

A steam locomotive, dark in color with a red buffer beam, is pulling a passenger train. The train consists of several green and white passenger cars. The train is moving along tracks that recede into the distance. The background shows a hilly landscape under a blue sky with large, white, fluffy clouds. The overall scene is a classic representation of railway travel.

Bracken, Paul Rabé, R. Parthasarathy, Neha Sami, Bing Zhang, 2025-10-01 The ten essays in Future Challenges of Cities in Asia engage with some of the most critical urban questions of the near future across Asia These comprise socio economic and cultural transitions as a result of urbanization environmental challenges especially questions of climate change natural disasters and environmental justice and the challenges of urban infrastructure built form and new emerging types of urban settlements The essays demonstrate that it is increasingly difficult to conceptualize the urban as one particular type of settlement Rather it would be more accurate to say that the urban characterizes a global transition in the way we are beginning to think about settlements This book is of interest not only to researchers interested in comparative and interdisciplinary research but also to urban practitioners more broadly illustrating through concrete cases the challenges that urban regions in Asia and beyond are facing and the various opportunities that exist for dealing with these challenges
