out of his stomach And the outside was purple then it was blue then it was yellow then reddish and light yellow in the middle Studies indicate that almost seven percent of young children have such psychic experiences For the most part they don't tell anybody about them for fear of being ridiculed But the author believes it would be psychologically healthy for them to relate such occurrences to adults if they feel the need In this book Peterson has put together a charming collection of case histories about such psychic episodes He believes they should be accepted as factual that frequently they emanate from the wisdom of innocence present in youngsters The question of the secret life of kids is examined by Peterson from the point of view of philosophy occultism and child psychology He suggests why and how such experiences manifest and their potential value to the child's growth pattern

Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination: Book 5: Khayyami Theology Mohammad H. Tamdgidi, 2022-05-01 Omar Khayyam's Secret Hermeneutics of the Robaiyat in Quantum Sociological Imagination by Mohammad H Tamdgidi is a twelve book series of which this book is the fifth volume subtitled Khayyami Theology The Epistemological Structures of the Robaiyat in All the Philosophical Writings of Omar Khayyam Leading to His Last Keepsake Treatise Each book independently readable can be best understood as a part of the whole series In Book 5 to understand the theological epistemology or way of knowing God framing Khayyam's Robaiyat as spread out in all his philosophical works Tamdgidi further offers the texts and his updated Persian and new English translations and analyses of six primary writings that preceded Khayyam's last keepsake treatise on the universals of existence 1 Khayyam's annotated Persian translation of Avicenna's sermon in Arabic on God and creation 2 Khayyam's treatise in Arabic addressed to Nasawi wrongly regarded as an Avicenna pupil on the created world and worship duty 3 5 Khayyam's three treatises in Arabic all addressed to Abu Taher to whom Khayyam also dedicated his treatise on algebra that are separate chapters of a three part treatise on existence on topics ranging from the necessity of contradiction determinism survival attributes of existents and the light of intellect on existent as the subject matter of universal science and 6 Khayyam's treatise in Arabic addressed to Moshkavi a supportive Shia intellectual in response to three questions on

soul's survival on the necessity of accidents and on the nature of time The most fruitful way of understanding Khayyam's six texts is by regarding them as efforts made at defending his succession order thesis implicitly revealed when commenting on Avicenna's sermon and finalized in his last keepsake treatise The texts served to offer the theological epistemology behind Khayyam's thesis revealing his creative conceptualist view of existence that informed his poetic way of going about knowing God creation and himself within a unitary Islamic creationist evolutionary worldview Khayyam's way of knowing God and existence is non dualistic non atomistic and unitary in worldview allowing for subject included objectivity probabilistic determinism transcontinuous or discontinuous creative causality transdisciplinarity and transculturalism it thus fulfils in a prescient way all the eight attributes of the quantum vision Poetry is most conducive to unitary knowing and subject included objectivity must necessarily be self reflective and thus engage intellectual emotional and sensible modes of knowing This explains why Khayyam transcended scholastic learning in favor of a poetic encounter with reality What he meant by Drunkenness calling it the highest state of mind known to him can thus be best understood as a unitary quantum state of mind achieved by way of his poetry as a meditative art of self purification The goal metaphorically is to move from a way of knowing things as divisible grapes to a pure and unitary way of knowing them as indivisible Wine paralleling what we call today moving from chunky Newtonian toward unitary quantum visions of reality The key for entering Khayyam's secret tent is realizing that what he primarily meant by Wine in his Robaiyat was self referentially his Robaiyat itself a key openly hidden therein thanks to his theological epistemology For him the Robaiyat was a lifelong work on himself serving also human spiritual awakening to its place and duty in the succession order of God's creation It also served his aspiration for a lasting soul He knew the now proven worth of his secret magnum opus and that is why he so much praised his Wine About OKCIR i Published to Date in the Series ii About this Book iv About the Author viii Notes on Transliteration xvii Acknowledgments xix Preface to Book 5 Recap from Prior Books of the Series 1 Introduction to Book 5 Exploring the Theological Epistemology of the Robaiyat in Omar Khayyam's Philosophical Treatises 7 CHAPTER I Omar Khayyam's Annotated Persian Translation of Avicenna's Splendid Sermon in Arabic on God's Unity and Creation The Manuscript with a New English Translation Followed by Comparative Textual Analysis 17 CHAPTER II Omar Khayyam's Treatise on the Created World and Worship Duty The Arabic Manuscript with Updated Persian and New English Translations Followed by Textual Analysis 85 CHAPTER III Part 1 of Omar Khayyam's Treatise on Existence Addressed to Abu Taher Regarding the Necessity of Contradiction Determinism and Survival The Arabic Manuscript and Updated Persian and New English Translations Followed by Textual Analysis 175 CHAPTER IV Part 2 of Omar Khayyam's Treatise on Existence Addressed to Abu Taher Regarding Attributes The Arabic Manuscript and Updated Persian and New English Translations Followed by Textual Analysis 237 CHAPTER V Part 3 of Omar Khayyam's Treatise on Existence Addressed to Abu Taher Regarding the Light of Intellect on Existent as the Subject Matter of Universal Science The Arabic Manuscript and Updated Persian and New English Translations Followed by Textual Analysis

Core Values of Mathematics Education Contents David Ann, 2022-10-20 Mathematics can be characterized as an endeavor to discover the patterns hidden within nature The math education content should be devised as a way of bringing out creativity within every individual who each have a different unique talent through the understanding of humanity and nature Mathematics is the subject dedicated to discovering the hidden patterns within nature Upon discovering this pattern you can create something that provides happiness to people Humans are part of nature

