Good, 1999 **Patterns from the Golden Age of Rustic Design** Albert H. Good, 2003-02-25

Containing over 1200 photographs and detailed line drawings from which one can design and build directly. *Patterns from the Golden Age of Rustic Design* is a valuable reference for preservationists, historians, designers, and homeowners. Albert Good provided plans for the construction of cabins, lodges, hotels, fireplaces, boat houses, furniture, fixtures, and more. Initially developed as a teaching tool for designers in the 1930s, this book is for anyone who has a desire to duplicate the classic rustic structures commonly found in state and national parks. The designs extend to the use of stone in New England and the proliferation of the pueblo and mission styles in the southwest, as well as structures made of logs and mortar. In this informative treasure of a design book, you will find that the author reached his principal goal to present structures that appear to belong and be a part of their settings.

Excerpt from *Park and Recreation Structures Vol 1 Administration and Basic Service Facilities*: Any area in which the preservation of the beauty of Nature is a primary purpose, every proposed modification of the natural landscape, whether it be by construction of a road or erection of a shelter, deserves to be most thoughtfully considered. A basic objective of those who are entrusted with development of such areas for the human uses for which they are established is it seems to me to hold these modifications to a minimum and so to design them that besides being attractive to look upon, they appear to belong to and be a part of their settings. For some years the National Park Service, State park authorities, and other agencies which administer natural park areas have been attaining a constantly improved technique of design and execution for the structures that are required for safe, convenient, and beneficial public use of these parks. Progress in this field has been especially marked since the inception of the Emergency Conservation Work program with its steadily increasing and sound emphasis on development of recreational facilities, particularly in State parks. Stimulated by the problems this work has

presented competent architects have produced designs and seen them converted into reality that denote a real advance in this somewhat specialized field Herein are presented some of the successful natural park structures a group by no means limited to those produced during the past four years or to those designed and erected under National Park Service supervision Since tastes differ and since varying experience produces varying conclusions it is hardly to be expected that there will be unanimous agreement as to the wisdom of including certain of the selected designs or that no one will take issue with any of the points raised in the discussions that form an important part of the work Selection and discussion alike however are the result of most careful and conscientious study This book is certain I believe to prove of exceptional value to all those who are concerned with the design of park and recreation structures It should be immensely helpful in stimulating still further improvement in this special field of design The interest manifested in it in advance of publication indicates a widespread conviction that there is a real place and a real need for such a compilation About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