Therefore the hidden patterns to making people happy must be embedded in the nature Then what are some of the things that can make people happy People of today are lonely They are waiting for something that can soothe their loneliness Smartphones are fairly recent example of an item that soothes people s loneliness Also people have thirst for anything that can extend their life span so they could live long and healthy lives What are some of the examples One of those items is new medicines that cure diseases that were previously impossible to cure Another example would be prescriptive tools such as MRI ultrasonic waves and CT Health and emotional issues are highly interrelated and all add up to allowing happy lives Every machinery or technological devices that bring happiness are included in the field of high tech industry Mathematics is a source technology for all high tech industry The level of a country s mathematics skills is equivalent to the level of a country s competence Today all first world countries have exceptional level of mathematics The most ideal math education is an endeavor to discover the patterns hidden within nature Before you do that you first have to observe and starts from the very effort to find those patterns in animals and plants Biologists are people who find patterns in animals and plants The nature consists of plants and animals If you observe them well you would be able to uncover a distinctive original pattern in all of them A pattern is innately differentiated characteristic that every plant and animal has In order to bring this act of observation into a field of mathematics you have to be able to draw out those patterns The patterns of animals and plants are very sophisticated quite hard to realize the overarching pattern If you can tag every pattern you find with a number or a word you can turn the pattern into a form of an equation Then the overriding pattern becomes apprehensible As such numbers and languages are powerful tools that mathematicians use in the process of finding the hidden pattern behind the nature Once we find the pattern through observation and tag them with a number or a language we finally have the chance to discern the pattern itself Numbers and languages are key features in idealism that mathematicians support Physicians say the following If physicians do not utilize numbers and languages of mathematics we cannot even begin to collect our thoughts To simply put idealism of mathematics is an equation If you turn various possibilities of numbers into a language what you ll have in the end would be an equation Long sentences that contain numbers can be easily turned into an equation if you utilize a language There is a need to understand the saying The use of language has brought convenience to the field of mathematics The difference between calculation and mathematics stems from this very idea Once you find the overriding pattern you have to find the overarching rule Because you have to figure out the reason why the structure of nature is created and goes extinct in order to find out the hidden pattern behind the nature Every living organism has a consistent pattern However there are patterns hidden within patterns A pattern and its destruction always exist side by side which makes it difficult for us to pinpoint the pattern of movement Furthermore a pattern might be multi dimensional which makes external detection rather difficult There seems to be some sort of a rule inside pattern but no one can be completely sure of what that pattern is precisely In order to discern patterns destruction of patterns and patterns that appear within another

pattern people need to have higher perspective Higher perspective can be nurtured without limit by acquiring a refined taste in the humanities If we can cultivate classic taste for the humanities through reading so that we can understand societies that we do not live in we will have the ability to see the invisible hear the inaudible and gain insights into the world we've never been The humanities is a story about people's lives It is about how creative people's lives were throughout their life and how beautiful their death was when the moment came The humanities is about life and death By studying the humanities people will gain new perspectives on profound subjects such as life and death creation and extinction time and space and finally the past present and the future Therefore they can analyze the world of patterns that impact other patterns If people can find the hidden pattern behind nature they can understand the secret behind life and death of plants and animals They can also understand the secret to creation and extinction of the nature Mathematicians are people who devise a prediction mechanism to make projections on what will happen to living organisms by finding hidden patterns behind the nature The most ideal mathematics education will enable you to cover fields of expertise in natural science such as biology chemistry and physics Biologists are people who find pattern by observing the nature and draw it out Chemists then do their job of naming those that are visible tangible and have forms Physicians take care of the field of power and mechanisms that explain the process all living organisms maintain to keep their unique forms Mathematicians are people who devise a prediction mechanism to make projections on what will happen to living organisms by finding out hidden patterns behind the nature This is the very reason why we call mathematics the essence of natural science Comprehending the world of chemistry for the structure of nature and the world of physics for power and mechanism is vital to find out hidden patterns behind the nature We need to also understand the world of fractals chemistry and the world of chaos physics The world of chemistry and physics always maintain a structural relationship At the same time mathematicians figure out hidden patterns behind the nature by looking at both the world of chemistry and physics and speculating on what will happen to one organism and how big it will grow before it suddenly gets smaller and disappear

2022 10 20 David Ann Ph D PREFACE **The Journal of Speculative Philosophy** ,1878 **Lifestyle by Nature** Betty Holston Smith Ed.D,2019-04-06 How are you If your truest first thoughts in pondering this question are something like I could be better this nature based lifestyle change book might help To be healthy you must take care of all of you because the total you is made up of your entire self including your body mind spirit soul your everything If one part of you is not up to par in some way or another it's impossible for your everything else to be totally healthy You have tried everything your friends your doctors and even the advertisement industry recommended for improving your health But nothing has worked except to make you a frustrated person Close your eyes right now and allow your conscious mind to contemplate your health situation Be honest You are not the healthiest that you can or should be In fact you are in dire straits according to how you feel and what your medical team says about your health I know all of this about you because I was you so many years ago Like you for years I followed the same type of diet herd that

you have been following And like you after trying everything I had no clue about what to try next However I found a clue Over forty years I lived the importance of and learned to replicate nature s wisdom on nutrition and movement in my unhealthy lifestyle Her focus was on naturally changing lifestyles not on temporary quick fixes And in the process she provided me with all types of support to do so I carefully recorded her step by step wisdom and provided the details inside Ditch your next quick fix cosmetic diet and put your trust in nature s simple but trustworthy lifestyle change wisdom **The Irish Ecclesiastical Record** ,1920
